As the years unfold, where will the next 20 find you?

Maybe more than that have passed since you picked up this book off a dusty truck. You checked your mug shot, stared at it when no one was looking, and deposited this 400-odd-page volume on a shelf. You questioned the wisdom of packing it from town to town, but never quite had nerve to throw it away.

Back to the subject. Where will the future find you? No doubt, you are somewhere between "start" and "finish" in the labyrinth of life.

Back in cold war days, we learned the future is not limitless. What if the bomb shelter supply of saltines should run short? Such fears render useless plans for three-car garages, 1.7 children, a chihuahua and a tennis racket in every closet.

H 121

21

But one thing you will do in the future is consider the past. What will you remember about K-State?

The legendary red-head who caused many a male to alter his path in hopes of another glimpse of her?

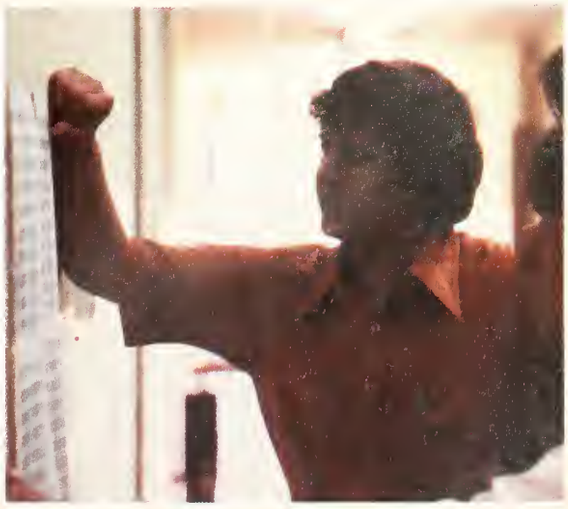
Russian roulette with the credit/no-credit system? Mid-terms slept through necessitate extra semesters in Cardwell 101. Thereby an important lesson is learned: once is more than enough to watch African tribesmen hunt giraffe.

The test for which you didn't study, but still bagged an "A"? It may have been blissful victory at the time, but triumph fades.

Rather than specific memories, a sense of progression is more likely to linger.

The parties reflect progressions from point "A" to point "B" in the journey through the labyrinth: freshman parties were characterized by their impromptu atmosphere; time seemed limitless. That atmosphere progressed to "time-is-running-out-let's-get-something-accomplished."

If memories are to fade, eventually one wonders what one leaves college with, besides insatiable taste for beer.



Enough time out. The past is passing at an ever-escalating pace. The last time you checked your watch, it was a quarter to September, freshman year. Suddenly, it's half-past graduation.

What it comes down to is, as the drinking ditty says, "We're here because we're here." The emphasis belongs on what choices we make. Comfortably, college is a holding pattern where we are free from decision-making. But for that matter, no pilot ever got away with making all decisions after take-off.

And even though we don't know what will materialize, the journey is a matter of determining which pay-offs are worth it.

The Ivory Tower

by Pamela Johnson

Diplomacy is the name of the game. Acker plays skillfully.

A $400,000 Edwards Hall expenditure parallel to Straube's demise poses a dilemma — how to justify this one?

"They're not competitive in any way," Acker said. "The athletic residence hall was one issue, Straube a second. Straube and Smith are separate issues."

"Smith was not in as deep trouble. We happened to have a chunk of money, more than needed, held in trust," he explained. "It could be spent at the express wishes of donors of money endowments."

Acker proposed spending half of Smith's endowment on capital improvements, and a hike in housing rates to guarantee adequate maintenance for at least a ten-year period. He explained this would not have worked in Straube's case.

"With the fire marshall review and a need for drastic renovation, we didn't have the money to do it unless we pulled money from other scholarship funds," Acker said.

Acker's rationale is intended to exonerate administrative support of Edwards Hall.

"The athletic council asked that we move away from the concept of an athletic dorm, so we transferred management to housing. We transferred management from the endowment association to the university," he added. "It is surrounded by campus property, we can't walk away from it as a university."

Acker's decisions consistently follow his allocation policy.

"I have two sets of priorities — one that is long time, such as the very existence of eight colleges and the graduate school — one priority that won't be modified too much."

"Then you have short time — five to ten-year priorities," he said. "Among these priorities are such things as improving the appearance of the campus: more trees, thoroughly planned walkways, bike trails, preservation of green space, building identification, signs welcoming people to Kansas State University."

Money mandates. Implementation of Acker's projects hinge on financial support.

"We need to promote giving on the part of clientele," Acker said. "A third area that I'm putting quite a bit of attention in is our capability of fund-raising."

"We have a need for an art center, a small experimental theater, new basketball arena, distinquished professorships, scholarships," he said.

As with every university administrator, Acker must push his crusades through proper channels.

"If you go through channels, you acquaint the people along the way with the significance of it. If it is a good thing, then you magnify or amplify its momentum and this causes your request to be better received," he said.

Does working through proper channels keep you from meeting people's needs in the most efficient manner?

by Pamela A. Johnson

ialeditorialeditorialeditorialedit

May I ask who you are, why are you calling, what are your questions, how much time will you take, when is your deadline?

K-State administrators boast open-door policy, but press secretaries screen "personal" contacts.

Working through channels to get interviews with the hierarchy is enlightening. Brief phone conversations—four minutes average—disrupt the schedules of the same administrators claiming open doors and flocks of drop-ins. Appointments are absolute.

Input, output, feedback, give and take, everyone is a potential sounding board. Sentries encourage visiting the ivory tower, but attempts to remodel passageways are unheard of.

Big channels breed little channels that grow into status symbols. Some cower behind them, others accept the channel syndrome as the norm.

Channels support channels and the maze thickens. Administrators are absolutely right—stepping out of channels would snap the grapevine and grate the machinery.

Therein lies the crux of the problem. Climate is determined within the context of vocabulary. Administrators' use of the term "communications" to modify "machinery" is a syntax both contrary and alarming.

Machinery connotates a monstrosity of metal, inflexible. Only the designers know how to operate the beast. Layers of buffer, red tape and flak catchers dilute communication.

Communications at K-State? One little committee in the big world of councils, from the Board of Regents to president Acker to 20 administrators to department heads to student organizations to the Kansas constituency.

The quantity of filters is distressing—who wants a watery message?

editorialeditorialeditorialeditorial

Daniel Beatty, Vice President of Business Affairs:

❛I think that working through the system's channels makes it possible to provide more efficiently for people's needs ... Sooner or later you have to work through or with the channels of administration, or you'll have a chaotic state.❜

John Chalmers, Vice President for Academic Affairs:

❛If one has a position of some power, then one gets the communication pretty promptly that one wants. I'm sensitive to the powerless person who feels that he can't get to the decision-maker who affects him.❜

Bernd Foerster, Dean of Architecture and Design:

❛I think that it's part of an administrator's job to see if he can make things possible. Sometimes one has to make an end run. I believe that Kansas State University as an institution is remarkably flexible, and much of the red tape we run into comes out of Topeka.❜

Ellsworth Gerritz, Director of Admissions and Records:

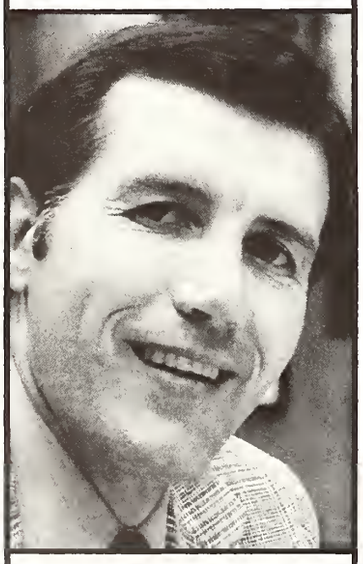
❛Going through channels is necessary. I can't think of an instance when I've been thwarted by going through channels. That's a testimony for the university.❜

Ruth Hoeflin, Dean of Home Economics:
❛ Even our proper channels are flexible. Communications here are so much more open, it's easier to go to the top and talk. ❜

Robert Kruh, Dean of Graduate School:
❛ There's not the formality or rigidity that the question implies. When a problem comes up, I've never thought of the existence of channels as an obstacle. ❜

Robert Lynn, Dean of Business School:
❛ I think that if you work through the channels, you probably get better support for the action you take. ❜

Max Milbourn, Assistant to the President:
❛ In an organization, the only way you can work in an orderly fashion is through channels. I suppose you could take short cuts but ultimately, progress is made that way (through channels). It may seem a little slow at times but when you arrive at a decision, it's sounder. ❜

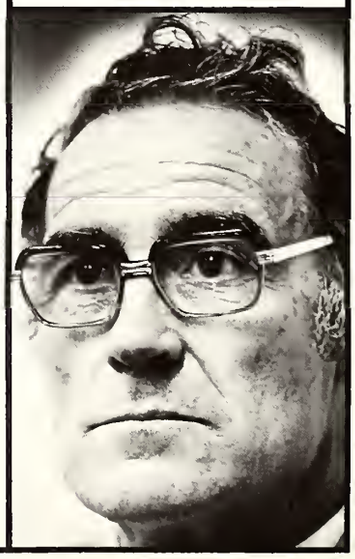


Roger Mitchell, Vice President for Agriculture:
❛ I think it's not that the so-called proper channels diminish our effectiveness — it's just that sometimes it's better to get out and get the feel of what is so urgent. We're aware that it's useful to follow both formal and informal channels. ❜

David Mugler, Acting Dean of Agriculture:
❛ I don't see that it's reduced my effectiveness. Keeping in channels helps from a communication standpoint in both directions and I also think improves my overall effectiveness. ❜

Earl Nolting, Director of Center for Student Development:
❛ I think that working through channels is to be able to use channels creatively and effectively in order to meet needs. I accept them as necessary in a university this size. ❜

Chet Peters, Vice President of Student Affairs:
❛ The resolution of a situation rather quickly sometimes prohibits you from touching base with all concerned. It hinders efficiency, but you need to be sure that all people affected by a decision have an opportunity to be in with the decision-making process. ❜



Robert Sinclair, Director of Student Health:

❛ I'd say basically that we get into binds in hiring ... The replacement of personnel comes to mind immediately. Other than that, I can't think of any great problems. ❜

Jordan Utsey, Dean of Education:

❛ I think usually when people get to jumping channels, we run into trouble meeting their needs. ❜

Donald Rathbone, Dean of Engineering:

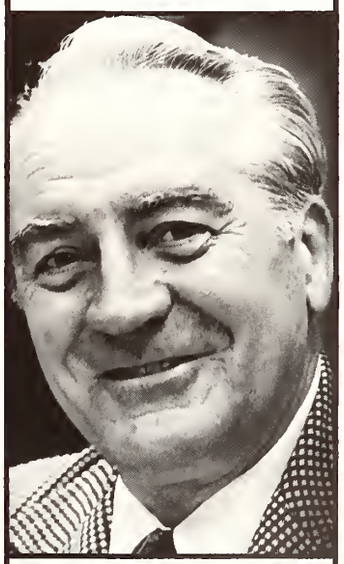
❛ I think at K-State we have very good communication. We're probably one of the best universities in the country as far as ease with people above and below you. We have the least number of administrative layers required. ❜

William Stamey, Dean of Arts and Sciences:

❛ It's not my frustration so much as frustration in departments ... I know enough about the system to work through it and get done what I need to get done. It's most frustrating for new people. ❜

Walt Smith, Director of K-State Union Operations:

❛ I don't feel that there is a major stumbling block for the Union in regard to university policy. If we want changes, they (administration) are probably more flexible with our operation because of the type of operation, in comparison with regular academic departments. ❜



Paul Young, Vice President for University Development:

❛ A lot of the work that I have to do is to accomplish a goal within the system so therefore, I have to work within limitations that may be set, financial or otherwise. ❜

Jay Rausch, Director of University Libraries:

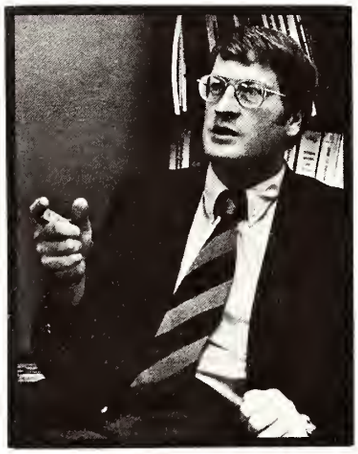
❛ It seems to me that the number of layers that have to be gone through start where I stand — to the legislature. I'm deeply committed to using channels, but I think that really the message that gets out the other end is so weak that it doesn't carry the original impact. ❜

Donald Trotter, Dean of Veterinary Medicine:

❛ I think that if you don't stay in the channels, you get sidetracked to the point where you don't get anything done. The checks and balances of a system like this require that. ❜

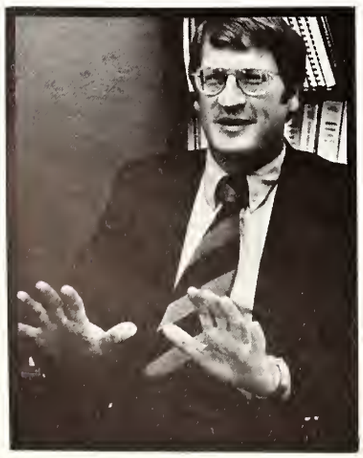
teachersoftheyearteachers

"I've only been out a year and that helps me understand the students. I can empathize after being there so long."



"Besides understanding the students, having well-organized lectures is part of being a good teacher."

"If I can get students to be enthusiastic about what they're studying, I'm convinced they will work three times as hard."



"When I started school I wasn't that charged up. I got motivated by several people who are still here. But ever since, I've been enthused about school."

Experience is the best teacher. Randolph Pohlman's teaching ability stems from his having recently moved from the other side of the desk.

Having finished his doctorate in 1976, Pohlman was chosen as one of four teachers of the year after one year of teaching.

"I've only been out a year and that helps me understand the students. I can empathize after being there so long," he said.

Pohlman's lengthy experience began at K-State where he got both a Bachelor's of Science and Master's of Science in Business. After receiving his doctorate from Oklahoma State University, Pohlman returned to K-State to teach Business Finance and Capital Budgeting.

"Students have to respect you as an individual ... you've got to earn that respect," Pohlman said. "It's not enough to just stand up there."

Getting to know students is important to Pohlman. He goes to classes a few minutes early to provide opportunity for personal exchange, and has taken students golfing in an effort to get acquainted.

"Besides understanding students, having well-organized lectures is part of being a good teacher," he said. "I spend an hour looking over my notes before class so when I walk in, everything fits together. If I can get students enthusiastic about what they're studying, I'm convinced they will work three times as hard," he explained.

Pohlman attributes his enthusiasm to teachers he met as an undergraduate. As a freshman, Pohlman said he wasn't overly interested in school until several business professors took time to encourage him.

"When I started school, I wasn't that charged up. I got motivated by several people who are still here," he said.

Enthusiasm, compassion and organized lectures inspired students to nominate Pohlman for teacher of the year.

Student support was voiced in teacher evaluations: "If every instructor taught as good as Mr. Pohlman, I wouldn't be afraid to take any course in this university."

ftheyearteachersoftheyea

People who practice what they preach are so rare that when they are found, it seems appropriate to reward them.

Perhaps that is why Robert Shoop, a Pennsylvanian-turned-Kansan and assistant professor of administrations and foundations, was chosen by students to receive one of four outstanding undergraduate teaching awards.

"Teaching is my main thrust in higher education. My committment is to the classroom. I use myself as a model for what a teacher should be," Shoop said. "Then, hopefully, students use that model to make themselves better teachers."

Shoop works mainly with seniors in his Educational Sociology class before they student teach.

"I try to do what I say. I try to teach the way I expect them to do," he said. "I don't play games with the students — if I don't know something, I work things out with them. I encourage students to take responsibility."

Shoop earned his Bachelor's of Science and Master's of Divinity degrees from Wittenberg University in Springfield, Ohio. He received his doctorate from the University of Michigan. Shoop is involved with community education and development, and serves as director for the Kansas Center for Community Education Development.

"I am very interested in the relationship of school to community and seeing education as a life-long process. Education takes place in the total community. The potential of the individual is only limited by the vision that he has for himself," he said.

Shoop deals with students from all over campus, not only education majors. He estimates that his classes are 80 per cent female and 20 per cent male.

"Many males haven't found financial rewards in education, but as that changes, more males will come in," he said.

Shoop said he encourages student input in his classes. "What makes me feel most honored by this award is that it is from the students," he said.

Given such concern and interest for the individual student, it seems an honor that students have such teachers to select.

"My committment is to the classroom. I use myself as a model for what a teacher should be. Then, hopefully, students use that model to make themselves better teachers."

"I don't play games with the students. If I don't know something, I work things out with them."

"Education takes place in the total community. The potential of the individual is only limited by the vision that he has for himself."

"Many males haven't found financial rewards in education. But as that changes, more males will come in."

teachersoftheyearteachers

"Every once in a while, you'll have a student you really feel you've helped. That's very exciting to me."

"The kind of response you get back from students is dependent on how well you make an effort to get to know them."

"The students here are very much like the people I grew up with."

"I followed in my father's footsteps. He was involved in teacher-training at Oklahoma State before he retired."

If Faye Ann Presnal were not teaching at K-State, she would be a natural for milk commercials. She radiates the wholesome vitality and zip that make milk appealing.

Presnal, instructor in the College of Home Economics for four years, teaches Developmental Program-Planning for early childhood education majors, coordinates student-teaching experiences and directs the child care programs at K-State.

During Presnal's teaching career, she has formulated a goal of helping students find new possibilities within themselves.

"The most rewarding thing is to see a student develop to his fullest potential," Presnal said. "Every once in a while, you'll have a student you really feel you've helped. That's very exciting to me."

She credits her success to relatively small classes of 25 to 30 students. She takes advantage of this personalized atmosphere.

"The kind of response you get back from students is dependent on how well you make an effort to get to know them," Presnal added.

For Presnal, getting to know K-Staters is like meeting old friends.

"The students here are very much like the people I grew up with," she said. "I have a great bunch of students."

Presnal has wanted to be a teacher since childhood. Both her mother and father are teachers.

"I followed in my father's footsteps. He was involved in teacher-training at Oklahoma State before he retired," Presnal said.

Teaching is only one dimension of Presnal. Another is learning.

"As you learn to be a teacher, you also find out things about yourself and get to know yourself a little better," she said.

ftheyearteachersoftheyea

In classes of more than 90 students, Thomas Parish knows each one. Not only can he repeat names after the first day, but within the first six-weeks he strives to relate to each student personally.

"That first day, I can impress a lot of people with learning names, but I'm not satisfied with myself until I know each individual," Parish said.

Parish approaches each class as a "whole new bunch of students I'm going to be able to interrelate with."

"I have the opportunity to teach what I love most to students I can really relate to," he said.

Parish is an assistant professor of human development in the College of Education. His main teaching assignment is Educational Psychology I.

He tries not to lecture as much as discuss and accentuate the discussion with humor. He describes this as a blend between relaxed and informative atmospheres.

"If you can walk into your classes and teach them to be excited about the material you're teaching, actually be interested in it yourself, the students will enjoy it more and get more out of it," Parish said.

Early in his teaching career, Parish taught at a community college whose small size allowed him to be close to his students. He expressed hope of maintaining that closeness with his K-State students.

Despite his personal interest in his students, it was the faculty that brought him to K-State.

"We have one of the more outstanding faculties. They're just a bunch of great people. That is what brought me here," Parish said. "Probably what will keep me here is the fact that the students are really swell."

Since coming to K-State one year ago, Parish has become local and state adviser of Student National Education Association and faculty adviser of Phi Kappa Theta, a social fraternity.

Parish's enthusiasm isn't limited to teaching. He is a Frisbee freak who enjoys dancing, church work and being with his wife and four children.

"That first day I can impress a lot of people with learning names, but I'm not satisfied with myself until I know each individual."

"If you can be excited about the material you're teaching ... the students will enjoy it more and get more out of it."

"We have one of the more outstanding faculties. They are just a bunch of great people. That is what brought me here."

"Probably what will keep me here is the fact that the students are really swell."

Shuffle between tables like a pack of playing cards, pre-sign your new checks,

...and don't forget your SSN

by Dallas Brown

Pushing, shoving and hurrying up just to wait. Registration's human processing line is the way to become a bona fide student. With a record high this year of 19,045 students, the already frenzied process becomes a circus. On the way to a higher education, it's just part of a student's trials and tribulations.

But wait a minute---pushing? Shoving? Hurrying up just to wait? Sounds like the same process the masses go through hunting for a job.

Later, these same 19,045 students will become tigers out on the job market. And they'll be after YOUR job. To make matters worse, the largest enrollment increase came in Continuing Education. That means everyone already out on the market is polishing his act.

But don't panic — things may not be as bad as they look. The job market is always changing, so what is true today won't necessarily be true tomorrow. Administrators and corporate executives alike hate making predictions for fear of being proven wrong five minutes later.

Planning for pavement-pounding day may be difficult since no one will make job forecasts. The first step has already been taken once a student chooses a curriculum.

Traditionally, K-State has been acclaimed for its science and agricultural programs. In addition to continually high enrollment in these areas, recent trends show an increase in the number of students in the Colleges of Business and Engineering. In the last year, enrollment in both rose 10 per cent. Fortunately, or unfortunately, not everyone is cut out for these two fields where future prospects look good.

There is a myth circulating that students in curriculums which aren't as technical or scientific, such as liberal arts or humanities, will have trouble acquiring a job. But Bruce Laughlin, director of Career Planning and Placement, doesn't believe it.

"Many students don't realize the possibilities open to them in liberal arts .... Some people have the narrow view that students in liberal arts and humanities are not prepared for work in a particular area," Laughlin said. "They may have trouble getting a job in their particular field because the question is, 'what exactly is their field?' ".

When a person's curriculum seems obscure, their personal qualifications will assume a greater importance, Laughlin said. Their intelligence, personality and course of study are focused on more closely — qualities the potential employer can see, he said.

One complaint of Laughlin's: "Just don't have the attitude that when you go in to the liberal arts you want knowledge for knowledge's sake, and then complain when you find what you really want is a job that pays well."

"Students can succeed in a number of different fields and can be happy in many. There isn't just one right career and the others are all wrong," Ellsworth Gerritz, dean of admissions and records, said.

"There is at least a cluster of vocational pursuits that an individual can be successful in," Gerritz said, "and most people get into their vocation by chance."

Gerritz illustrates: "I love my wife dearly ... but if I hadn't met and married her, I would probably have married someone else and have been happy," he said.

Gerritz also noted that knowledge students gain in one area of study can be applicable and beneficial to another.

"Nearly all curriculums have common bonds to another. Our society is accused of being more specialized than it really is," Laughlin said.

Both Laughlin and Gerritz agree students should learn the ability to learn if nothing else. They suggest learning to understand others, not just by attending class and trying to figure out how to butter-up that nit-picking English teacher, but by taking advantage of extra-curricular activities, living and social situations.

Enrollment is expected to climb steadily, at least for the next few years. Competition will become keener than ever. People already on the job are updating their professional skills, branching off in new directions, re-enrolling, pushing, shoving and hurrying up just to wait ....

Metamorphosis
from foliage to foundation

by Pam Grout

> It was Old College Avenue and in the time of having you, I remember it as if it were today
>
> The tangled trails of time have led us far astray, the memories seem to stay
>
> And through all the roads that led me and through all the years you have been gone, I have found that it would never go away.
>
> Old College Avenue
> Harry Chapin

A memory remains etched in the mind forever. To many alumni, K-State is still that small agricultural college. Others see it as the land of purple power where Vince Gibson reigned supreme. Some remember Aggieville as candy shops and dance halls.

But time chisels away these familiar visions. Some changes are never noticed; others make profound alterations in lifestyles. Each year the campus' face changes bit by bit, building by building.

The athletic dormitory is no longer. Granted, only 35 out of 200 residents are non-athletes, but the dorm is now under the jurisdiction of the Department of Housing rather than the Department of Athletics.

Besides advantages like a sauna and swimming pool, and disadvantages like higher rent and distance from campus, Edwards Hall is organized like any other dormitory.

"We've got a government now," Vince Parette, social chairman, said. "Since we're under the housing department, we can't tear the rooms up. We've got hours. Girls must be escorted.

"We've got new furniture," Parette added. "The rooms were painted. They patched up every hole that ever was. The doors are burglar-proof, and now we've got maids," he said.

$400,00 was spent on capital improvements, according to Paula Cooney, hall director.

Considerably less was spent revaming a scholarship house for University for Man—approximately $380,000 less.

Last year, Staube Scholarship House was closed, not meeting building code specifications. University for Man needed a larger facility, so it bought Straube, took out a loan and started ripping down walls, rebuilding stairs, patching holes and plastering to meet the code.

"The new place (Straube) used to house 40 people so it's much bigger," Jean Goldman, crafts organizer said. "The Fone and Drug Education Center have more room in the new place. They used to be cramped into a tiny room with one little desk."

Change is often caused by the need for expansion. The new Stone House Child Care Center was created out of a similar need.

Before moving, Family and Child Development only had two labs and could not train enough students.

"For the past three years, we have been trying to find ways to solve the problems ... the present conditions make it impossible to meet the needs of the students," John Chalmers, vice-president for academic affairs, said. "We had trouble getting teachers placed because of a lack of experience."

A two story, 100-year-old house was converted into the day center and opened in the fall.

"The day care center serves two purposes,"Lou West, director of the Stone House said. "It accomodates students in Family and Child Development without having to send them off-campus, and it helps parents who need all-day care."

West said the plastering and painting has yet to be completed.

"We incorporate these repairs into a learning exercise

for the kids," she said.

Not far from the Stone House, another change was seen on campus. Instead of renovating an old building, K-State opted to build.

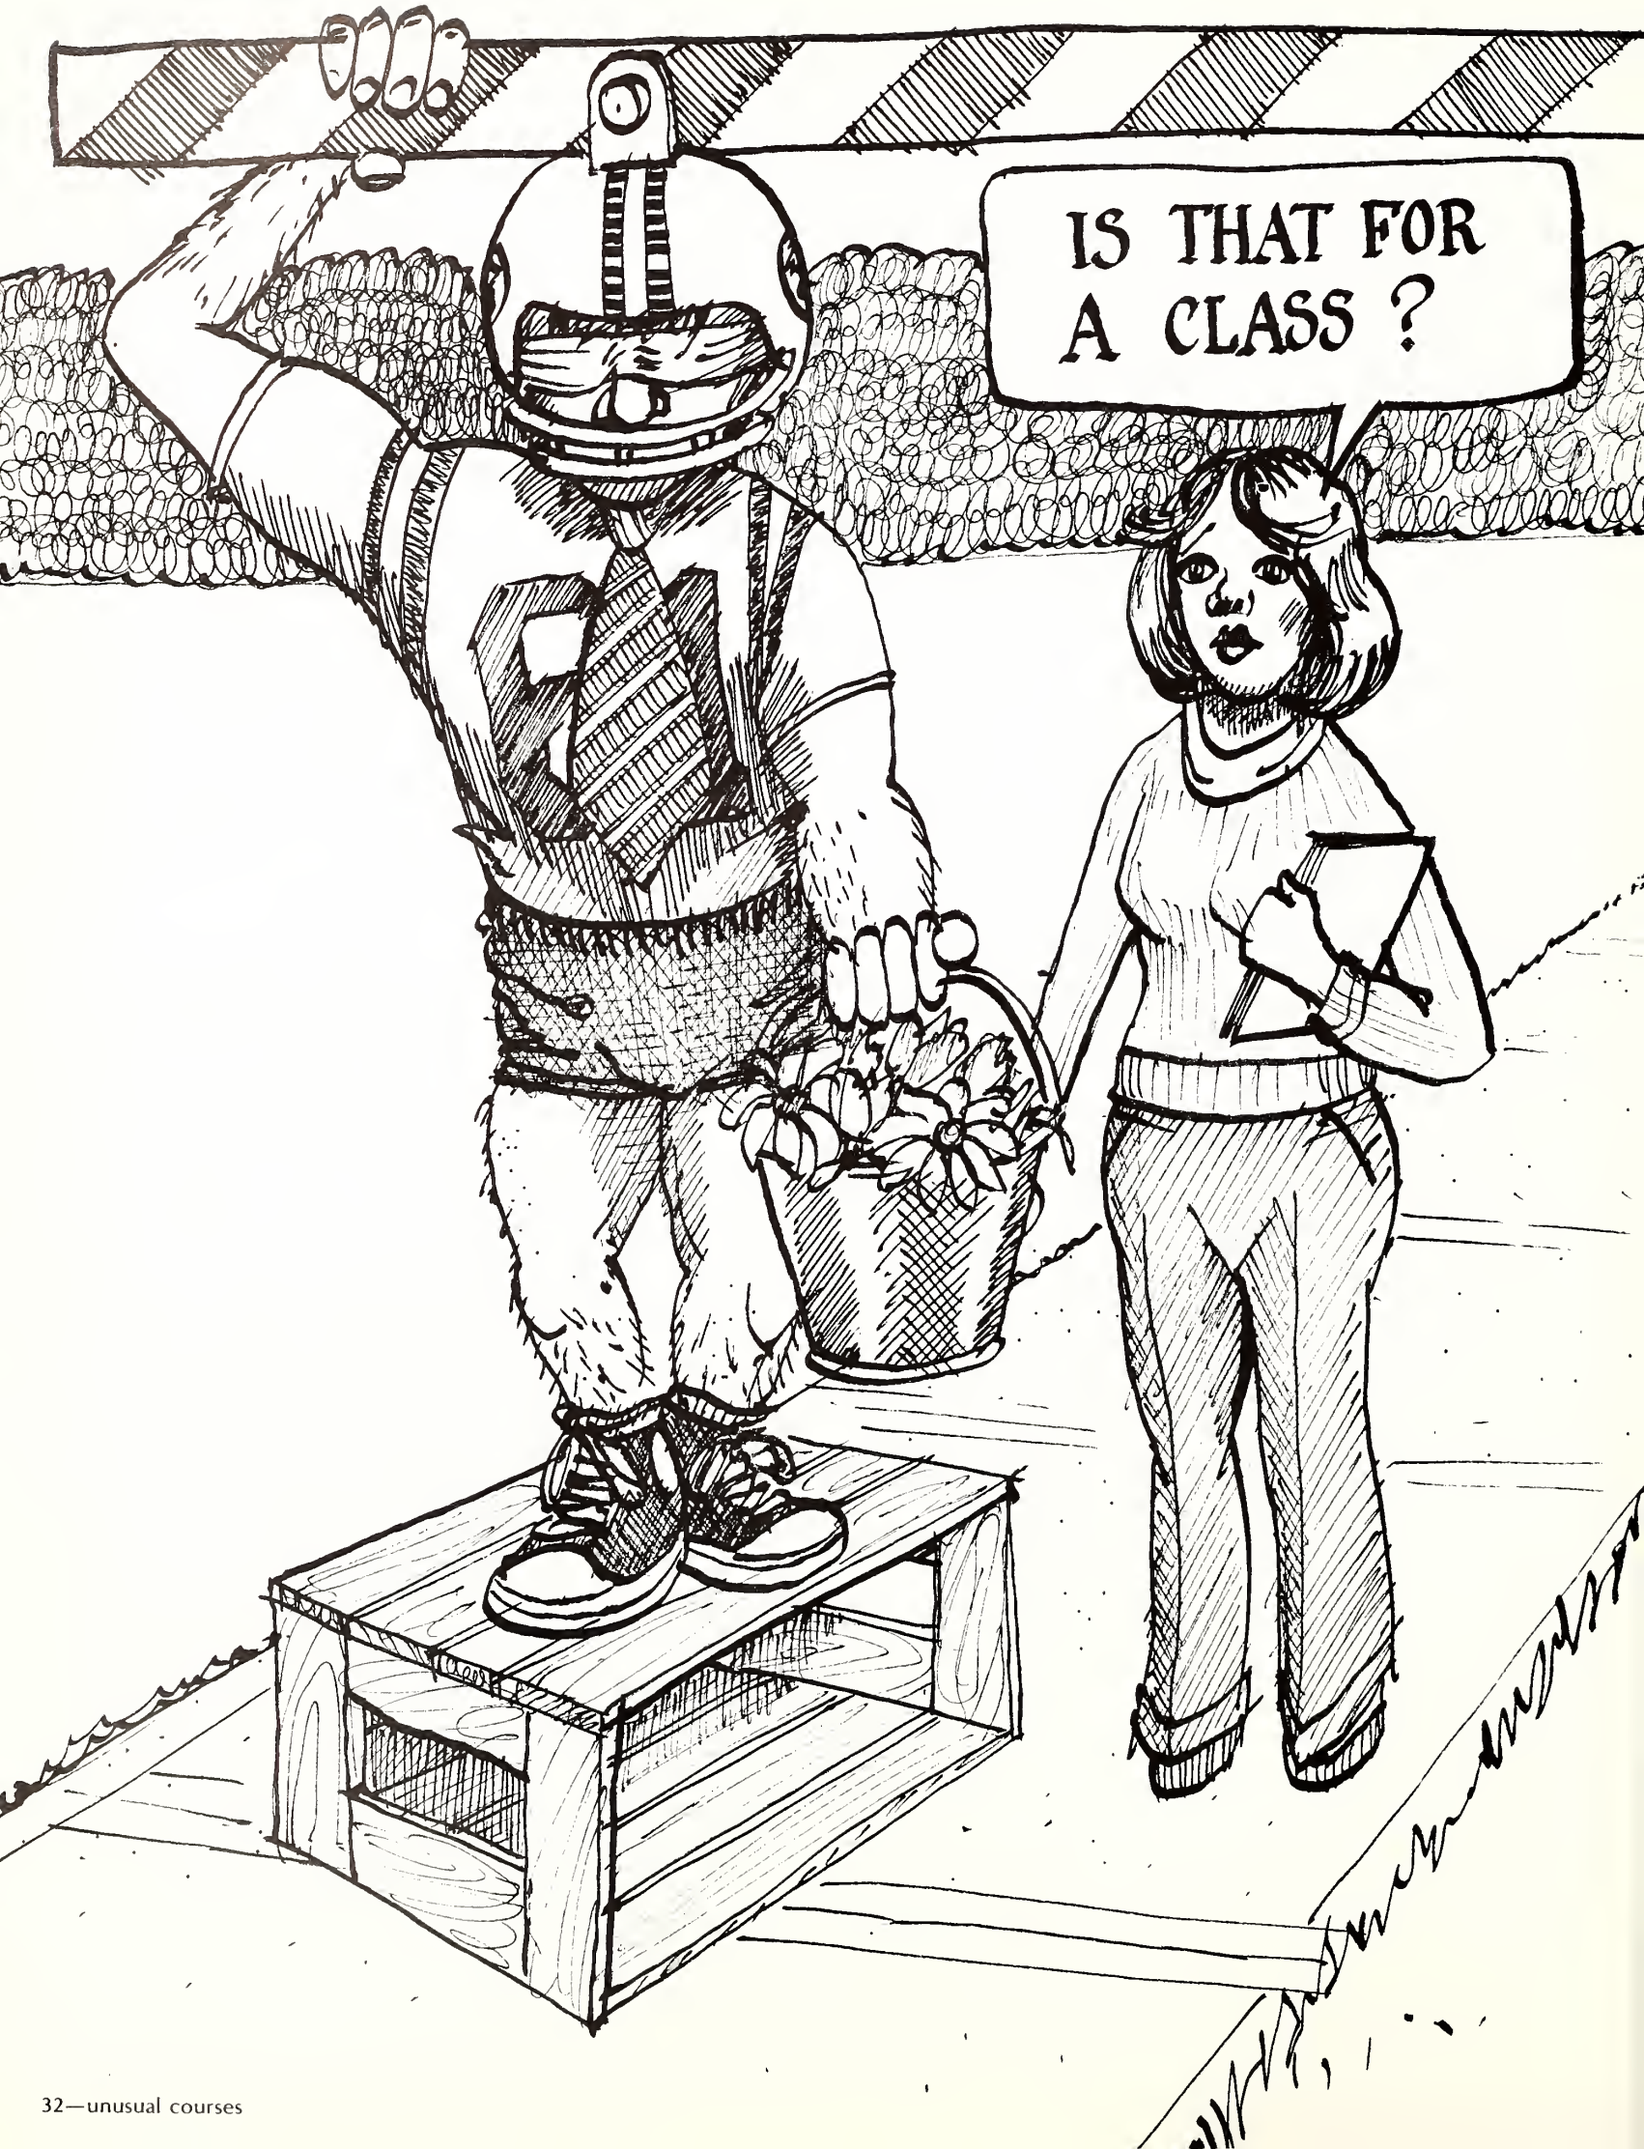
The International Student Center, housing for the Foreign Student Office as well as a gathering place for foreign students, is located west of Moore Hall in the Quinlan gardens.

The center provides room for teas, conferences, seminars and tutoring programs. Facilities include a lounge area, offices, assembly room, kitchen and dining room.

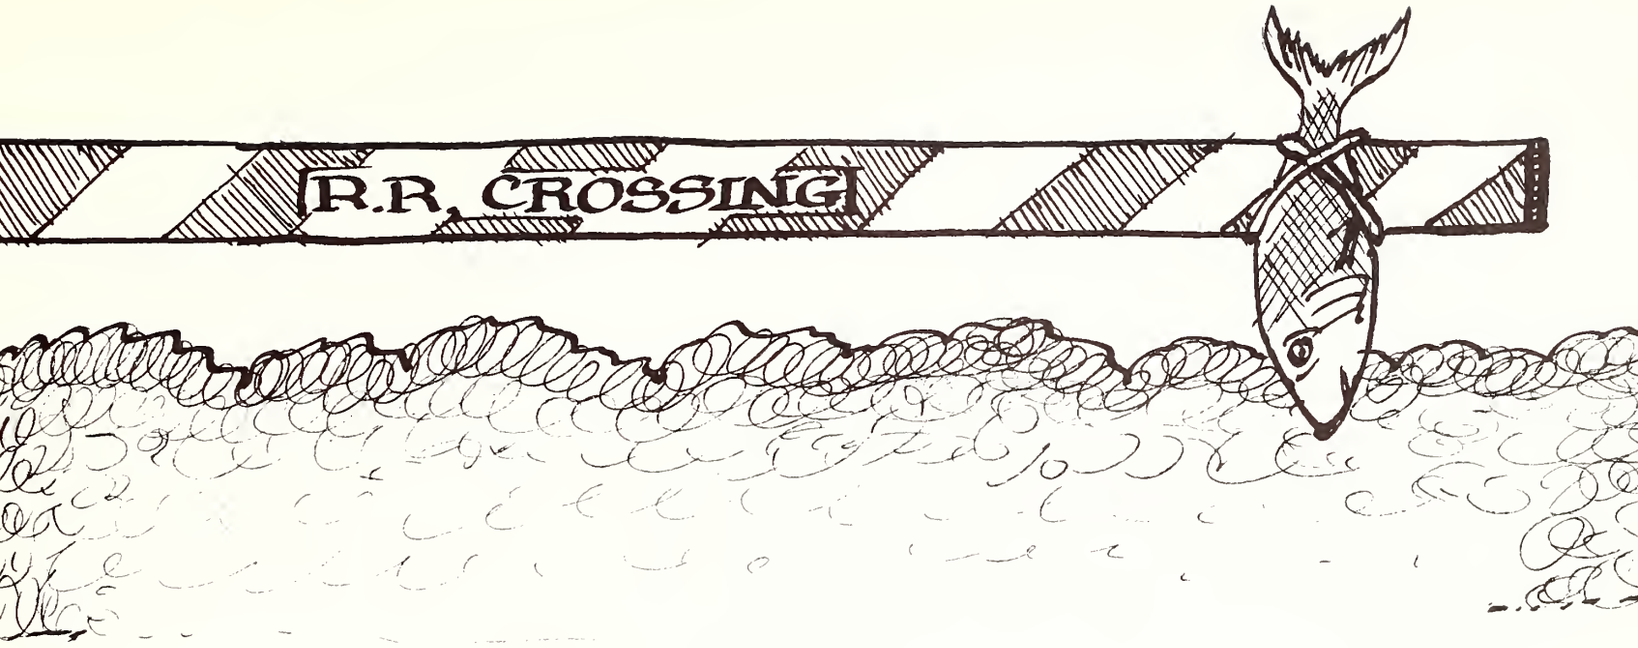
Another new building still in planning stages prompted another face-lifting operation.

The site chosen for a new education building was already occupied by the conservatory and rose gardens. The problem was "solved" by moving the gardens to a new foundation northwest of the dairy barns.

Memories remain etched in the mind forever. Despite changes made in the name of progress, many students won't forget the loss of Straube Scholarship House and the disappearance of the rose gardens.



IS THAT FOR A CLASS ?



Gourmet courses

By Mary Lou Ridder

Eeryone knows the guy who, on graduation day, boasts of filling every elective requirement with Intro to Psych., Intro. to Soc., Intro. to Poli. Sci. and other "usual" classes.

Many students fall into the rut of taking as many ordinary, well-established courses as possible, without ever delving into unusual courses offered at K-State.

For students on a Colorado kick, K-State's Department of Speech and Theater offers a summer extension course combining love of theatre with love of Colorado scenery for six hours credit. Several K-State students and faculty members worked last summer in the Pine Cone Theatre, a small community company nestled in Grand Lake.

"My favorite show was 'Carnival.' It's a musical and the set was so colorful and bright," Bruce Bardwell, junior in speech, said. "It was really fun to perform."

Theatre is only the beginning of what K-State has to offer.

You and Your Sexuality, offered by the Department of Family and Child Development, deals with all aspects of sexuality in present-day society.

"The class teaches you all the physical and emotional aspects of sex. It's a good class and I'm learning a lot," one student said.

"It really teaches you things you always wanted to know about sex but were afraid to ask," she added with a snicker.

Some insist that science is the only worthwhile subject to pursue. For these students, the Department of Physics offers two classes on holography.

Holography is a relatively new technique that "records three-dimensional information or images on film by using light inference," Charles Hathaway, instructor of the courses, said.

Hathaway sees a practical use of holography in advertising, journalism and communications, as well as in many other fields, he said.

"The company that makes Salem cigarettes is already using holograms for advertising at Grand Central Station. In communications, holography will probably be used for information storage, because it will be more efficient in terms of volume of material stored than microfilm," Hathaway said. "It's particularly useful in the storage of pictures."

After working on 3-D pictures all night, it could be very difficult to get up for class the next morning. Imagine laying in bed listening to class on the radio.

Introduction to Symphonic Music is offered through the Division of Continuing Education. Participants can earn up to three hours of credit by listening to broadcasts of "Music for the Masters" on radio station KSAC or KSDB. Printed materials accompanying the broadcasts are included in a home-study packet.

After spending the summer in Colorado at mom's and dad's expense, experimenting with all that was taught in You and Your Sexuality, producing pornographic holograms or restricting your schedule to one three-hour radio course, knowledge about will-writing may be useful. After all, parents are not usually thrilled about these types of course utilization — who knows what extremes they might resort to?

Wills and other aspects of death are discussed in Death and the Family, taught by Joan McNeil, instructor in the Department of Family and Child Development.

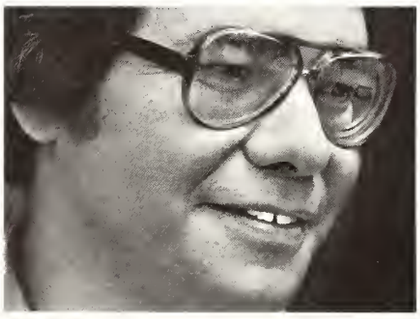
These are only a few of an enormous array of unusual courses. Unfortunately, students dig ruts, never tasting the obscure. Universities are similar to fast food chains—fill the order for a full transcript and get the customer out, satisfaction guaranteed with humdrum everyday predestined schedules.

Luckily, unusual courses can offer relief from this bland diet.

readingwritingandresearch

As discoveries and breakthroughs are presented to the public for inspection and acceptance, little is said about the tedious research behind such results.

At K-State, faculty members in all types of departments are contributing to the world of research simultaneously as they teach. Many are authors; some are pure scientists. But all contributions carry significant impact to both university and non-university persons.



With students in mind, Keith Purcell compared notes with a former K-State colleague to write a textbook for his chemistry class. The book, entitled "Inorganic Chemistry," is described by Purcell as "teaching-oriented."

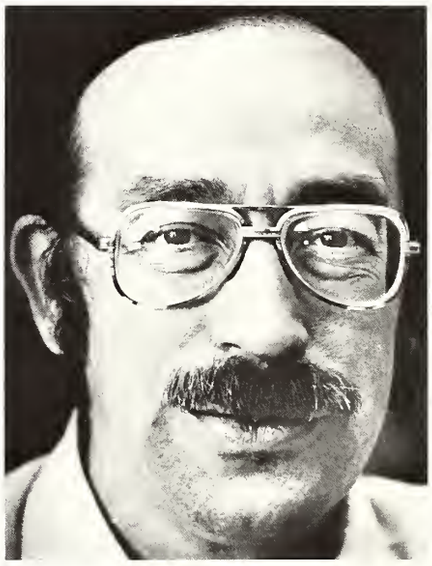
Purcell had seen frustrated students taking his course who "simply developed an attitude of survival." The text is geared to ease such tension. It serves as general reference as well as a text.

An internationally known authority in the history of Christianity, Dr. Robert D. Linder, has contributed to a widely acclaimed book entitled, "The Evangelicals: What They Believe, Who They Are, Where They are Changing,"originally published in 1975.

Now revised and in a paperback form, the book may be used at universities and theological seminaries, Linder said.

Linder's contribution to the book deals with an historical survey of the 50 years in which evangelical Christians recovered concern for social ministry.

Linder has also made important contributions to a new religious volume "Eerdman's Handbook to History of Christianity," serving as the American consulting editor. This book is not intended for scholars but for the general public, Linder said.



"This is something I have advocated for years. Too many historians spend all of their time writing detailed monographs in highly specialized jargon on relatively obscure topics," he said.

Janet Benson, assistant professor of anthropology, spent a year in India on a research fellowship.

Sponsored by the American Institute of Indian Studies, Benson studied traditional village life in Andhra Pradesh, India. She talked with citizens there, discussing people, changes in administration and land tenure.

Benson was appointed director of the K-State South Asian Center upon her return.

readingwritingandresearch

"I wanted to appeal to the ordinary, intelligent person," said Helen Williams, poet and professor of English.

Williams, who died of cancer in October, wrote and published two volumes of poetry, "Soundings" and "Suprise Lilies." She described them as "poetry that isn't so highly intellectual and experimental that it can only be understood by poets or the literary circle."

"Soundings" is a collection of poetry in traditional form, dealing with nature and personal relationships. "Suprise Lilies" leans on a more religious theme and deals with death and loss.

"The whole book is about the mystery of the way grace comes when we least expect it and on its own terms, often from an unlikely-looking stalk,"Williams said.

Development of high-protein corn germ flour by a K-State grain scientist is a "significant new source of protein" with "far-reaching benefits for improving world nutrition."

These were the comments praising the research of Cho C. Tsen, by the judges of the 1977 Putnam Food Processing Award.

"Potentially, corn germ production could reach as high as 40 million tons (per year). Its impact as a supplier of high-protein food for the world makes research of corn flour very attractive," Tsen said.

Tsen and other researchers determined a means to refine the germ by extracting corn oil and grinding it to flour consistency. The scientists received top honors for their discovery.

In the heat of summer, steel workers can keep their cool with a product developed by two K-State professors.

Stephan Konz and C. L. Hwang have created an ice vest to cool the body in overheated conditions. The garment contains four large pockets for blocks of dry ice (frozen carbon dioxide). Fully loaded, the vest will cool a person for four hours.

"It's not feasible to air condition a steel mill because the process puts heat into the air very rapidly," Konz said.

Research is a continuing process. Each discovery breeds a hundred new questions.

Even as these professors are applauded for their achievements, exploration continues. Though their fields are diverse, they share support for this concept of perpetual research.

Got a minute? Get an "A"

by Pam Grout

Sooner or later, nearly every student succumbs to the urge to take pud classes. It is that pervading drive for a high G.P.A. that encourages students to give up high ideals, Shakespeare, and Organic Chemistry to enroll in Music Listening Lab and Theater Appreciation.

Called everything from pud to easy-A, these classes are as familiar to K-Staters as study hall is to their junior high counterparts. They're classes guaranteeing an "A" to anyone showing up each time.

Like study halls in days gone by, pud classes provide students with ample time to catch up on forgotten composition themes to time-consuming algebra problems. Many a student is shockingly aroused from a peaceful sleep when the instructor pipes up the grand finale of clashing cymbals and beating of drums.

Whether looking for a place to eat or sleep, an easy grade, or the only study climate on campus, Theater Appreciation and Music Listening Lab continue to appeal to students.

"I'd say half the student body at K-State some time or another takes Theater Appreciation," Carl Hinrichs, instructor of the course, said.

Advisors are notorious for signing up unsuspecting freshmen. What better place for a student majoring in general who panics at the mention of math or science?

If the two courses aren't recommended to freshmen during one of their rookie semesters, the campus grapevine soon convinces them that pud classes are where it's at.

Despite the reputation of pud classes, some students sincerely desire to appreciate theater or music.

"I was interested in music in high school and didn't want to lose that interest up here at college," a freshman music listener said.

"There is a purpose for these introductory courses," Marjorie Adams, English professor, said. "It's a painless way to introduce students to theater and music. Students naturally aren't going to take classes when they know nothing about the subject. This gives them the chance to learn about something they wouldn't ordinarily take."

To get credit for attending the various performances, students turn in a one page questionnaire-evaluation.

"Comments vary. Some students seem genuinely enthusiastic. Other comments are 'What in the world am I doing here?'" Hinrichs said.

"But even as easy as the course is, students still try to finagle their way out," he added.

But for those completing the requirements, Theater Appreciation and Music Listending Lab become integral parts of the G.P.A. Pud classes are fast becoming as much a tradition at K-State as basketball or Vern's.

Attention K-State shoppers:

take advantage of our green light special . . .

by Julie Doll

Pud classes are not the cause of intellectual demise, but an indication that more and more students are attending college for degrees rather than education.

Emphasis is not placed on learning but on benefits of a college degree. Students are primarily concerned with finding a job, not education for the sake of education.

Clinging to out-dated figures correlating increased income with college education, students expect degrees to buy better jobs. However, recent studies show many blue-collar laborers earning incomes equal to or greater than incomes earned by college graduates.

But pud classes are considered essential for the student hurrying towards a diploma. In one short semester, you can buy an A by writing your name and a short comment once or twice a week, thereby providing more time for required courses.

The most popular bargains in town are Appreciation of Theater and Music Listening Lab, but the well-versed student can find others, such as a poetry class in the English department citing attendance as its basic requirement, or a food class in the College of Home Economics requiring a junior high level of knowledge.

Not only do puds serve as easy hours, but they also do wonders for many a student's grade point average.

Fanatical concern with GPAs doesn't pop into consciousness with college — it is born in elementary school and nurtured throughout high school.

In elementary school, peer competition and parental leverage generate good grades. College admittance and scholarship opportunities motivate many high school students.

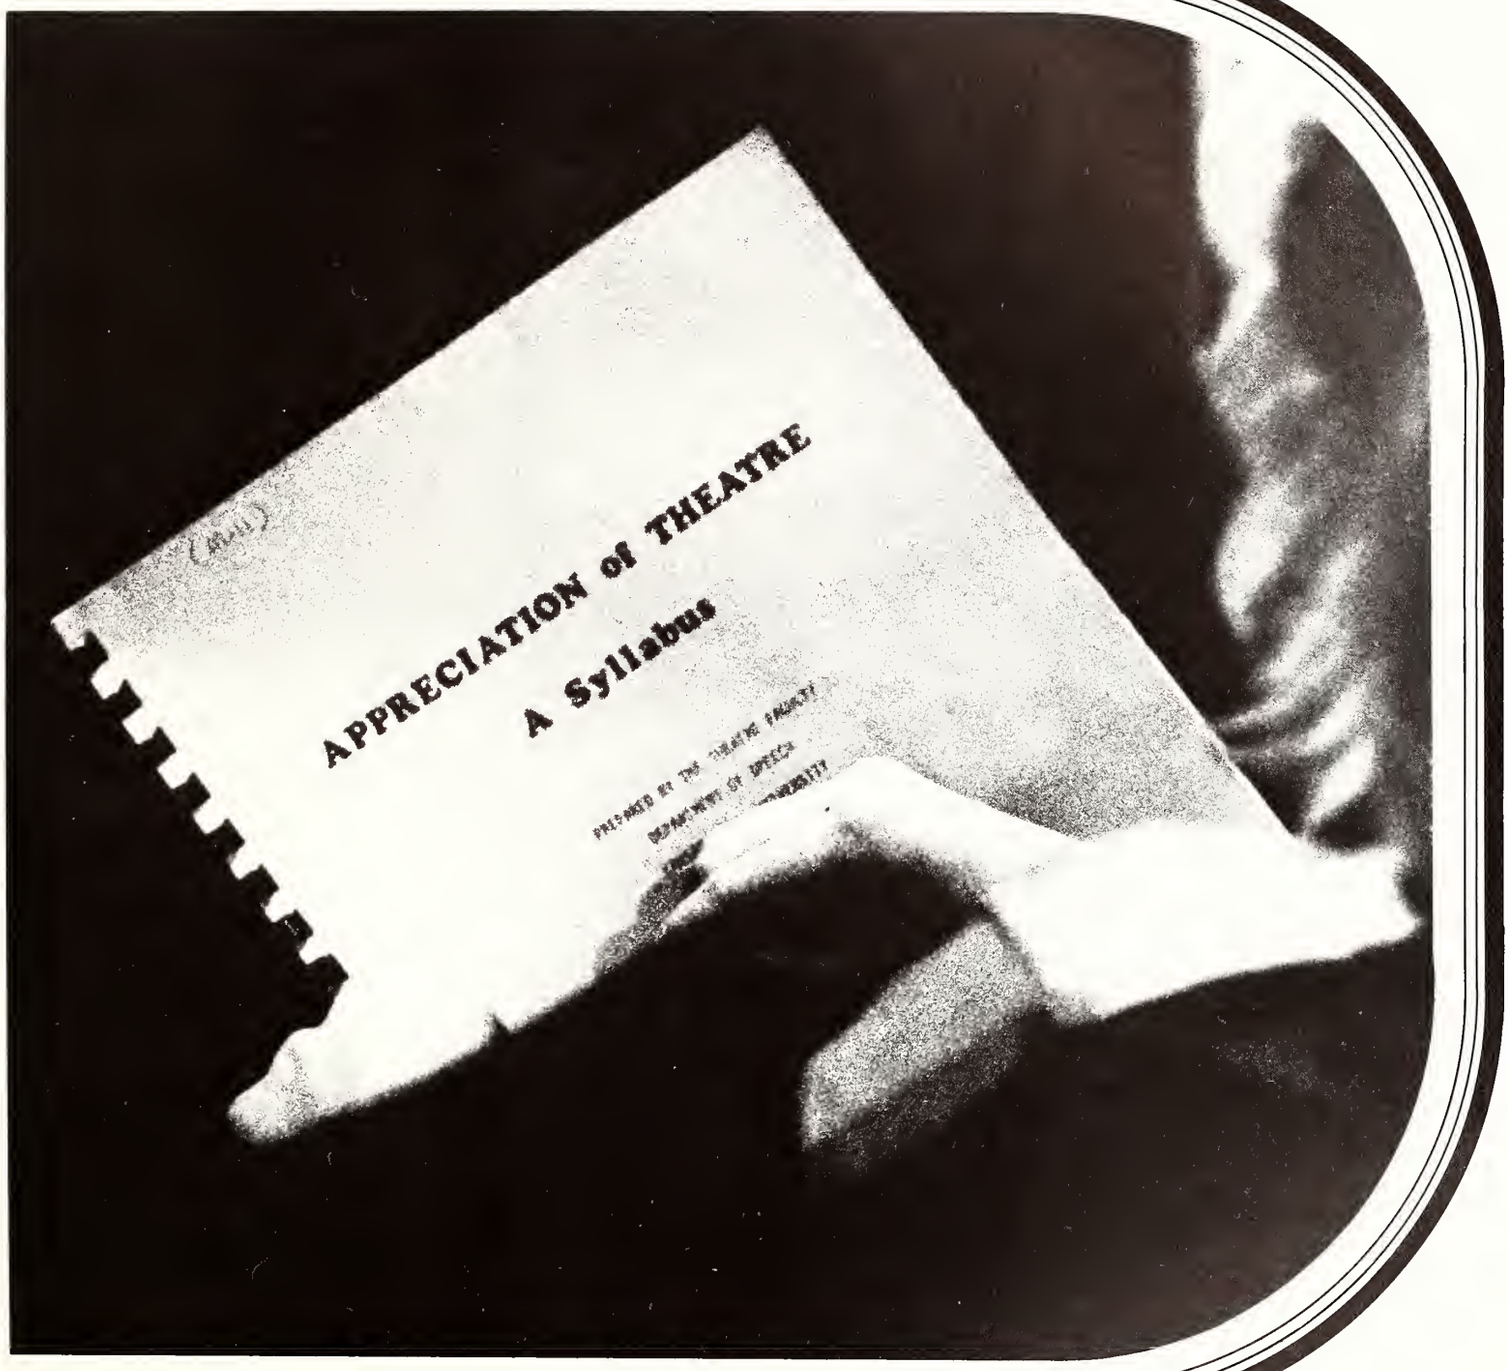
High schools share in the demise of intellectualism. Students attempt to "just get by" utilizing study halls, recreational reading classes and serving as student aids, all for credit.

Activities of students in high school study halls and college bargain courses are similar. One difference between the two is that no student fails study hall. Surprisingly, twenty students fail Theater Appreciation each semester.

The demise of intellectualism is not only reflected in the success of the bargain course, but in other realms as well.

Credit-no credit was created to provide students with opportunity to broaden fields of study. However, many students use credit-no credit to avoid studying for class, sliding by with a D.

If that doesn't seem easy enough, wait around. There's always hope for A-credit-no credit. If you earn an A — good news for your GPA; if not, no harm done.



APPRECIATION of THEATRE

Hup, two, three, four . . .

by Julie Doll

Friendliness is a traditional K-State attribute. Many 1977 spring graduates, however, thought their last day at K-State was anything but friendly.

Reference was to graduation ceremonies May 20. A record 4,029 students graduated in the spring and summer with 2,778 bachelor's degrees, 931 master's, 229 doctorates and 91 Doctor's of Veterinary Medicine awarded.

While administrators were pleased with numbers, the graduates labeled spring ceremonies "anti-climactic," and "crummy."

"The importance of graduation didn't hit me at the time," Mark Cross, horticulture, said. It wasn't until after the summer was over and everyone was going back to school that I realized college was over. The graduation ceremony seemed an anti-climactic way to end it all."

"It (graduation) was pretty crummy," Broc Sears, fine arts, said. "It was the last time I could be together with all my friends and that made it sort of neat, but the ceremony wasn't anything special."

The exercises were in complete contrast with the informal, friendly atmosphere graduates had enjoyed as K-State students.

"It (graduation) wasn't really worth it," Jane O'Neil, animal science and industry, said. "They announced the College of Agriculture and everybody stood up; then we were all herded down there like cattle to shake somebody's hand. It was mass confusion."

There was also a matter of cost. Caps and gowns ranged from $8.50 for a bachelor's to $14 for a DVM. Ten ivory-colored graduation announcements cost $2.50. More elaborate purple announcements were $1 a piece. Add postage to the price and the cost rose.

Summer graduates had a more friendly and less expensive experience. An informal reception, hosted by President Duane Acker and his wife, was given for the graduates and their families.

A first at K-State, the reception featured addresses by Acker and Student Body President Terry Matlack.

"I heard a lot of favorable comments from the faculty, the administrators, and the students themselves," Matlack said.

Matlack termed the turn-out for the July 28 reception as "good", with most of those attending being "graduates receiving higher degrees" (teachers earning their master's during the summer).

Those attending the reception were impressed with the personalized atmosphere.

"I really enjoyed the reception because it was relaxed and informal," Gary Olds, business administration said. "I got to see my professors in a relaxed atmosphere, and meeting the president was super."

Kenneth Fox, professor in the College of Business Administration, also enjoyed the reception.

"I thought the reception was a very nice affair. I enjoyed being with the other faculty members and the students, " Fox said.

Fox, however, did not think the turn-out was good. "Unfortunately, we don't have that much participation in the spring or summer ceremonies . . . I do think the summer reception is something that could be more popular."

Consensus dictates a more personal experience, but no solutions are in sight.

Some of the problems are apparent. There are not enough facilities to hold separate exercise for each college. Also, Acker would not be able to attend eight or more ceremonies.

Fox pointed out a more complex problem.

"Graduation is a busy time of year for everyone. Students are still taking their finals, others are meeting relatives and some are moving home or to their new job. If there were separate exercises, getting everyone (graduates and relatives) to the right place at the right time could pose quite a problem," Fox said.

Although the summer reception was viewed a success, nothing insures that a similar affair for spring graduates would work. The large number of spring graduates does not allow for the informal reception of the summer.

But administrators, faculty members and students continue to look for a more personal alternative to the traditional K-State spring graduation ceremony.

Features

But mom, it's only a T-shirt!

by Ronn Smith

People are getting things off their minds by putting them on their chests — in the form of printed T-shirts.

In an earlier time, white "unmentionables" were worn only under clothing — heaven forbid T-shirts be hung to dry in full view of the public.

During World War II, they were called skivvy shirts and were regulation issue for U.S. sailors. T-shirts first became popular with the public in 1947, after Marlon Brando wore one in "A Streetcar Named Desire."

The all-white T-shirt remained popular throughout the 50s, inscribed only with the stenciled name of the owner.

Then came the anti-establishment, color-fast, drip-dry, miracle-fabric days of the 60s and the "say-it-with-a-slogan" T-shirt.

The evolution continued, and the 70s T-shirts became indicative of the owner's wit, desires, concerns, opinions or tastes.

Today, one need only walk across the K-State campus to see the impact of this evolution.

"WILDCATS MAKE BETTER LOVERS," claims one T-shirt belonging to a co-ed walking through the Union.

"DO IT WITH AN ARCHITECT," suggests the T-shirt of a young man in a Seaton studio.

"EMERSON, LAKE and PALMER," is the message of another shirt advertising the rock group.

Why do people wear printed T-shirts?

"Partially because of the informal look that's so popular today," Margaret Ordonez, instructor in clothing, textiles and interior design, said. "Also because T-shirts are an inexpensive way to express oneself — much less expensive than a house or a car."

Another virtue is quick identification of group membership. At a glance, you can tell a frat rat from a dormie from a club member by a T-shirt.

"T-shirts are sort of a status symbol," Dick Harris, asst. professor of psychology, said. "They help a person identify with a group, and gain a sense of security from this belonging."

Whatever the reason, T-Shirt popularity continues to increase. Department, discount, sporting goods and even grocery stores are in the T-shirt business.

"We sell quite a few T-shirts," Myron Carpenter, asst. manager of Ballard's Sporting Goods, said. "In fact, we sell about 300 a month. We make shirts with either heat transfers or silk screening. Silk screening is most popular — people can bring in their own personalized designs."

Curiously, much T-shirt "personalization" today is via Farrah Fawcett-Majors photos, K-State Wildcat transfers or the familiar Coors logo. In the effort to be unique, people have slipped into the vogue of conformity.

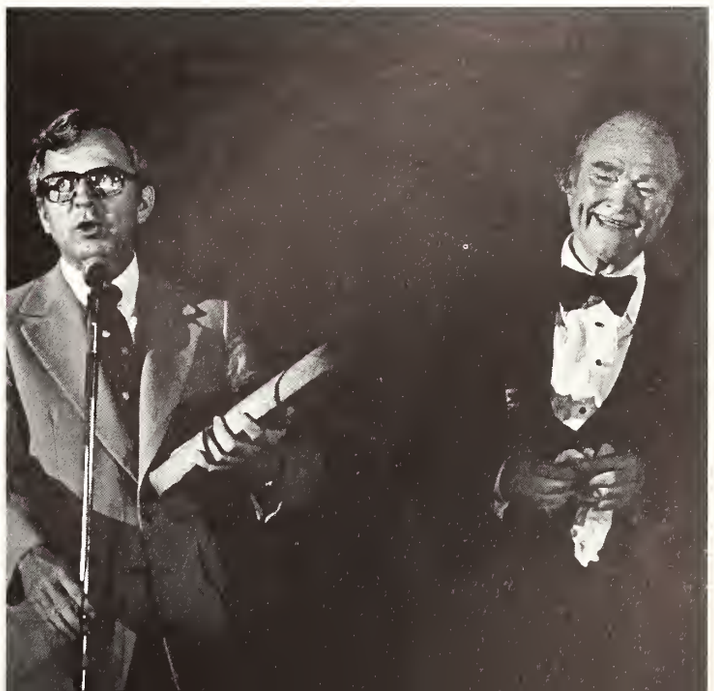
"Goodnight and may God bless."

by Kathy Huffman

Curtain call
minus curtain,
impromptu skit
on cement curbing stage,
let the show begin
all week



"I love mom and dad" boasted stickers at the annual Parent's Day festivities sponsored by Chimes, a junior honorary.

About 26,000 fans witnessed the 18 to 10 loss to Florida State. Red Skelton made a special half-time appearance, riding onto the field in a golf cart with Willie Wildcat, as the Pride of Wildcat Land marching band played "Send in the Clowns."

In a short speech, Red described his week at K-State as "one of the highlights of my life."

This was Red's first college appearance. He spent the week guest lecturing and signing autographs.

In a press conference, Red said that people in the Midwest are more polite than in other regions.

"Every place you go, people are the same but the cadence is different. Here people are basically shy and friendly," Red said.

The crowd rose to its feet Saturday night as Red took the stage.

Laughter rippled through the audience in expectation of Skelton's famous seagull characters, Gertrude and Heathcliff. Heathcliff's "this one's on the house" as Skelton's gulls flew over the capitol building brought roars of laughter.

Skelton also shared his unusual philosophies.

"I look in the obituaries every morning. If I don't see my name, I get up."

A less serious one was: "Ears should have been under the arms. It would keep them warm in the winter."

Pantomime was choreographed to music Red composed. He climbed the Eiffel tower, rode a horse, built a snowman and sewed on a button, so clearly every detail could be visualized.

Several times during the two-hour performance, Red asked if the audience was getting tired. In spite of the stifling heat, the audience encouraged him to continue.

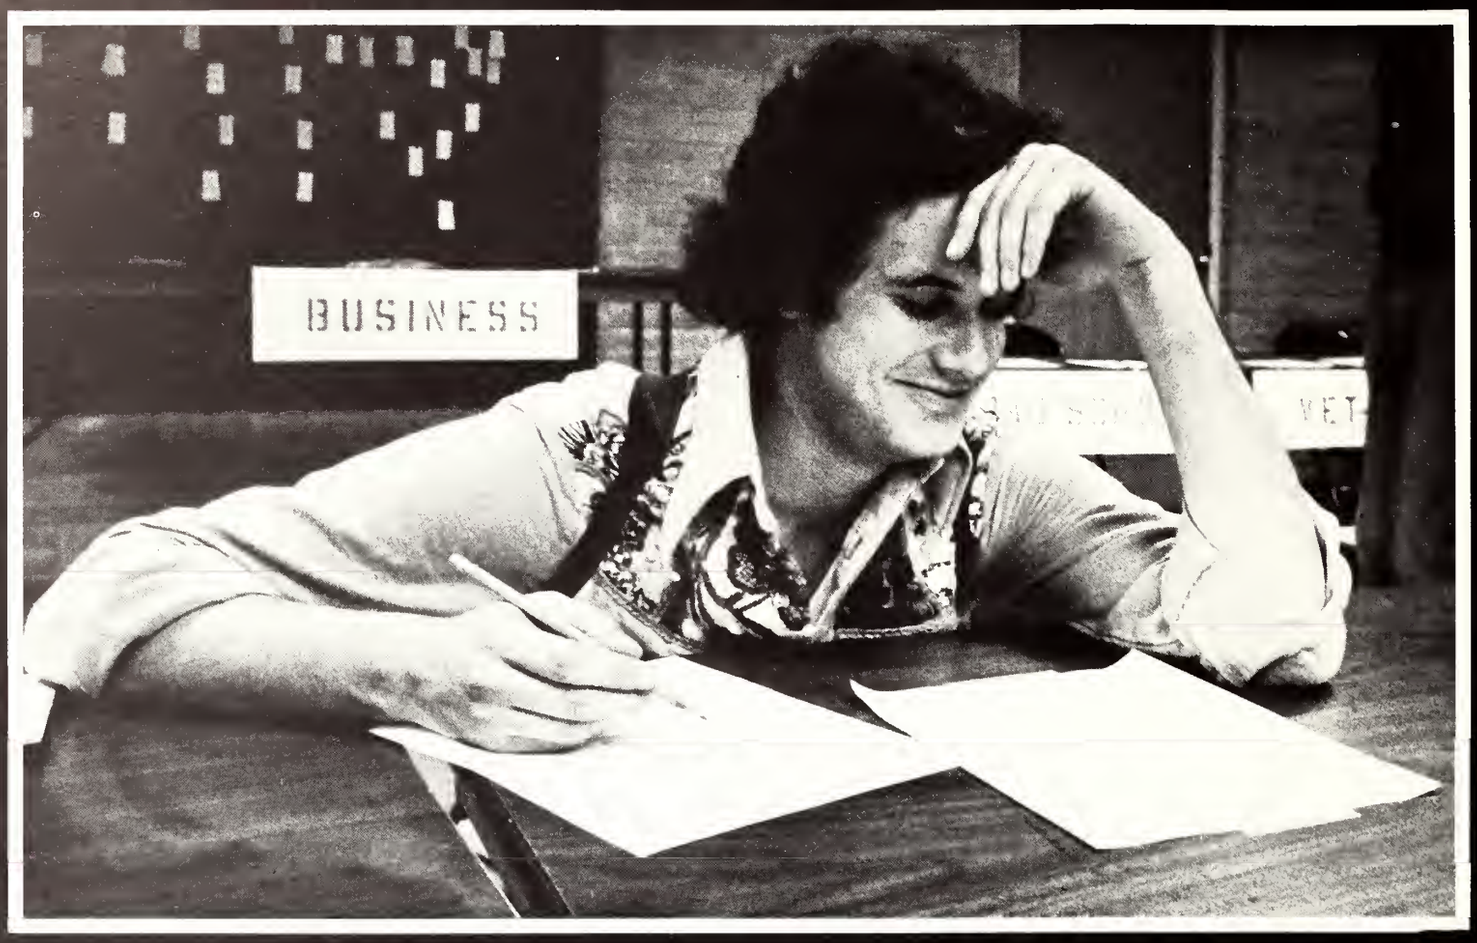
"You might just as well stay in here. Some drunk will run you down out there," Red said.

In a sad voice, he said he missed coming into homes via TV on Tuesday evenings, but until sex and violence were gone, he wasn't needed.

"If they want me to come back, I'd be very happy to," Red said, bringing the cheering crowd to it's feet.

"You are the only family I've ever known," said a serious, almost lonely Red.

The ageless clown left the stage with his traditional closing: "Goodnight and may God bless."



BUSINESS

ARTS-SCI

Governing board or governing bored?

by Debbie Rhein

The answer to that question can be decided only after examination of the problems involved. First some background:

Senate controls the allocation of about $750,000 every year. This money comes from the $24.25 activity fee that all full-time students pay each semester. Senate uses this money to fund approximately 135 organizations, ranging from the parchute club to this yearbook. There is no escaping some kind of service sponsored by student senate.

Senate's power to allocate the money goes back to the 60s.

"We feel that the recipient of the services should have some say in how the money is spent. We have found that the student body is the best guide," vice-president for student affairs, Chet Peters, said.

Student input. That sums up the administration's position.

But there are problems. Lack of experience with political processes is probably the biggest one in senate.

"Part of the problem is that you have a transient government," Bosco said. "Most of the senators will not be in the political arena all of their lives. Most of them won't even be in it all the time they are in school. By the time they've learned something, many will leave." He explained that he spends less time helping senators govern than he spends teaching them group process skills.

Because senate has less than a year to work on problems, there is a built-in inability to cope with long range issues.

"It is natural for senate to pick the problems that they can solve because the university has gotten too large. It is no longer possible for student senate to take credit for any one project," Bosco said. "The time has come for senators to realize that it is not necessarily a bad thing for student government to lack a long list of accomplishments. It is a case where the process is more important than the product."

Senate demands more of the senators' time than many are able to give.

"You have to put in a minimum of five hours a week. It usually runs more like 10 hours. School takes up a lot of time, and putting in the hours on committee or in a meeting is a real sacrifice for a lot of students," Cindy Thomas, student senate chairperson, said. "If I could change anything, I would give senators more time to spend on senate."

Aside from senate's inner struggles, problems it faces in the student community affect operations. Student apathy concerning student senatorial candidates affects the quality of the senators chosen.

"Senate will be as good as the students voting for the body," Thomas said. "If students don't show a concern for who they vote for, the body won't be as good a group as it would if students participated more actively in it."

Lack of meaningful communication between senators and students contributes to senate's image as a clique rather than a governing group. If communication were improved, students might develop more of an interest in senate's affairs.

"Off-campus students feel that they are pretty much out of it (student government). They don't have contact with their senators," Brad Henson, agriculture senator, said. "I think that reapportionment might help students get more interested in student government in all areas. (Senators are currently elected to represent their respective colleges. Some senators have suggested living group representation, but no action has been taken.)"

To counterbalance senate's problems, consider this: it is one place debates from the students' viewpoint are expected to occur. And more importantly, it is a consumer advocate applying leverage to administrators.

"This is where the students put pressure on the administration. If there was no student senate, there would be no student attorney, no Drug Education Center, and a letdown in information of what is going on," Thomas said.

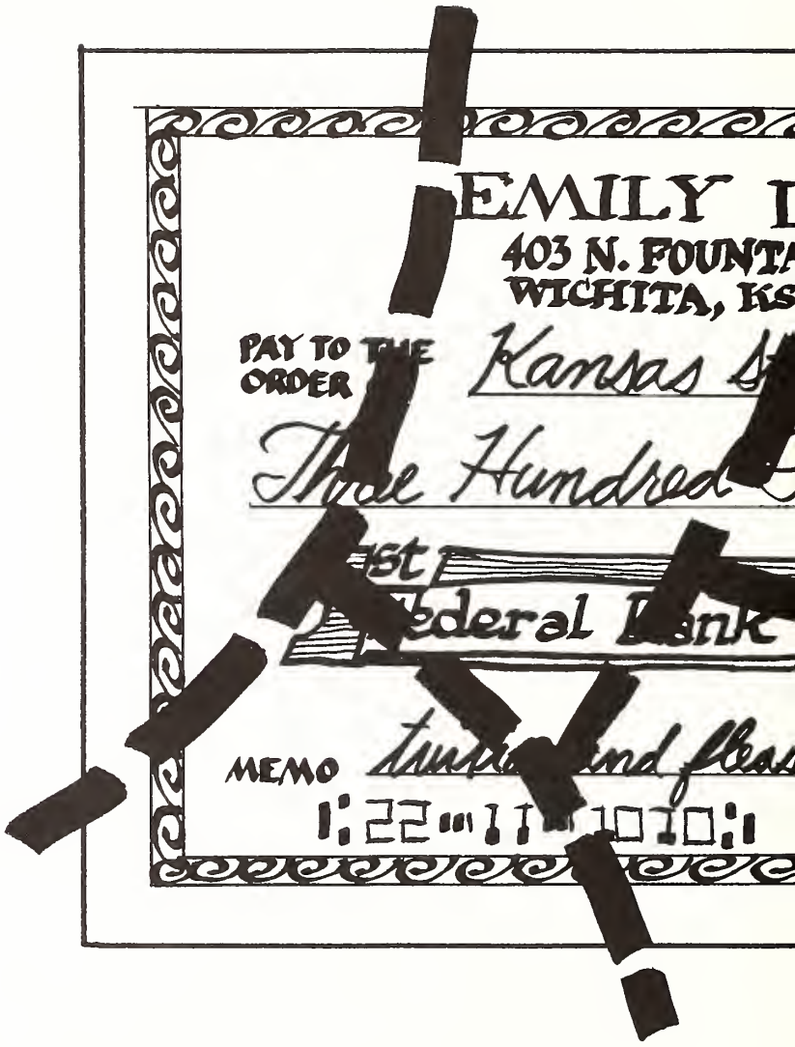
Senate is the sounding board where students debate issues from the students' perspective.

"It is important for someone to take the opposing view. Students can't trust administrators to take that view and look after their needs," Thomas said. "Some of the administrators are sympathetic, but they are too far removed from the everyday problems of being a student."

Limited experience in governing, inability to affect long range problems, and time limitations weaken senate's power.

No, the system isn't perfect. Neither is senate. It is, with any luck, another group of people attempting to benefit K-State.

All feed up



by Pam Grout

Today's multiplying complexity and specialization deprive us of control over many things. A century ago, when life was simpler, we knew what was wrong when our wagons broke down, we knew the reputation of the shopkeepers we patronized and we recognized the ingredients in the bread we baked.

In a technological society, we depend on experts for everything — to repair our cars, check our teeth and educate our children.

College tuition, too, is something over which we exercise little control. We depend on a few administrators and student senators to make these decisions for us. As many as two-thirds of the students waive rights to determine allocation by ignoring referendum elections.

Each year, student fees increase. Not only are the incidental fees ballooned by inflation, but new line items are added. Students are asked to chip in on a new service here and a new facility there.

In 1920, a mere $1 activity fee was assessed of each student for school dances. Today, a $120 charge over and above incidental fees is issued to each student.

Of the $345 every full-time student pays each semester at K-State, only $225 of it is used for actual schooling. The rest, over one-third, goes for items like health care, bond payments voted for by students 17 years ago, and for a recreation complex okayed by a little over one-third of K-State students.

What exactly is included in the $345 package? According to the fee card, students pay for 1) incidental fees; 2) health services; 3) recreation complex; 4) first union annex bonds; 5) second union annex bonds; 6) stadium bonds; and finally 7) activity fees.

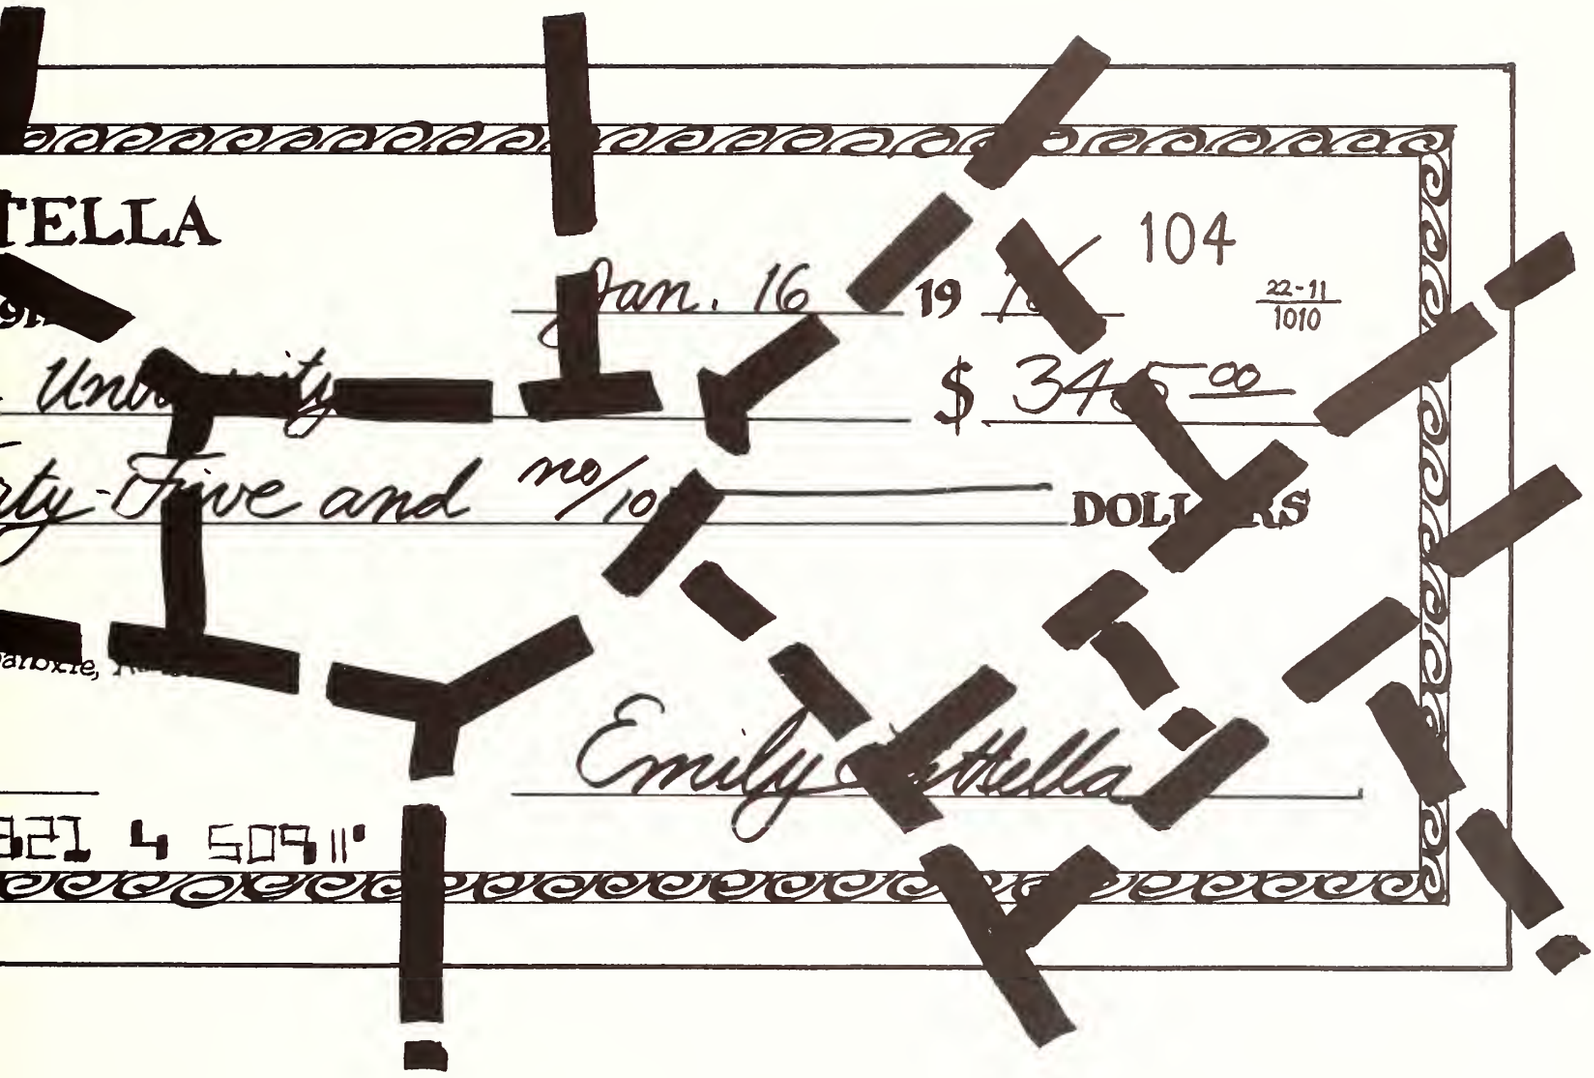
The $225 paid each semester in incidental fees is used for teachers' salaries, classroom equipment, lighting, heating and any other expenses accrued in educating the masses. It is fairly safe to assume that 100 percent of the students utilize these.

However, only 78 percent of the students use Lafene, a mandatory $74 deduction each year.

Those $37 per semester entitle students to a Health Maintenance Organization Plan. Pre-paid medicine provides students with free medical visits, discount lab work and hospitalization.

"Ideally, we like to break even. We allow now profit margin," Roger Birnbaum, Lafene's administrative assistant, said. "The $37 goes for everything from furniture in the center to doctors' salaries to a discount pharmacy."

Another $12 is whittled away each semester for the



recreation complex. This year, students are already paying off bonds for a recreation complex that hasn't been built. Payments for this complex will continue until the year 2001. An estimated two-thirds of the students use the existing facilities in Ahearn, but zero-thirds of the students paying today will ever use the new recreation complex.

The next chunk of tuition supports the Union. $2.25 is for payment of bonds for the first union annex; $10.25 is for the second union annex. Since a 1961 student vote, the $2.25 has been assessed each semester and will hold its place on the fee card until 1986.

The second annex bond, considerably higher, was issued in 1968 and will strip students of $10.25 each semester until 1993.

Next is the $4.25 collected for stadium bonds. The first $4.25 was collected in 1967 and won't be retired until 1987. Judging by ticket sales and recent football enthusiasm, it may be a long season before this is paid off.

The final $24.25 is labeled activity fee. Student Senate allocates this towards various and sundry line items.

According to Susan Angle, SGA financial advisor, line items from the activity fee are $12.50 for the K-State Student Union, $3 for student publications, $2.50 for recreation services, $1.60 for nine different college councils, $1.60 for Fine Arts council and $.25 for Associated Students of Kansas.

The remaining $2.80 per student is allocated each year by senate to more than 20 different organizations.

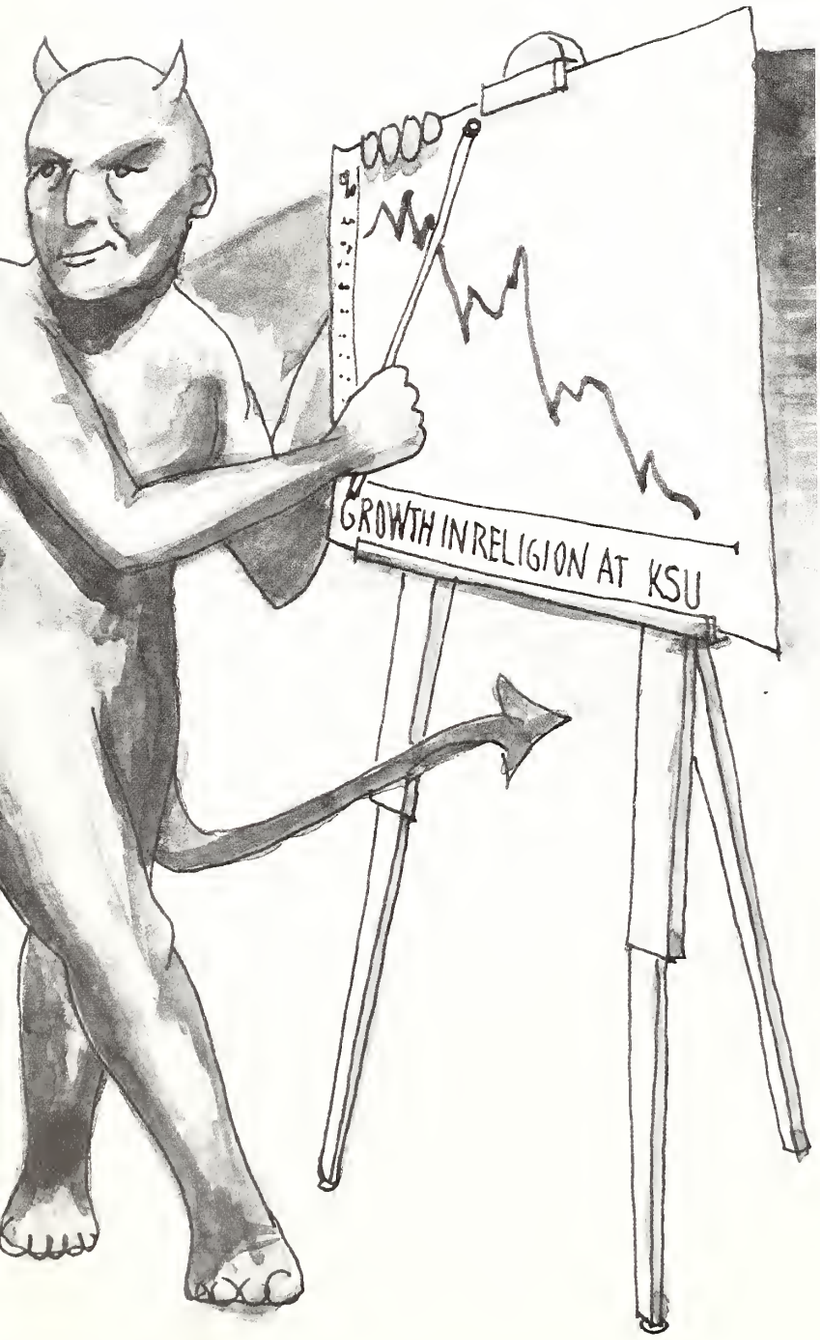
"These included UFM, Native American Indian Student Body, KSDB, Touchstone, Pregnancy Counciling, other social services and a number of other things," Angle said.

When you stop to think how few students utilize the weight room or MECHA, you may question the expenditure of $24.25 every semester.

But as an employe of the office of admissions and records said, it takes a lot of money to run a university. We pay for services we may not use, but it's like a democratic vote.

Not everyone will use the Consumer Relations Board. Not everyone will consult the students' lawyer. It's easy to overlook $4.25 here and $2.25 there, but multiply $120 forked over for these and similar benefits by eight semesters, and the figure is overwhelming. $920 seems quite a bill for such services.

Or is it? For that matter, how do decision-makers know what students want if voter turnout is only one-third of students enrolled at K-State?



Dear Michael,

I just thought of something: tomorrow is Ash Wednesday. I don't really know what that is, but isn't it close to Easter? I have a hard time keeping these holidays straight. I haven't been to church in quite a while, it seems. I always used to when I was at home, but it really is hard to get up that early, especially after a basketball game night.

I guess religious views are polarized on campus. That's the impression I get from talking to people about it.

Todd Nelson, a journalism major, said he only goes to church on Christmas.

"I don't think you have to go to church to be religious," he said. "The churches I've been related with just seem like a big farce. I can get more good out of sleeping in on Sunday."

He also seemed pretty upset about the group he calls "Jesus freaks."

"It seems like there's more and more of them all the time," he said. "It seems like they're ganging up on me, trying to get me.

"I'll be damned if they're gonna influence me," he said.

Todd told me he really didn't care what happens to religion in the future. He was pretty sure he wouldn't change his attitudes, "whatever happens."

I also talked to Mike Sanborn, another journalism major. He said he's Jewish by choice, but he doesn't attend church.

"I believe maybe there's some big entity, but I don't believe it was Jesus Christ," he said.

"I don't see much religion today," Mike told me.

But in spite of that, he said there will be an increase in interest in religion for the future.

"My generation coming up will probably be a stricter generation because of what they've been through (the religious movements)," he said.

Mike shared Todd's feelings about the "Jesus freak" group.

"I question the groups that try to sway the minds of little sheep," he said. "I think people have a right to choose."

Mike said that although this is supposedly a country of free choice of religion, it is too commercialized. But he said it is getting closer to the ideal.

After all this, one gets the impression that religion is pretty low on many totem poles around here. But I found another side to the story and, quite dramatically, it takes an exactly opposite stand.

Cathy Wirth, majoring in family and child development, is a member of Intervarsity Christian Fellowship and at-

tends various Bible study and prayer groups.

Cathy said they have a pretty large group attending their weekly meetings. She said they split into smaller groups for prayer meetings and Bible studies.

Scott Wible, a journalism major, said there are many groups like intervarsity on campus. He listed the Baptist Student Union, the Navigators and Campus Crusade for Christ. He said they are non-denominational and emphasize scripture memory.

"They're all great," he said. "There's no special advantage with one or another."

When I asked him what direction he thought religion on campus was headed, he said, "It's hard for me to be objective because my friends are all strong Christians and I am involved in it."

Scott said there has been an increased interest in some form of worship all over the campus.

"There has been an upsurge in Christian religion on campus, but there's also been an increase in other things like the occult," he said. "I don't like to dwell on these things because I don't believe in them."

Scott gave me the impression that he thought things were "looking up" for religion on campus.

"I don't know if what I'm observing is an increase in the number of people interested in Christ, but rather an increase in the intensity of interest of those who know Christ," he said.

Well, Michael, after studying these two obvious and opposite viewpoints, I've noticed that between the two poles here at K-State is a pretty good sized group that remains silent.

This group is characterized by the "average" student. His religious commitments are silent and personal. He doesn't want to be approached by the "Jesus freaks," but he makes an effort to attend church.

He believes in God, but doesn't talk about it much. His family may or may not be religious, but that doesn't matter now.

And, Michael, there seems to be another interesting phenomenon in campus religion: church attendance skyrockets before final week!

From this collection of thoughts on campus and world religion trends for 1978, it seems interest is increasing and the poles are pulling farther apart. I can't imagine what kind of result that will bring.

I'll see you at Easter. I'm ready for the break!

As always,
Susan

Safety first

by Ronn Smith

The K-State community has survived the past decade with only one major fire — the blaze which gutted Nichols Gymnasium in 1968. But the many small fires which have since occurred here, combined with recent disasters on other campuses, have brought a heightened sense of awareness, and in some cases solutions, to fire safety problems of the university and of organized living groups.

Most Greek organizations at K-State have made changes or additions within the past year to bring their houses up to fire code standards, Jerry Lilly, interfraternity council adviser, said. Lilly estimated the Greek system spent in excess of $90,000 on these changes.

Greek houses must meet two main categories of fire safety requirements, Lilly said. They are fire prevention and adequate means of exit from the building in case of fire.

"Fire prevention includes a number of things such as making sure wiring is up to code, reducing smoke-producing situations, making sure carpet and walls are fireproof, etc.," Lilly said.

In terms of providing adequate means of exit from a building, Lilly explained that the fire marshall operates on the theory that all buildings may burn, and people must be able to get out quickly and easily.

"He (the fire marshall) looks for two means of egress (exit) from all areas," Lilly said. "You should be able to go within 30 feet either direction and be able to get out."

A new interpretation of the fire code requires Greek houses to have an automatic smoke detection system in operation.

"Greek houses have had fire alarms for years, but they were manual systems," Lilly said. "Within the past two years, we've been required to install smoke detectors which will automatically turn on fire alarms. They act as early warning systems.

"Also, all of the old fire alarm bells have been replaced by horns. Research shows that people, especially young people, are so used to bells that they ignore them. Today, nearly all kinds of alerts are given by horns.

"And Lord have mercy, even in a well-built house, those horns shake the walls."

Greek houses were not alone in making changes to comply with stricter fire code enforcement. University-owned housing has also been required to meet more rigid requirements.

A major part of these requirements have pertained to regulations issued by the state fire marshall regarding the remodeling of residence hall rooms. These regulations specify the types of materials to be used in room remodeling and prohibit elevated floors, sleeping lofts, obstruction of doors or passageways, improvised electrical wiring, and obstruction of air circulation through the convector units.

"Most residents have at least tried to comply with the new regulations," Thomas Frith, director of housing, said. "Students like the freedom to redecorate, but they also realize the regulations were made to save lives."

Frith explained that since all residence halls are designed to be structurally fireproof, the greatest danger in a dorm fire would be smoke and fumes from the burning

contents.

However, while residence halls have manual fire alarms, state fire codes do not require them to have automatic smoke alarm systems as long as the building has fire towers (fireproof stairways), as do all K-State dorms.

Frith explained that the automatic smoke alarm systems are being installed in Smith and Smurthwaite, since they are constructed differently from other university housing, minus fire towers.

Some fire safety problems do not involve the physical structure of the building, but are brought about by other factors. False fire alarms activated by inconsiderate or unthinking residents are an example.

"It (false alarms) seems to go in a kind of a cyclical pattern," Frith said. "There will be a rash false alarms in one dorm, then it may stop for awhile and begin in another dorm.

"Whenever this happens, there's always the danger that people will begin to disregard the alarms," he said.

Many buildings on the K-State campus also face fire safety problems. While new buildings must meet fire codes at the time they are built, older buildings do not meet these codes, Paul Young, vice president for university facilities, said.

"Old buildings like this (Anderson) obviously won't meet 1977 fire codes," Young said. "Stairways like those in Anderson and Fairchild are completely unacceptable — they would have to be enclosed and have doors that shut at each floor.

"The open space in Fairchild is probably the biggest chimmey in the place. If a fire should start there, it would be an inferno in a short time."

While these and other problems exist on campus, steps have been taken to help remedy fire safety problems, Young said. Major renovation of Burt and Dykstra halls is scheduled for 1978, with renovation of Fairchild, Anderson, Holton and Dickens in 1979 and 1980.

The university has also replaced water lines to help increase the campus water supply.

"Essentially, the water supply is in pretty good shape on the west side of campus," Young said. "There is an appropriation request now for a 10-inch water line to be installed from about Danforth chapel to Derby food center on the east side of campus. We hope to start installing this by the middle of next summer."

Young said other universities such as KU and WSU face "essentially the same" fire safety problems as K-State. However, KU and Wichita State are both within the city limits of their respective cities, and depend primarily on city fire departments for fire protection. K-State, however, is not within the Manhattan city limits, and thus cannot depend heavily on the Manhattan fire department for protection.

Rather, K-State depends upon the university fire department to handle most campus fire situations, and an oral agreement with the city for emergency situations.

"Essentially, our agreement with the city is that if we call for help, they will respond by sending one truck and five men," Young said.

However, Young emphasized that the oral agreement is contingent upon the availability of Manhattan's equipment.

"If there is a fire in the city and all their equipment is being used there, they just can't respond to us," Young said. "This is a serious problem."

A $192,000 appropriation request to increase K-State's fire protection by entering it into a contract with the Manhattan fire department was rejected by the Board of Regents last June, pending a further study of fire protection services at all Regents' schools, and a change in the Regents' budgeting procedure.

Although the Regents had taken no further steps to improve K-State fire protection as of January, regent Glee Smith said there is good possibility that by the time a new budget is submitted in the spring, there will be provisions for better fire protection on all Kansas campuses.

Meanwhile, the campus fire crew has done a commendable job in campus fire protection.

"We've been pleased with the spirit and response of the university fire department," Young said. "Their role is to get to a fire as quickly as possible, put out the fire if they can, and if they can't, call help."

Although well-trained, the campus fire department crew, which is on duty from 5 p.m. to 8 a.m. weekdays and on weekends and holidays, is limited in the fire protection it can provide, Frank Duncan, campus fire chief, said.

"We have one truck and four persons who are paid to be on duty," Duncan said. "From 8 a.m. to 5 p.m., a 10-man crew from the physical plant is responsible for fire protection. We'll also send anyone from here who is available.

"In the event of a major nighttime fire, the physical plant crew would be called at home for help."

Duncan said that even with help from the Manhattan fire department, no one could guarantee that buildings could be saved.

"We can't say that buildings won't be lost to fire," Duncan said. "That would be unrealistic — even large cities with large fire departments lose buildings every day. "We have a large university, with everything from a grain mill to a nuclear reactor. With our limited facilities, rescue and life saving are our number one priority."

While the campus fire crew continues to handle most fire problems at K-State, administrators search for the means to improve the fire safety situation. Finding the funds with which to implement these improvements is often a problem, Young said.

"That's one of the frustrations of this job," Young said. "We can recognize the problem and work out a solution, then it has to go through about three government agencies to be appropriated.

"We can tear our hair out, gnaw our teeth or whatever one's supposed to do to find solutions, but it won't do any good if the money isn't appropriated.

"An argument some people use against appropriation of funds for fire protection is, 'Have you lost any buildings recently?'

"Well, no, we haven't, but that's awfully poor insurance for the future."

Mudwalks and sideclomps

by Debbie Hagenmaier

Ah, the splendorous sound of the chimes ringing through the alma mater. It can make one delirious. The brisk autumn air slaps one in the face. The eyes gaze upon the campus and see . . . grass worn dead by the treading of little student feet. The eyes close and concentrate on the ringing of the chimes.

The year 1977-78 was sparked by growing concern about campus beauty and safety. Several projects were initiated in response to this concern.

Last fall, a "Green Survival Week" was declared by K-State president Duane Acker, the K-State Alumni Association, the Environmental Awareness Center and student body president Terry Matlack.

The week was aimed at promoting "A total consciousness-level raising," Matlack said. The most

memo-
rable event
was a pie-
throw raising $50.
Acker instigated and
led a tour of the K-State
campus during "Green Survival
Week," discussing long-range plans
for university landscaping.
Students were given the opportunity to
tighten the gap between themselves and the deci-
sion-making process within the university heirarchy.
"Exterminate the litterbug!" and "Have you kissed a
ree today?" littered chalkboards in classrooms. "Green
urvival" buttons were distributed to stimulate curiosity
bout the meaning of "Green Survival Week."

Various campus organizations, living groups and honor-
ries donated $25 each for the planting of eight trees on
ampus. This accounted for perhaps the most significant
ong-term effect of "Green Survival Week." "It wasn't as
uccessful as one would like it to be," Matlack said.

But by what standards can the success or failure of a
'consciousness-level raising" project be measured? Con-
ern about campus beauty and campus safety resulted in a
roposal for the construction of new one-way bike trails.
he proposal also called for one-way streets for drivers, an
ffort to discourage traffic on campus, Matlack said.

At last, peace of mind for pedestrians on campus. No
nore ditch-diving to avoid on-coming bicyclers and driv-
rs. And, for the bicycler, the days of wobbling and
veaving around students and cars are supposedly coming
o a halt.

Also, a proposal for the planting of annual and perennial
lower beds also came into the limelight in 1977-78. Sev-
ral buildings across campus were chosen
as sites
for planting,
in the continuing
effort to beautify
the landscape.
Will this planting compen-
sate for past pitfalls in planning?
Flower beds planted last July on the
south sides of buildings survived only a
few days in the killing Kansas summer.
Attractive but expensive concrete building markers
comprised another element of "landscaping" at K-State
this year.

"For a number of years, we have tried to find a means of providing some nice-looking markers for the buildings that were consistent and permanent," Vincent Cool, vice-president for university development, said.

Ten years have passed since the first signs appeared on campus. The original cost was $400. This price has more than doubled in the last ten years. Are so-called "nice-looking," "consistent" markers worth this expense?

"The markers have achieved their purpose and should be continued," Cool said.

The signs are paid for through appropriated building funds. New buildings receive priority because there are immediate funds, Cool said. The newest building on campus, Durland Hall, sports a concrete sign while Fairchild Hall, one of the university's oldest buildings, stands ignored and unmarked.

Another subject of landscaping concern this year, as well as in past years, rose over the possibility of building upon the untouched, spacious lawns on campus. Fortunately, these naturally landscaped areas are not in grave danger of being built upon.

"The unviersity has a great capacity to expand," Matlack said. "Large areas of land at the north end of campus could accommodate any possible expansion."

The scenic lawns in front of Anderson and Willard Halls are likely to remain places to eat a sack lunch with a friend, cram for an exam or just to take a snooze.

But campus landscaping still needs work, according to Matlack.

"Our efforts don't pay off overnight," he said, "but we're going to begin to see them pay off soon." Attention still must be paid to aesthetics on campus, he added. A landscaper is to be hired at the end of the 1978 spring semester whose job will be to plan landscaping throughout the campus, realizing social as well as environmental needs.

Kerrigan schmerrigan

by Julie Doll

X-1,2,3 isn't a dance step.

As the majority of English composition students know, X-1,2,3 is the basic formula for virtually every theme they write at K-State — the Kerrigan formula.

A decline in students' ability to write organized papers led the English Department to implement "writing by formula." The Kerrigan formula was introduced five years ago and has become required format for most English composition classes.

Kerrigan includes six steps. Step one — "Write a sentence, step two — write three sentences about the sentence in step one, step three — write four or five sentences about each of the three sentences in step two," and so on.

By following these steps, students can easily achieve organization. Variation from the formula is generally forbidden. However, students are sometimes graciously allowed to add an additional paragraph — if it's vital to their theme. Occasionally, students can choose the topic of their own themes . . . as long as the topic can be covered in five or six paragraphs.

Too often, the teacher chooses the theme topic. Some of the topics created by teachers include "If I Were a Shoe, I'd be a Hiking Boot," "Cats Make Better Pets than Dogs," and "Compare a Classroom in Cardwell to a Classroom in Eisenhower."

Of course, the students can change the topic: they can write that they would rather be a tennis shoe, or that dogs make the better pet, or even change the classroom topic to cover Ackert and Justin halls.

Regardless of the topic, the formula is inflexible. And the flavor and texture of Kerrigan's recipe for themes remains the same — blasé. Blasé, inflexible and boring, does Kerrigan serve a purpose?

"Many students have a fear of writing, and one thing Kerrigan does is give them an anchor," Vincent Gillespie, chairman of the English Composition committee, said.

"Kerrigan method is a starting point . . . the attempt is to take them far beyond," Gillespie added.

But the anchor is keeping the students at the starting line. Most students hesitate to stray from Kerrigan even when they are promoted to a more flexible format.

"Most of my English Composition II students choose to stay with Kerrigan even when I tell them they can write any way they want," an English instructor said.

Perhaps students continue to use Kerrigan because they are told early in their composition careers that they are incapable of writing an extended, organized paper without Kerrigan. They become insecure about their writing ability but know that Kerrigan is acceptable. When they are told to progress, they clutch, and stay with the satisfaction-guaranteed formula.

Theoretically, Kerrigan diminishes fear of writing. In actuality, it reinforces the insecurity.

According to the English Department, this apprehension is not unsubstantiated. They estimate that less than ten percent of today's college students practice adequate writing skills when they enter college.

This figure, however, contradicts a recent national study crediting 70 percent of today's students with adequate writing ability.

K-State English teachers cling to their figures, and only English honor classes escape Kerrigan's influence. In all other composition classes, the instructors are mandated to give Kerrigan "adequate presentation."

For most, "adequate" consists of an entire semester, and often a second, never supplemented with additional writing forms (essays, research papers, or short stories). English department instructors argue that if students can master organization, they can utilize the Kerrigan formula in any other writing assignment.

Kerrigan does include skills common to all writing. It clinches a sense of unity and organization to a student's paper. Kerrigan also provides the student with detailed instructions on how to give specific examples and make transitions.

But the Kerrigan method is potentially damaging. Students never progress beyond slapping sentences into the formula, are never required, often never allowed, to use a sense of creativity and personal style.

Yes, organization is necessary, but not absolute. Perhaps Kerrigan is useful and even necessary, but not for an entire semester — and surely not for two. If a student can't grasp the fundamentals of organization in three or four weeks, he should be placed in a remedial course.

And meanwhile, other composition students (hopefully not a minority) can progress at a rate that befits a university English course, rather than muddling through a junior high level writing class.

HOW TO BE A PREGNANT FATHER.

SOC PROB

Security blankets... with centerfolds

by Julie Doll

From *Rolling Stone* to *Shakespeare*. From the teachings of Mao Tse-tung to books by the Bronte sisters.

The dissidence of the sixties has evolved into a search for security in the seventies; for many counter-culture dropouts, classics are the answer, according to a September New York Times article. Particularly on the East Coast, interest in the classics has been rejuvenated, the article said.

Classical literature may be alive and well in the east, but back here on the prairie, K-State students are entertaining themselves with tales of science fiction and the latest issue of *Playboy*.

"Everybody sells a lot of *Playboys*, a Union Book Store employee said, "and we could sell a lot more if we could get them."

Indeed, other Manhattan book stores say they sell their entire stock of *Playboy* month after month. Another hot item in sales is *Cosmopolitan,* full of the latest tips on "Pleasing Your Man."

But K-State students do care about more than their bodies: Manhattan book stores also sell a lot of *Time, Sports Illustrated, Newsweek, Glamour* and *People*.

In addition to leisurely magazine reading, K-State's more ambitious students tackle paperbacks. Science fiction — especially *Star Wars* and *Close Encounters of the Third Kind*—are favorites, employees at Town Crier and the Union Book Store said. Gothic novels are also popular, they said.

Best sellers are popular with both sexes. Varney's and Town Crier employees said the *Book of Lists* was selling well, and an employee at the Union Book Store said, "*Your Erroneous Zones* is the fastest selling book we have on the shelves."

Another place where students can get reading material, but don't, is Farrell Library. Farrell's Browsing Library is designed for recreational reading, yet use of this mini-library is marginal. Circulation figures show that about 3,000 books are checked out of the Browsing Library each year — less than the number of *Playboys* sold in Manhattan annually.

The question isn't what K-State students like to read . . . but do they read? Looking at pictures hardly counts.

Culture exchange

by Julie Doll

For most K-State students, adapting to college life means moving to an unfamiliar part of the state. But for hundreds of students who come from other countries, adapting means much more.

Language is a unique problem for many international students and their families. Most have had instruction in English, but lack practical conversational and listening skills, Delores Beal, co-director of the new "English as a Second Language" program, said.

The International Student Center has enrolled about 50 students in these English classes. The classes are new this year and possible through a federally-funded Title VI program.

"Most of our students are families of international students and faculty," Beal said.

Those that are K-State students can usually speak English adequately because they must pass an English proficiency test before enrollment, but their families often have trouble with English, Beal said.

"They can read and write fine," she said, "but sometimes it is hard going to the grocery store for the first time, or talking to sales clerks. We have lessons on how to do these things."

Most are taking the classes for a specific reason, Beal said. Some want to go to school here, others want to go back to school or teach English when they return home.

"I've found you've got to be completely open, completely innocent and can't be reserved," Willie Perry, volunteer tutor, said. The same requirements must also be met by the student, he added.

Although language is not the only barrier foreign students must clear, it is the first, Beal said. After achieving adequate English skills the students can more readily adapt to the rest of American culture.

The International Student Center helps students adapt to the United States without relinquishing their own culture by doubling as a social center.

"Those here from the same country are very close," Beal said. "They maintain much of their own culture."

JUDGING

"Number one carcass is placed over number two because it was a heavier muscled carcass that will yield a greater quantity of trimmed retail cuts.

"It had a plumper, wider cushioned round. It had a fuller, more prominent sirloin that extended into a wider packed loin.

"In addition, it had a thicker clodded chuck."

Livestock and meat look different — depending on what side of the fence you're leaning on. To K-State's judging teams, meat is not just another source for a meal to set on the table.

The Meats Judging Team and the Livestock Judging Team at K-State demand rigorous training. But more importantly, being a member of the judging teams takes dedication: time is sacrificed for the team.

Winning teams are a tradition at K-State. According to Steve Mayo, senior in animal science and industry, beating K-State is an honor for another team.

Winning teams, winning coaches.

Dr. Bill Able, Livestock Judging Team coach, and Dr. Dell Allen, Meats Judging Team coach, both have top national judging records in their fields.

Allen coached the nation's top coaches while they were undergraduate or graduate students at K-State.

Considered one of the best judges in the nation by his colleagues, Able holds one of the best judging records, Mayo said.

K-State's record speaks well for its coaches.

"For the amount of work we put into it, a lot of students don't know anything about it," Mayo said.

Teams begin working over Christmas break. Preparations for the meats team open with travels to different packing plants throughout the state, judging classes of lambs, pigs and cattle carcasses.

Team members rank the carcasses from most to least desirable on the basis of muscling, trimness and quality.

Yield grade, quality grade, the amount of edible meat and its eating quality are also studied.

The livestock team visits ranches around the state, evaluating cattle sheep, pigs and horses on the basis of muscling, size and length.

"At first we didn't know what we were doing; we'd stand along the meat chains and listen to him (Allen) grade. We only did that a couple of times. Then, we judged in the coolers and he'd go through them with us," Alan Sents, junior in animal science and industry, said.

For the fall contests, the senior livestock team preps every night for several hours and on Saturdays.

The meats team devotes one day a week to practice, plus every Saturday and some Sundays.

Both senior teams attend two contests in the fall, in Kansas City and Madison, WI, and the livestock team also travels to Louisville, KY, to compete. Thirty to 40 teams compete in each contest.

TEAMWORKS

Concentration on the skill of good communication is emphasized in the teams' training.

According to Able, team members must be able to articulate their ideas — learn how to communicate verbally and on paper; they must also develop self-confidence. In competition, each group is rated individually and as a team on knowledge and communication skills.

The meats team's four members judge one class of 15 beef carcasses on quality grade and one class of 15 beef carcasses on yield grade.

The team also judges nine classes of four carcasses each. The classes consist of two lamb, two pork, one pork ham, two beef carcasses and two beef cuts. Contestants are asked to evaluate and place each class from best to worst.

For these nine classes, the team members are judged on "written reasons." The written reasons explain why the first is rated above the second, the second above the third.

Livestock judging consists of five team members who judge all species of cattle, swine, sheep and horses.

"We have four head (of livestock) per class. We judge 12 classes per contest," Able said. There are four classes of cattle, three classes of swine, three classes of sheep and two classes of horses.

"We give eight sets of oral reasons on eight of those twelve classes.

"Each student is judged on the way he judges," Able said.

"The student's score is essentially grades against the committee's," Allen said.

"When you judge, you judge on muscling, size and length," Warren Kroeker, junior in animal science and industry, said. "You always have four in a class. None are the same. You judge the way you think. It's an objective type of deal."

"You have to psych yourself up to be as confident as you can be. You're right and everyone else is wrong," Alan Ott, junior in animal science and industry, said.

Becoming a member of K-State's judging teams is as competitive as the contests are. Every year, 19 to 25 students compete for team positions.

No classes are required for team membership. However, K-State does offer classes geared towards judging.

Mayo estimated that 75 percent of team members at K-State have judged previously, particularly through the 4-H program.

Perfection comes with practice.

"You can't get it in a year. I've been doing it since I was 10," Kroeker said.

Judging is a good experience and a better job reference, but more than that, judging becomes a passion.

"It's near to my heart," Mayo said.

Tell us, Mr. Ford, do you plan to run for president?

by Judy Weltsch

And the bureaucratic labyrinth continued. The intricate, winding path of the "politician's jargon" prevailed in former President Gerald R. Ford's lecture on Feb. 20 in Ahearn Field House.

Since leaving office in January of 1977 and upon his arrival at K-State, Ford had been to 25 colleges and universities.

"I find regardless of the area that I visit or the college or university campus where I am privileged to be, that the students are bright, optimistic, inquisitive, respectful and they're deeply concerned as to what is right and what is wrong in our government and our government's policies," he said.

Ford, 38th president of the United States and K-State's 41st Landon Lecturer, spoke on "Presidential Perogatives in Foreign Policy."

Ford began his lecture discussing what every student of political science has had pounded into his or her head over and over . . . separate powers and checks and balances in the federal government.

"As a member of Congress, I often wondered if the presidents with whom I served weren't going too fast in making important decisions and commitments for the United States. I wonder if the White House didn't isolate them too much from

public opinion and from the free expression of competing views.

"Later, like many modern presidents, I occasionally displayed a certain impatience with painstaking deliberate processes that are the heart and soul of the legislative branch," Ford said.

According to Ford, with Congress and the president working together it has been easy to sway public opinion and mandate governmental resources for such monumental efforts as the Marshall Plan, The Four-point Program and NATO.

But because of the Vietnam War, the president, Congress and the public became divided, he said.

"Old assumptions were challenged, long-standing commitments were called into question, bipartisanship in foreign policy gave way to deep divisions within the two parties themselves."

"As that frustrating war went on year after year after year, our national unity was shattered and with it the essential foreign policy coordination between the president and Congress," he said.

Ford continued by saying that members of Congress began to think the president was indeed too powerful, and as a result, they approved the War Powers Resolution in 1973.

"This resolution claimed for Congress, in my opinion, unprecedented power in the conduct of foreign policy. A major and crucial section of the resolution provided any true committment must be terminated after 60 days unless Congress has declared war or has been unable to convene because of an armed attack on the United States.

"The legislation also specified that by passage of a concurrent resolution the Congress can direct the president to remove U.S. forces before the 60-day period expires," he said.

Ford said coordination between legislative and presidential branches should be encouraged. Checks and balances were not devised to breed constant confrontation between the president and Congress, he said.

"Let me stress in my administration it was customary to communicate with the leaders of Congress when an important executive action was about to be taken, particularly any action involving foreign polity." Congressional understanding and support developed with open communication, he added.

Ford "poked fun" at congressional leaders regarding evacuation of Da Nang.

Because of the congressional Easter recess, congressmen were scattered throughout the world.

"This, one might say, is an unfair example since the Congress was in recess. But it must be remembered that critical world events, especially military operations, seldom wait for Congress to convene.

When a crisis breaks, it is impossible to draw Congress into the decision-making process in an effective way.

"It is also impossible to wait for a consensus to form among those congressional leaders as to the proper course of action, especially when they were scattered literally around the world when time is one thing we cannot spare."

Consequences to the president can be as severe as impeachment if he does not wait for Congress to make a decision.

"But the consequences to the nation if he does wait, would be far, far worse," he said.

Quoting his last state of the Union address, Ford said, "In these times crises cannot be managed and war cannot be waged by committee, nor can peace be pursued solely by parliamentary debate. To the ears of the world, the president speaks for the nation while he is ultimately accountable to the Congress, the courts and to the American people.

"He and his emissaries must not be handicapped in advance in their relations with foreign governments," Ford said.

Ford concluded by charging the American people, Congress and the President to open constructive dialogue to reserve the bulwark of our strength — the Constitution, and to "combine with spirit, a spirit that has made America what it is today, free and dedicated to a better world for all people."

A preconcieved idea prior to Ford's lecture was that K-State was part of the Republican campaign trail for the 1980 elections.

However, at the close of the lecture, many seemed confused as to whether K-State was in the midst of a public relations campaign or that maybe Ford was just explaining his philosophy for actions taken during his term in office.

"That's it?! He was just complaining about the Congress," Phil Osborn, junior in accounting, said.

Others felt cheated that Ford didn't have any inspiring words with to face the future.

"I think he could have picked a more pertinent subject. He was speaking from the point of view of a president — imploring for more power in the hands of the president and away from Congress," Pat Sargent, junior in accounting, said.

The ultimate question was left unanswered. Exactly what purpose did former President Ford's complex and confusing lecture hold for K-State?

No plates, no silverware, no bother:

by Sue Freidenberger

no nutrition

Ever notice students in the K-State Union absent-mindedly gnawing on burritos as they skim biology? Or a group of donut-munchers and coffee-slurpers discussing the next English theme for Comp. II?

With the "study-and-eat" syndrome comes the issue of nutrition. When students are pressed for time, they study and eat simultaneously. They are not concerned with nutritional value of the potato chips they are inhaling.

Students are more concerned that food is ready on demand, relatively inexpensive and can be eaten without distraction of knives, forks, spoons and plates.

This accounts for the popularity of "junk foods".

Several outlets accessible to students offer quick foods. The Union State Room is one.

Diane Heitman, State Room supervisor, said the volume of food sold from the grill area equals the amount sold in the hot line.

"Although it varies from season to season, it is almost a 50-50 split between food purchased in the hot line and food bought at the grill," she said.

But those buying hot dinners are not necessarily eating correctly.

"I've seen guys come in and ask for a little meat and then get two helpings of mashed potatoes, gravy and bread," Heitman said. "That's not very balanced either."

The Union is not the only place to witness bad eating habits. After a long, hard night in Aggie, students can be found in several nearby eating establishments.

Favorites offer a choice of burgers, fries, pies and drinks.

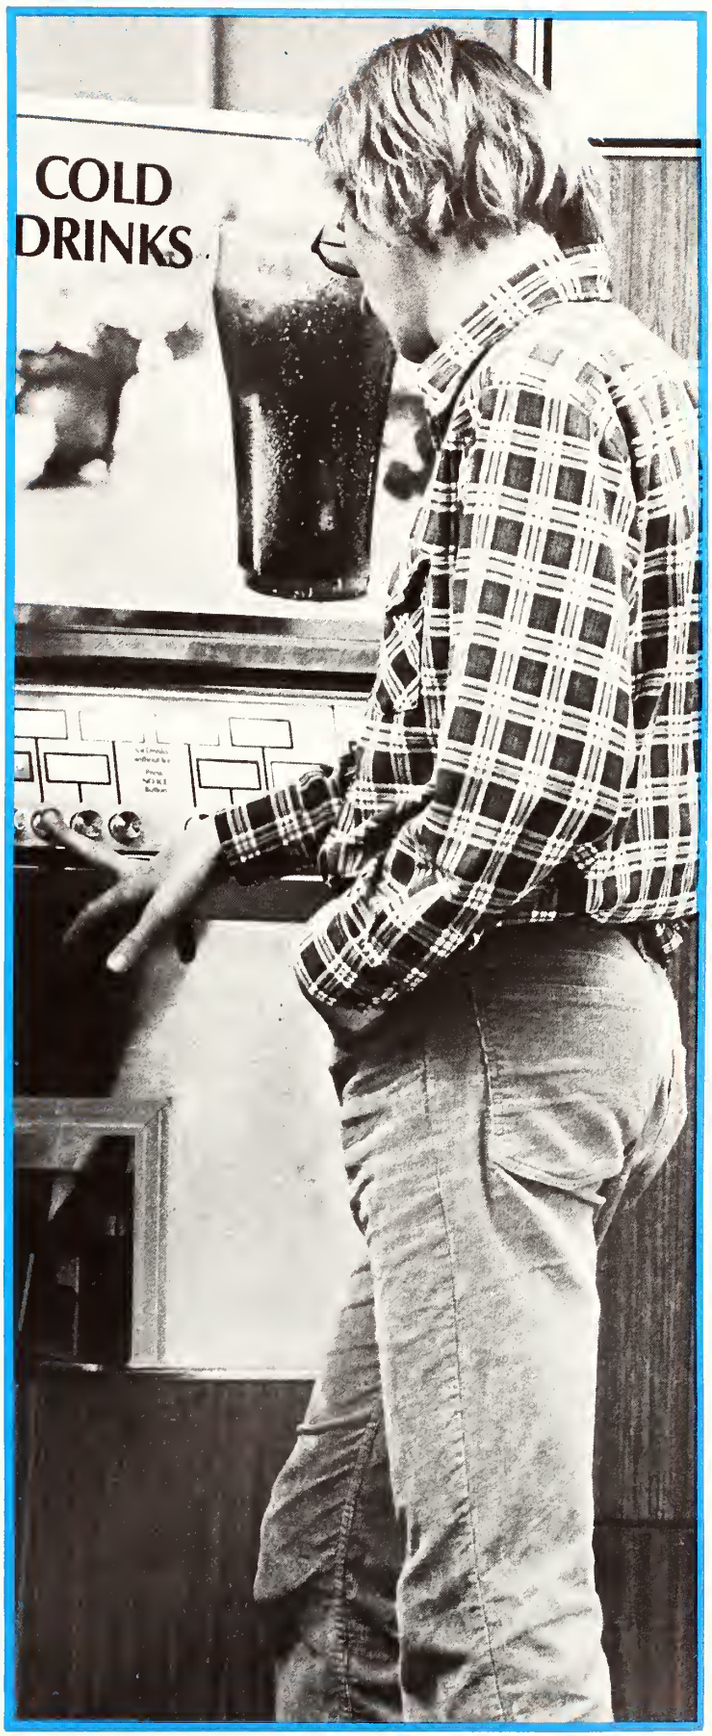
Hardee's manager Don Wilkinson said an average Friday night totals 65 per cent of the day's business.

Another junk food outlet, the vending machine, is a popular place to grab a bite. A phenomenal amount of coin is thumbed into the slot of the vending machine each year.

Bill Wisdom, Union concessions manager, supervises the supply of vending machines products for nine dorms. Concession sales hit $150,000 last fiscal year, he said.

Fifteen cents buys a coke, 20 cents a candy bar and another 20 cents a bag of chips.

It's all there: the "complete" meal, no silverware, no bother, and no nutrition.



Synchronized spats, flashes of brass

by Ronn Smith

"Ladies and gentlemen, Kansas State University proudly presents the Pride of Wildcat Land, the K-State Marching Band!" With a flash of brass, the 320-member band began another season of sound and precision drill.

New uniform overlays of sparkling gold, white and purple gave the band an added flair this year. The new overlays were unveiled during the pre-game show of the Nebraska football game. Wearing black garbage bags, the Marching Wildcats took the field, and to the tune of "The Stripper," tore the bags off to reveal new overlays.

Costing nearly $18,000, the overlays represented the first step in replacing the well-worn eight-year-old band uniforms. But until money could be raised to replace the entire uniform, the old pants and jackets would be used.

"The new overlays are a lot better than the old ones — there's a lot more contrast between the front and back, so when we turn, they really flash," band president Tim Schlieker, sophomore in music education, said. "The rest of the uniform is in pretty bad shape, though. In fact, the pants I wore had patches on the knees."

Working with the smallest band budget in the Big 8, the band receives no money from K-State for uniforms. Instead, most money is obtained from band boosters and band members working on fund-raising drives.

Band members have sold everything under the sun, including Frisbees, clocks, popcorn poppers and band records to raise money for the band. They even gave away a car in the "Great Weigh-In" contest.

The Marching Wildcats displayed the new uniforms for more than just home football game crowds. Out-of-town performances included a Kansas City Chiefs game, a Dallas Cowboys game, halftime at the K-State vs. KU football game and a grand finale performance at the Texas State Fair in the Cotton Bowl.

"I think the show at the Texas State Fair was the highlight of the year. We went out to show the people of Texas what the K-State band had, and that night we had it all," Jocelyn Sheets, junior in journalism, said.

"Everything just clicked—the drive, the excitement, the intensity—it was all there. We got a standing ovation as we ran off."

Long bus trips often accompany out-of-town performances, but the trips are seldom boring.

"We sing and play cards a lot on the bus, or some people study or sleep," Jane Dembski, a graduate student in recreation, said. "We also just sit and talk—it's a really good time to get to know people."

The band prides itself in being one of the best marching bands in the country, and as such, leaves little room for mistakes. Still, sometimes even the best laid plans go awry and the unplanned becomes reality.

"We were practicing for the Band Day pre-game show last year, and there were about 80 high school bands in the stadium watching us," Lyle Cain, junior in electrical engineering, said. "Toward the end of the show, we were to run into the two lines for the football team to run through.

"The field was wet that day, and as I started to run to my place, I slipped and must have slid about ten yards, with my trombone sliding right behind me. When I finally stopped, another guy ran up, waved his arms like a baseball umpire, and proclaimed me 'safe'."

But though mistakes occasionally creep into a show, the band works long and hard to avoid them. A typical show takes nearly 70 hours to plan, and the band spends between six and ten hours per week in practice.

Despite the amount of time required to be in the band, its members receive only one hour of credit and are not paid. In fact, they must rent their uniforms and pay their own way to out of town shows.

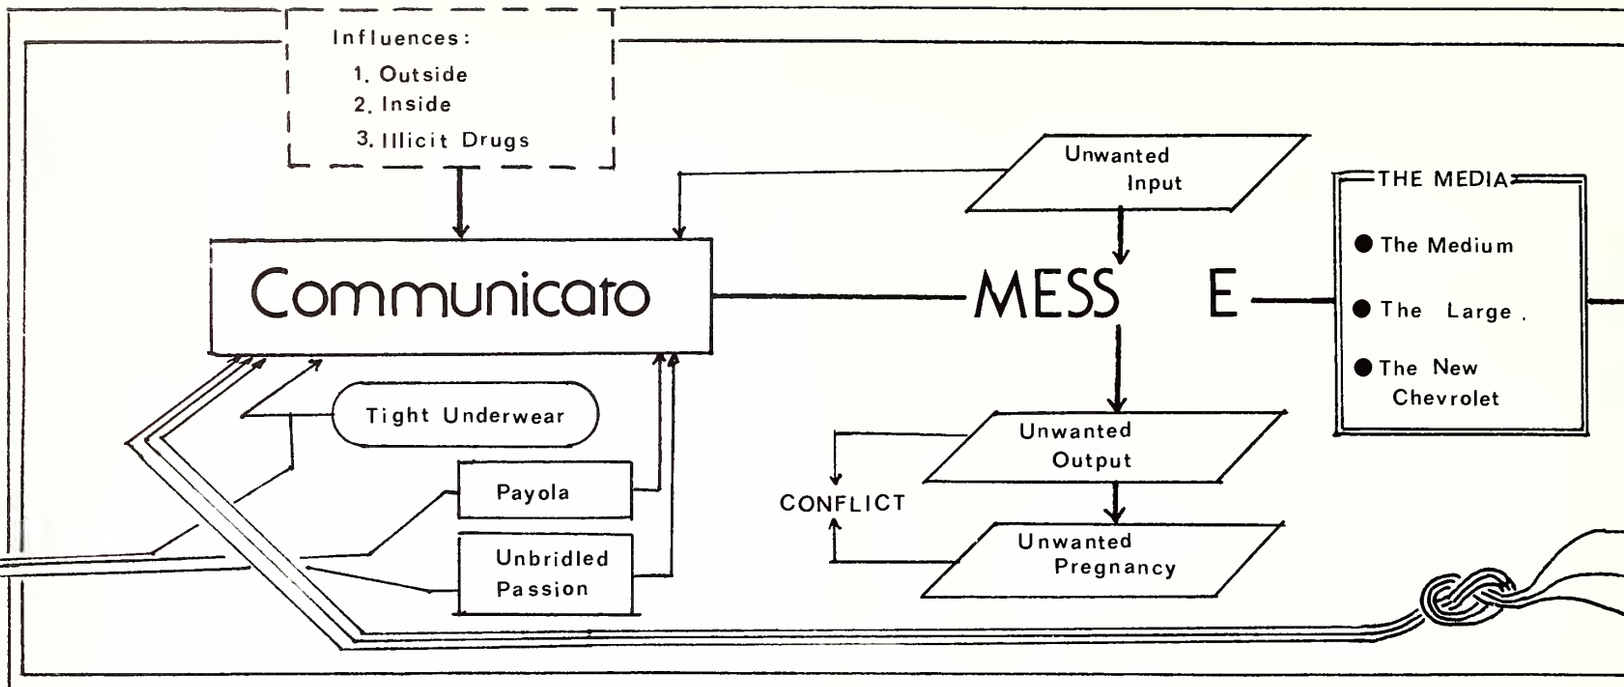
Why do they do it? The reasons are as diverse as the people themselves, but all agree on one thing: it's a lot of fun.

"I really enjoy it. The band has so much spirit and togetherness—it's really rewarding to work as a group toward a common goal and then achieve that goal," Mike Spearman, senior in pre-medicine, said.

While many bands may boast of talent, spirit and recognition, there is one factor totally unique to the Pride of Wildcat Land—director Phillip Hewett.

"Mr. Hewett is the source of motivation for the band," Sheets said. "He's our 'Big Daddy' and we're like a big family pulling for him.

"He never fails us."



The Masked Media

by Robert K. Daly

It's like a social disease: dictionaries give it short shrift, the Yellow Pages don't list it and people rarely discuss it.

Two groups work themselves into a lather about it; academicians, who worry about ALL sorts of stuff, and advertisers, who named it and use it extensively.

What we are going to be talking about is the Mass Media or maybe more appropriately the Masked Media.

Communicologists have done wonders in obfuscating the Mass Media, with terms like encoder, frame of references for message reception, symbols and decoders. The less said about them the better.

Advertisers have been knocked from pillar to post by gobs of Nader-like people so we'll not go into that aspect of the Mass Media either. (Just a point. When you feel unloved, unwanted and unneeded think of television's reliance on you. Without you, the viewer, to be sold to advertisers there would be no television. Don't you feel better already?)

Leaving that minefield behind, let's move to the serenity of Manhattan and its Mass Media.

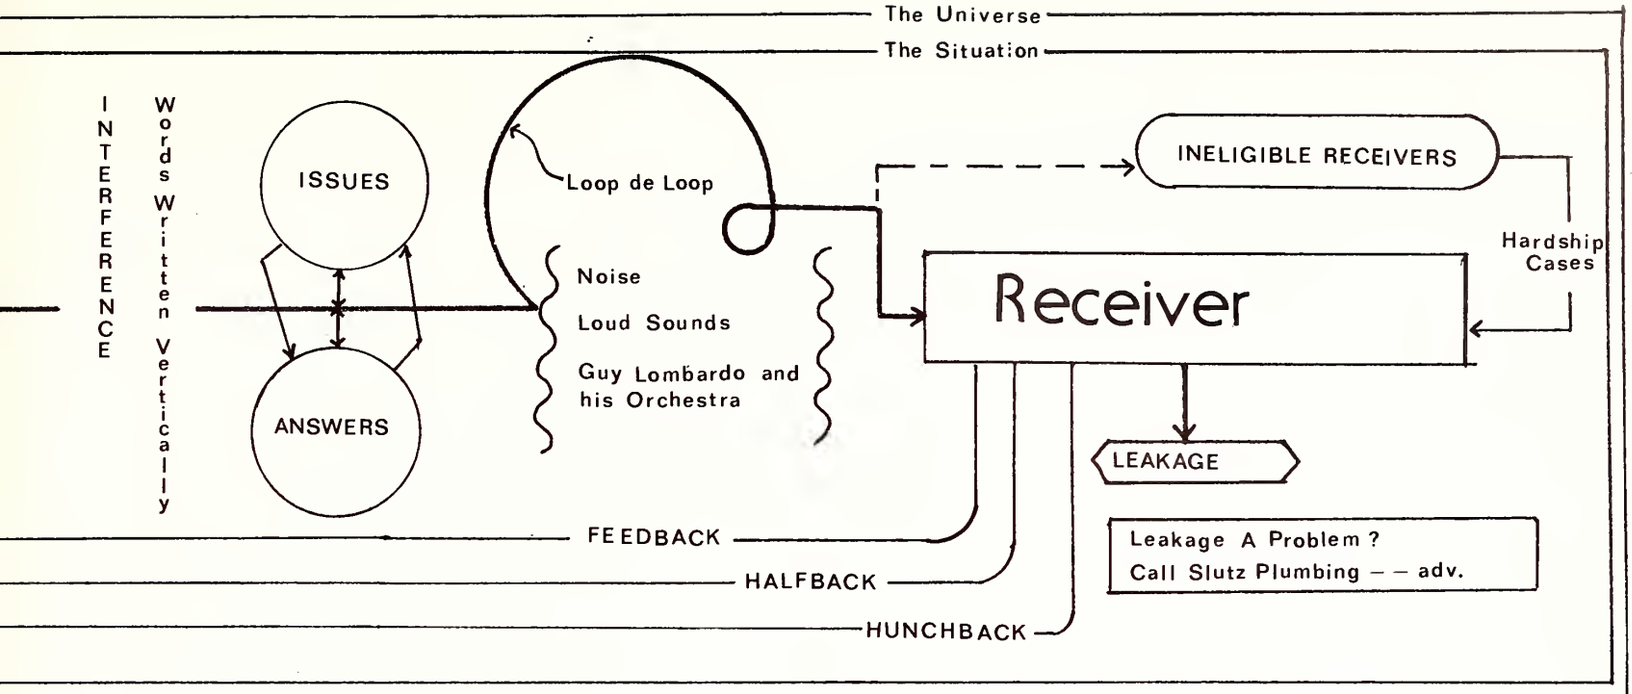
But first a short definition. Mass Media are "Any means of public communications reaching a large audience." What the American Heritage Dictionary meant was there are three elements: a sender, receiver and a channel. (For radio it is the show, the audience and airways and for newspapers it is the article, the reader and words.)

One final didactic note: mass media is a plural (medium is the singular) but at times it will be referred to as a singular when used as a collective noun. (The blame for this whole ruckus lies with advertisers who chose the classy Latin rather than some good old Anglo-Saxon term.)

Here in the Other Apple, as the area is being promoted in a recently launched advertisement campaign, we have all the Mass Media available to any other hungering American. Maybe not the identical fare but certainly an exposure to such things as television, radio, films, books, newspapers, records, ads and even one special area.

The most limited of the Mass Media is TV. There is no network affiliate and hardly any local origination. If you are willing to pay $7.50 a month to a local entrepreneur you can get what most other Americans get for free. For an additional $10 a month you can watch movies, sports, Las Vegas Shows and other stuff selected by Time-Life.

One wonders what we did to deserve the radio we get.



The choices are screaming disc jockeys playing the same incredibly offensive songs, twanging disc jockeys playing twangy songs, coying old men playing forgotten, and unforgivable, early '50 trash, more screaming disc jockeys and the local educational effort. FM is more of the same, except in living stereo.

Newspapers are similar to radio, why are we being punished so? The depth of most local coverage, which is WHAT newspapers are all about, is less than superficial. Even international coverage (which is provided along with other news by the wire service) makes you wonder if Europe, South America or even Canada still exist.

But there is a workable and available solution to this problem; you can subscribe to any of the other 1,750 daily American newspapers. Or you can buy metro papers from many of the midwest's larger cities at a few downtown shops.

Films might be a high spot, but only if you throw in what the university offers. The five off-campus movie theaters, which are monopolistically owned, show basically the same moronic fare as the rest of America is getting except fewer foreign releases. The university with three different series and other general-run movies attempts to pick up the slack on quality films.

Books are a popular medium. Textbooks and other assigned readings are excluded because, well, they are JUST different. The range of titles, availability of copies--through purchasing or borrowing---and diversity of material reflect the university's presence.

Records, which are almost exclusively aimed at the youth market, are well represented, except over the air. The handful of stores specializing in music carry a wide variety of albums.

Magazines, which is the medium of ideas, are undoubtedly the best represented of all the Mass Media. We'll stick close to home and look at the offerings in the Union. (Manhattan book stores and magazine shops cover about the same ground with perhaps more titles because of their diversified clientele.)

During the average school week, the Union sells more than 300 magazines. And with many carrying a cover price of a buck or more that's a big bite out of a student's limited media budget. (Of course the Union is not the only source, many students take advantage of the reduced-rate mail subscriptions.)

Titles mirror student interest: Playboy is the consistent top seller as are women's magazines. Of the roughly 100 magazines a disproportionate share deal with transportation; horses, cars, trucks, vans, jogging, mopeds. One noted deficit was the absence of any foreign language publications.

Advertisements, probably the most pervasive medium, are everywhere; matchbooks shill for drinking joints, sweaters and T-shirts promote radio stations and rock bands, billboards want you to become a benign killer for your country. And radio, TV, newspapers and magazines tell us to buy, buy, buy, buy an incredible collection of unnecessary, useless, worthless and unneeded products. And we do.

But in addition you are being exposed to an unheralded member of the Mass Media. Probably because they don't think of themselves in that light and certainly aren't bragging about something as crass as all that they go unnoticed. The people rarely thrown into the Mass Media grab bag are Educators.

But they should be.

Educators supposedly have something to say to students, which meets the three criteria of the Mass Media. But they have a uniqueness; most of the other Mass Media do not deal with their audience on a personal or live basis. Educators do.

Maybe we should put them in a special catagory: The Unmasked Media.

by Pam Grout

Seems like just last Thursday . . . or was it the Thursday before that . . . could it have been three weeks ago?

All the familiar evidence was in. My towels were showing signs of garnered mold and mildew; everytime I opened my closet door, a sea of dirty clothes deluged me. And my only pair of underwear were those gosh-awful chartreuse ones. Yep—it was laundry time.

I'll never know why that sea of soiled mass seemed to strike the same time every term paper, every test did.

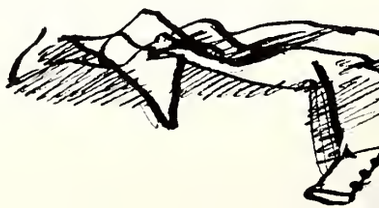
"Oh, well," I sighed as I wedged the overstuffed laundry basket through the closet door, watching the mountains tumble all over the floor. Yep — it was laundry time.

I stuffed a portion of the heap back into the basket, stripped my sheets, made a hobo's knapsack and filled it with the rest of the ever-growing pile. I situated the basket on one hip, slung my purse over my shoulder, and grabbed the hobo's pack in my remaining hand. Halfway down the stairs, I began hearing phrases like whiter whites and biodegradable.

Oh, brother. I tugged my never-to-be-balanced-the-same-again load back up the stairs, set it down and grabbed the missing essential. Already famous for blazing trails of Tide, I knew this was not going to be easy.

"Why did Mom insist on giving me this giant family-size box?" I complained. After numerous detergent trails, I'd resolved that the smallest boxes were most economical because I usually lose what's left over in the shuffle.

I finally jammed the Tide into the side of the basket and positioned my load similarly, but of course, less comfortably. Back down the steps, I re-set the load down, opened my car door, sat my laundry equipment on the front seat one by one, and ran back upstairs, retracing my steps for dropped items. (Besides being the infamous soap trailer, I



am also established as a clothes loser. I rarely come home with the same laundry I leave with.)

Retrieving only a sock and a pillow case, I ventured onward.

At the unfortunately familiar laundromat, I began throwing clothes into washers. Never knowing what constitutes a light or dark load, I shoved approximates into their respective washers. Naturally, with all my goodies I couldn't find five washers in a row, so I stuffed a sheet here, a pair of jeans there. Finally, all that was left in the bottom of my basket was Bounce and Business Law.

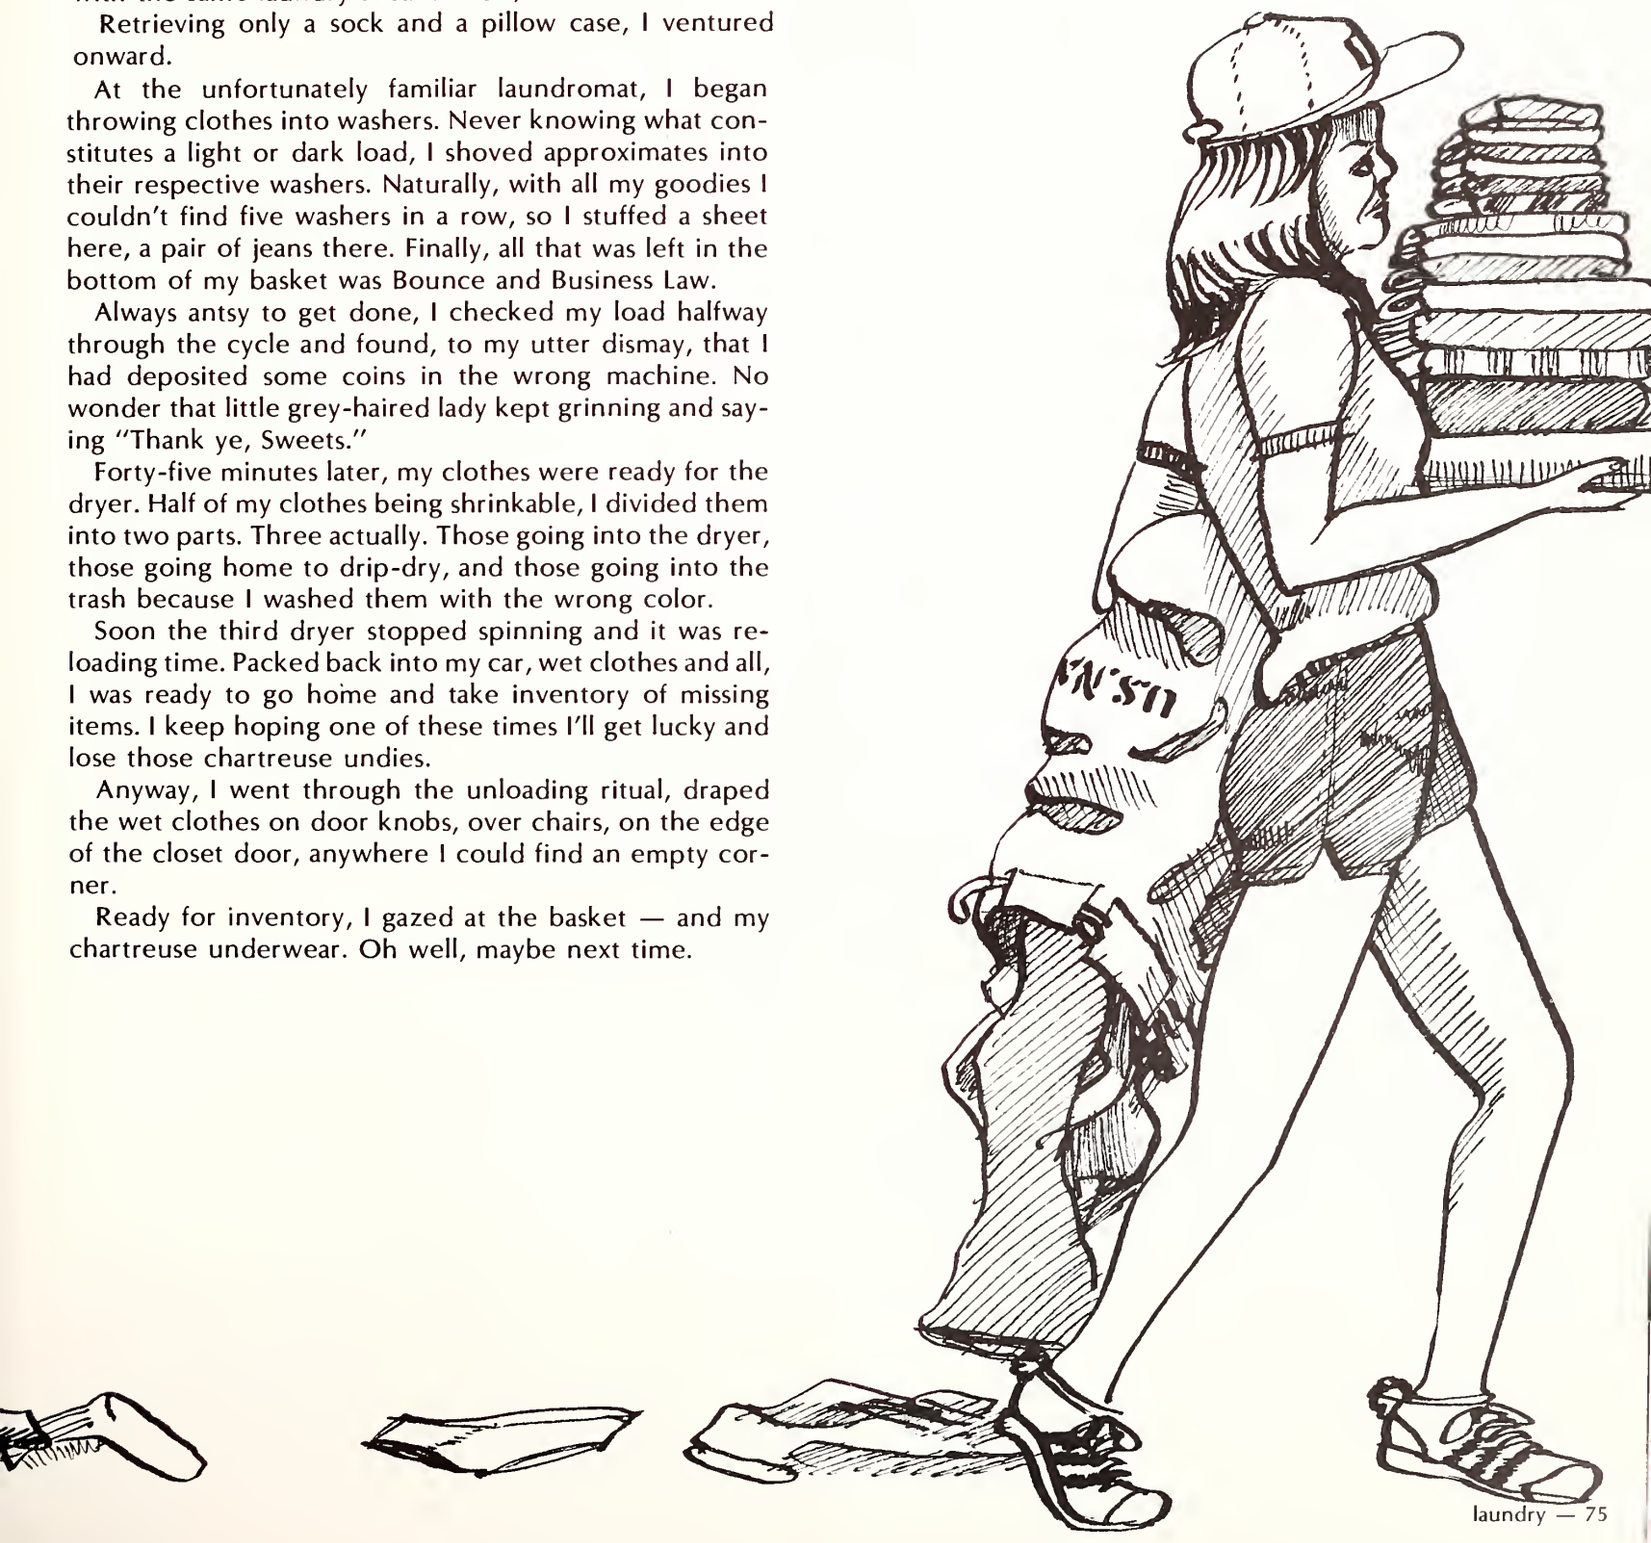
Always antsy to get done, I checked my load halfway through the cycle and found, to my utter dismay, that I had deposited some coins in the wrong machine. No wonder that little grey-haired lady kept grinning and saying "Thank ye, Sweets."

Forty-five minutes later, my clothes were ready for the dryer. Half of my clothes being shrinkable, I divided them into two parts. Three actually. Those going into the dryer, those going home to drip-dry, and those going into the trash because I washed them with the wrong color.

Soon the third dryer stopped spinning and it was reloading time. Packed back into my car, wet clothes and all, I was ready to go home and take inventory of missing items. I keep hoping one of these times I'll get lucky and lose those chartreuse undies.

Anyway, I went through the unloading ritual, draped the wet clothes on door knobs, over chairs, on the edge of the closet door, anywhere I could find an empty corner.

Ready for inventory, I gazed at the basket — and my chartreuse underwear. Oh well, maybe next time.



Events

Clank, clunk, you're sunk

by Star Lee

"Didja hear that Vern Miller's library and all two of his books burned?" "Really?" "Yeah, and he hadn't even colored them in yet!" Clank.

Oct. 12, McCain Auditorium was the scene of the Clank Show — one step beyond the "Gong Show." The judges for the United Way fund-raiser were Curt Schneider, attorney general, Jack Hartman, wildcat basketball coach, and Roni Mahler, assistant professor of health, physical education and recreation.

" . . . and the first act is the 'Beautyshop Double Quartet'." Clank.

"Now presenting --- 'P, B, and J'." Clank.

Other exciting acts included "Maurice, the Talking Dog", who appeared on stage, "high on catnip" (with a bad case of stage fright), and "Marci Marceau," the invisible mime.

"Wonderful, Marci . . . the best act I've seen so far," quipped the master of ceremonies.

Next: "B, J and P," back again. This time, they stayed unclanked because the judges wanted to hear their punchline. The last guy in line did a striptease, peeling down from a suit to a pair of green socks, shorts and shirt. Viola --- a green lizard. Clank.

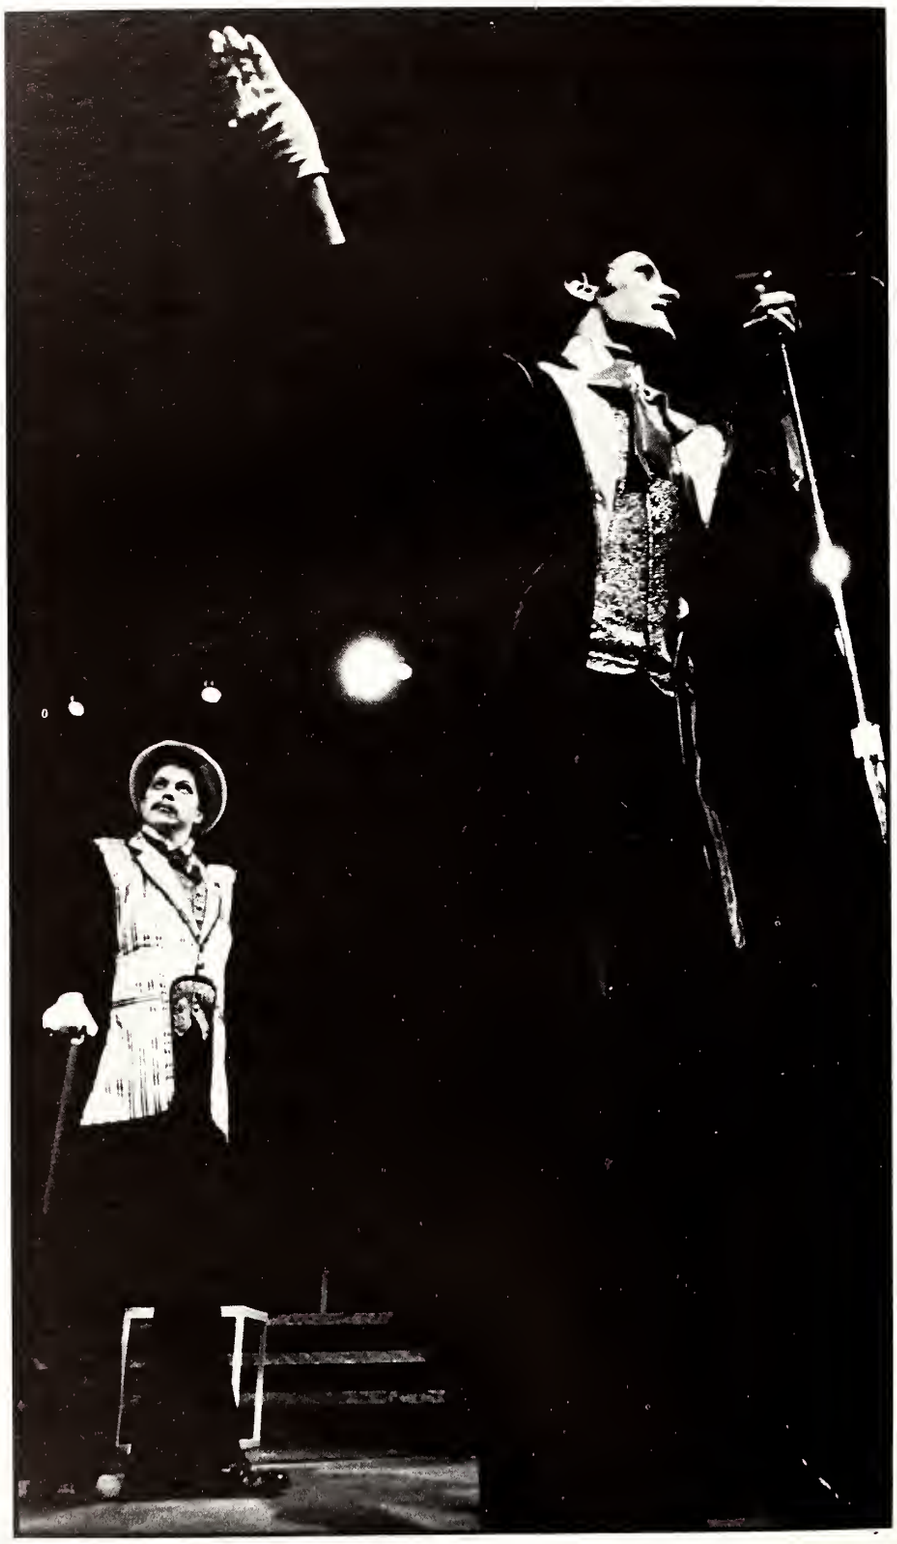
The "unstripper" was a variation of the same theme. She walked on stage in a bikini and the audience threw clothes to her.

" . . . and once again --- 'J, B and P'." Unanimous clank.

Between acts, four K-State Players put on mini commercials and skits. Write-in offers included "Chuck the Chalk" and a home circumcision kit. And of course, a weather report was included: "Dark and continued dark until morning."

The Clank Show did have some outstanding talent. Second place went to "The Pickers," who gave a lively rendition of "Jamaica Farewell." A little pickin' and a-grinnin' with a banjo and "That Good Old Mountain Dew" won a third place trophy for the "Bluegrass Stooges."

But the best act, according to the judges and the audience, was the "Flint Hills Four." This barbership quartet sang two encores before it received a first place trophy and a dousing of paper shreds.



"Oh, the shark has pretty teeth, dear, and he shows them pearly white," sang the streetsinger.

The shark was Mac the Knife and the show was "The Three Penny Opera" presented by the K-State Players, Department of Speech and Theater and the Department of Music in McCain Auditorium Oct. 6, 7 and 8.

The musical, penned by Bertolt Brecht and Kurt Weill, was banned in Germany by Adolf Hitler in 1933 because of its "risqué" content.

After failure in New York that year, Marc Blitzstein adapted the work and Three-Penny became the longest-running musical up to that time.

K-State director Lew Shelton called the play a "classic of the twentieth century." He wanted to emphasize the singing and the music because they contained "the chief satire of the work."

The themes of hypocrisy, greed, lust, exploitation and betrayal combine to make a bitter statement about society.

The villain MacHeath, played by David S. Keck, is the hero of the story. He dances around police, parents-in-law, and innumerable wives and girlfriends, eventually taking a break to get married and sing a "Love Song" to his newest bride, Polly Peachum.

Polly, played by JoAnn Clark, is a sweet, beautiful Soho girl simply dying with love for her "Macky". When he has to flee from the police, Polly bravely takes over his "business" and "staff".

Polly's parents, portrayed by Bruce Bardwell and Jo Ellen Hull, are furious about their daughter's secret marriage to the gangster and resolve to have Mac captured and hung.

Many bribes and several escapes later, Mac is finally behind bars. But at the crucial moment of the hanging, a decree from the queen sets Mac free.

Even though the villain got away, Streetsinger Dave Greusel closed the play with "Happy ending, nice and tidy. It's a rule I learned in school. Get your money every Friday; happy endings are the rule."

MacHeath, the artful dodger

ARISTOPHANES'
LYSISTRATA

Romps, games, frolic and fancy

by Kathy Huffman

The sexual revolution isn't anything new. It was even around in the fifth century, in "Lysistrata," a Greek comedy by Aristophanes, performed in ancient Greece.

The most memorable aspect of the spring production was the costuming. Designed by Lydia Aseneta, asst. professor of speech and theater, costumes included individually-fit "fatsuits."

"The grotesquely voluptuous appearance transformed the actors from humans to caricatures," Suzanne Bunker, costumer for Lysistrata, said.

Breasts were crafted of muslin and stuffed with fiberfill. They came in three shapes — youthful, middle-aged droop and old, with a definite droop. Split peas were used to create the drooping effect, Bunker said.

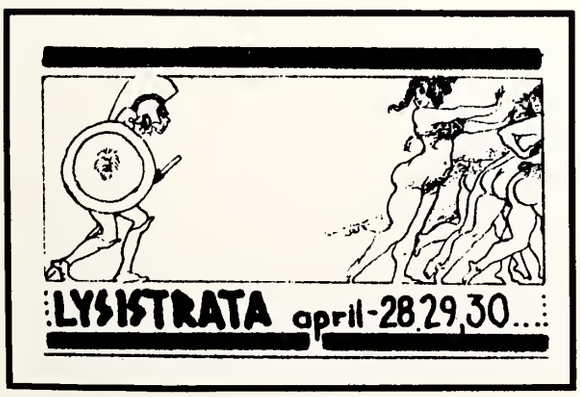
Choral interludes represented the passing of time. The chorus sang, danced and romped around the stage in pseudo-nudity.

Unlike most Greek plays, which usually portray only the emotional side of women, Lysistrata portrays a heroine dedicated to her goal and capable of achieving it. Disenchanted with the civil war, she wants her husband home and enlists the aid of other Grecian women in the scheme.

Lysistrata proposes use of the women's strongest weapon, sex, and convinces the other women to withhold favors until the men cease fighting.

Shelton attributed the play's success to it's being represented in the springtime, when "everyone was in the mood" for a show about the rites of spring.

And perhaps viewers learned that what was funny in ancient Greece can still be funny today.



The Effect of GammaRays on Man-in-the-Moon Marigolds

By Pamela A. Johnson

The eclectic production of "The Effect of Gamma Rays on Man-In-the-Moon Marigolds" was tight drama, actors playing together for the audience, not to the audience.

The Pulitzer drama was directed by Paul Roland as a K-State Players production Nov. 17-19 in McCain auditorium.

Playwright Paul Zindel depends on Beatrice to animate his thematic statement: Social status = atmosphere = gamma rays penetrate practically everything, and are deadly

Edith Hinrichs gave an outstanding performance as Beatrice. She mixed alcoholism with ambition, and tempered insanity until it was almost endearing. The audience forgave her all callousness because it was her reality: she was not loved, thus she could not love.

Her house is her persecution incarnate, nailed together for the audience to see. It is unlikely that Beatrice will survive this house: it is contaminated, weathered to a dull grey, windows broken, swabbed in overcast sky-darkness.

This incubator provided the environment for slow mutation of Beatrice's family, rejection permeating every crevice of their existance.

Beatrice's oldest daughter, Ruth, is a by-product of this house. Vickie Welch played a frantic teenager laughed at by her peers, prowling for attention armed with crimson lipstick and tight sweaters. Ruth is lost in her sexuality, her oblique social status and her nightmares.

Tillie, the youngest daughter, is a mutant. Because she is mentally coherent, she adopts a curious eccentricity in the context of this play.

As Tillie, Virginia Becker quietly dodged the evil hanging in the wallpaper in this "home". She lives inside her science text; a marigold gamma ray experiment and a large white rabbit are her passions.

Tillie's gamma ray and marigold experiment is the niche for the playwright's concept. Because Tillie's marigolds grow into eccentric beauty, Zindel has decreed the it is possible for sensitivity to survive society's infected doctrine.

Tillie's ostracism is perhaps her salvation, and ultimately, the marigolds survive the gamma rays, distorted.

Mozart's The Magic Flute

by Pamela A. Johnson

Lynn Mahler Shelton directed "The Magic Flute" in a flourish of theatrical gimmickry March 2, 3 and 4.

"I wanted the magic. I wanted it to tinkle crystalline, shiny, shimmery, a show that's in curves," Shelton said.

A gossamer fairy tale, Mozart's "The Magic Flute" was first produced in 1791 in Vienna. Unfortunately, Mozart did not have access to McCain auditorium's array of special side-effects; his opera was first performed in a booth/theater in a courtyard in rural Venice.

The opera's theme is like a complex fraction: men versus women and passion versus love over light versus dark and freemasonry versus hierarchy.

"The growth of a lifetime is seen in two and a half hours — two people grow from adolescents into adults," Shelton said.

She refers to the main characters Tamino and Pamina, played by Michael Lipe and Carolyn Thayer.

Tamino is the unblemished prince. He endures trial and tribulation, undaunted in search of truth.

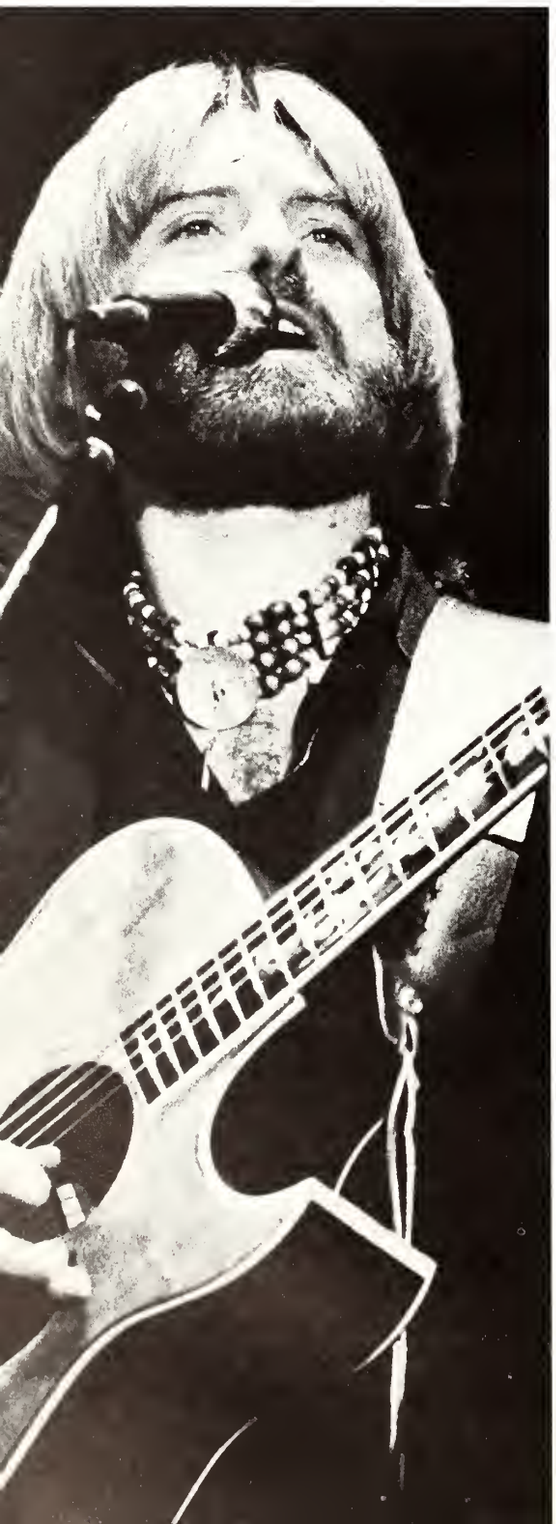
His liason, Papageno, was the energy of this opera. Robert Brannon's Papageno complained in exclamation marks, fidgeted as the plot developed and broke all the rules of the play opera. At times, he was almost vivacious.

Pamina ranked second in vivacity. Always the distressed damsel, Thayer surprisingly made Pamina into a "fleshy" princess. She wrestled with Monostotos (David Keck), withstood her formidable tyrant mother (Carolyn Jeanne Smith), and gingerly attempted suicide, characteristically flipping her train to the side as she paraded across stage.

Costuming was, ahem, extravagant. $2500 rented costumes from the Santa Fe Opera House.

Such blatant spectacle still could not dominate the musical score. Ensembles traipsed on and off stage, but the real drama pulsed from the orchestra pit, direction by Mischa Semanitzky.

"I kept steeping myself in the music — patterns of movement start to develop," Shelton said. "The characters are there in the music."



America!

by Ronn Smith

After a series of misfortunes which resulted in a two-hour delay in the start of the program, Michael Murphy and America opened K-State's first major concert of 1978 for an appreciative but unenthusiastic audience Friday, March 3 in Ahearn Fieldhouse.

An accident involving a truck containing America's sound equipment was a major factor contributing to the delay of the concert. In addition, a plane containing the back-up bands for both groups mistakenly flew to Salina instead of Manhattan, and a wheel fell off a van transporting Michael Murphy.

A large crowd of concert-goers, many of whom expected to be admitted at 7 p.m., waited in the subfreezing cold outside Ahearn until they were finally allowed to enter at 9 p.m.

The crowd soon warmed to the sounds of Murphy, however. His energetic performance and wide variety of music was well received. Murphy's talents were best demonstrated by his sparkling vocals in "Wildfire" and "Carolina in the Pines."

But perhaps the highlight of the concert came not during a performance, but during the break between Murphy and America. While many amused themselves with beachballs and frisbees, the announcement was made of the K-State victory in the post season basketball tournament, bringing about an ovation far surpassing that given to either group.

America took the stage in what almost seemed an anti-climax to the K-State basketball victory. The group's performance could be summed up in one word — loud. Little dynamic contrast could be heard between various songs, as even the group's "soft" songs were loud. At times, the piercing treble of vocals and electric guitar combined to touch at the audience's threshold of pain. Still, by "hanging the sound" from the rafters of Ahearn, the inherently bad acoustics of the fieldhouse were improved despite the volume.

Though loud, America's intricate instrumentals were nearly perfect, as were many vocal arrangements. Among their more popular hits, "I Need You," "Ventura Highway" and "Sister Golden Hair" brought the most favorable response from the crowd.

A standing ovation at the end of the concert brought the group back for a one-song encore — an inspired and exciting rendition of "A Horse With No Name."

After a short ovation for the encore, the audience seemed ready to leave — pleased with a good concert and a satisfying basketball victory over KU.

Like pot, peace marches and the Beatles, it was a sign of the times. A product of the turbulent 60's. It provided a peaceful repose for those who opposed the opposers.

A coffeehouse was a place to get away from it all — a quiet, intimate atmosphere for anyone wanting to "get their head together." An alternative to loud rock, it contrasted with revolutionists protesting anything and everything.

Coffeehouses were unobtrusive, out-of-the-way places with dim lights, quiet music and pillows spread intermittently.

A coffeehouse in its own right, K-State's Catskeller evolved from the climate of the 60's. It opened in 1971 and provided a get-away-from-it-all atmosphere.

The Catskeller served as an eight-lane bowling alley until the 1970 Union remodeling. Proposed by the Students' Entertainment Committee, it was originally designed for weekend entertainment. After two months, students realized the potential of this basement hideaway and it became a coffeehouse.

Like the coffeehouses of the 60's, the Catskeller formed in opposition to bright, loud places like the K-State Union State Room.

John Biggs

With an active imagination, the stage could have been the inside of a barn in the back hills of Tennessee with the local country boy strumming his guitar. Instead, it was Manhattan's own John Biggs center stage in the Catskeller.

Opening the first coffeehouse concert of the year, Biggs and his "army", brother Chris Biggs, Jeanne Hanson and Tom Hiddle, played to an enthusiastic crowd September 23 and 24.

A repertoire of country, bluegrass and folk music combined with a dash of story-telling aroused foot-stomping, hand-clapping and singing along.

One of the first songs was a tune spoofing death and burial. "Send Me to Glory In A Glad Bag" (or an oven bag for those going the other way), was a crowd pleaser.

Many times, Biggs stopped to tune his guitar. He joked that instruments get nervous while performing and go out of tune a lot.

Once the instruments were tuned, Biggs proved that patience is rewarded. He performed several of his own compositions, including "Home's Another Day Away" and "No One Will Love You As I Do," two mellow songs his rich tenor complemented nicely.

After brief intermission, the Biggs troup led the audience in "Blowin' In the Wind," "The Night They Drove Ole Dixie Down," and "This Land Is Your Land." The sing-along would have raised the barn roof in those hills of Tennessee.

Catskeller

The Unique Ones

This year, when it's advantagous to be anything but a white, Anglo-Saxon Protestant male, handicapped people, too, are finally getting into the fair-treatment spotlight. But on Oct. 27, 28, and 30, they were in another spotlight, on stage.

"The Unique Ones," an original play by K-Stater Michael Byington, focuses on people who are "special."

Byington said his message "is about alienation from social norms."

"I don't think the play is about the handicapped per se, as much as it is about being unique," he said.

The story portrays three handicapped people trying to survive together in the "normal" world, each dealing with the other's problems as well as his own.

The action takes place primarily in flashback form, and concentrates on the three in their college and pre-college years.

The male lead, Vincent, is a partially handicapped young man. He has had severe trouble with his eyesight, somewhat improved by medical help.

The most striking impression of Byington is the resemblance of his features to this leading male character. Byington is soft-spoken, yet confident in his work. He is an empathetic person and it is clear that his characters were created with care and understanding of the handicapped's situation.

Was the play written from personal experience?

"From the standpoint that I have been around a lot of handicapped people," Byington said. "It's the reason that I chose to write a play on the subject."

For a playwright to assure clear presentation of his message, logically he would control direction and production. However, custom dictates that after the last word is written, the playwright bows out and a director steals the show.

Although "The Unique Ones" followed this tradition, Byington did work with the actors on character development.

The result of this effort was a remarkable resemblance between Byington and his characters. The audience was guaranteed that what they saw was what the playwright intended them to see.

As special assistant to the university president *Barry Flinchbaugh's* job includes serving as a liaison between the university, the governor and the state legislature, representing the president's office to alumni and endowment associations, and selecting Landon Lecture speakers.

Flinchbaugh's position was created July 1, 1977, by President Duane Acker.

"I think the position was created because the president needed additional assistance," Flinchbaugh said. As chairman of the Landon Lecture series, Flinchbaugh is responsible for selecting the speakers for the series.

"I go after the big names," Flinchbaugh said. Big names this year included Jerry Ford, Malcomb Forbes and David Broder.

"It's tough to get big names," Flinchbaugh said. Women speakers are more difficult to bring to K-State than men, he added.

When the Landon Lecture series began, Alf Landon was still politically active. Respect for the former governor in the political arena still attracts many of the speakers, Flinchbaugh said, citing Forbes and Ford as examples.

Who are future Landon Lecturers? Flinchbaugh is negotiating with Henry Ford, Shirley Temple Black, Howard Baker and Andrew Young.

Mike Mansfield

Bob Bergland

Thousands of people throughout the world depend on the United States for food.

"The magnitude of the (national) food problem literally boggles the mind," Bob Bergland, secretary of agriculture, said.

Bergland, first farmer to be secretary of agriculture since the Roosevelt administration, delivered the 38th Landon Lecture on Sept. 9, Alfred M. Landon's 90th birthday.

After reading a brief birthday message to Landon from President Carter, Bergland read his prepared speech, "Towards a National Food Policy."

The U.S. has the finest system of agriculture ever developed, Bergland said, "a system that will enable the many less productive countries of the world to depend on us."

"The food problem is international in scope," Bergland said. He spoke of bettering the world's nutrition while also providing stability to U.S. farmers.

Bergland said the farmer is not benefiting from higher wheat prices, but instead needs price stability.

"Wheat prices are undeniably linked to world markets," he emphasized.

Foreign countries should help support U.S. farm prices in times of drought as well as oversupply, in order to keep prices stable, he added.

Bergland said the Carter administration's proposed wheat set-aside program could help to maintain strong American agriculture. Some foreign countries, however, do not have the funds to purchase U.S. agricultural products, he said.

"The problem in this world today is not supply but demand," Bergland said.

"Unfortunately, Southeast Asia seems to rank low on the totem pole of U.S. foreign policy," Mike Mansfield said in his April 12 Landon Lecture.

73-year-old Mansfield, Senate majority leader for 15 years and ambassador to Japan, was the first man to deliver two Landon Lectures. The aim of his speech was to "take stock" of Asian policy and U.S. interventions in lands halfway around the world.

"Like it or not, a unified Vietnam will be a major force of strength . . . and the U.S. should make the best out of this new situation."

"The last administration's policy of opposition to trade and commercial relations with Vietnam and Cambodia, and the failure to send ambassadors to Laos, has something in it of the ostrich complex," Mansfield said.

The move "to open talks with Vietnam on the range of issues between us . . . is a step in the right direction," he said.

The China situation is improving with open communication, but Mansfield said he encouraged recognition of both Chinas.

Looking eastward, he stressed the importance of retaining good relations with Japan.

"Japan is the fundamental cornerstone of American policy in Asia," he said.

Mansfield urged caution in pushing Japan to expand military forces.

"There ought not be ground for Japan to doubt the U.S. security guarantee and no compelling reason for the Japanese to make a significant change in their defense policies."

"Any other course, in my judgment, is playing with fire in the western Pacific," he stressed.

Discussing several other Asian countries, Mansfield said "a will to clear away the remaining relics of outdated policies and to face up to the present and the future and to learn from the past," is needed.

David Broder

President Carter's efforts as president are focused on three sets of opposing forces, according to David Broder, associate editor and political correspondent for the Washington Post.

Broder presented the 39th Landon Lecture, titled "American Politics in the Carter Era," in McCain Auditorium, December 9 to a near capacity crowd. He related the Carter presidency to broader themes and trends in U.S. politics, the country and the world.

The first set of forces are conservatism versus liberalism, Broder said.

"The basic political trend in this country has been in the conservative direction. Even in the depths of the recession, more people said they were worried about inflation than unemployment," Broder said.

Carter ran for president as a conservative democrat and essentially won victories in the primaries last year through his conservative approach, Broder said. He added that the key victories leading to Carter's nomination came from the conservative areas of the country, not the big cities.

Walter Mondale was viewed as a more liberal democrat and thus the team of Carter and Mondale was able to win the general election, Broder said.

The second set of opposing forces facing Carter is government centralization versus decentralization, Broder said.

"Most Americans are no longer satisfied to be dealing in a client relationship with their government. Carter was interested in an effective move to decentralize power in this country," Broder said.

The third set of forces is individualized politics versus international policy.

The strength of political parties has decreased in the U.S., he said.

"Without a weakening of the political party, Jimmy Carter could never have become the nominee of the Democratic Party. He was an outsider," Broder said.

According to Broder, Carter's resource of leadership is the everyday person.

President of Forbes Magazine, Inc. and one of the nations most influential business leaders, Malcolm Forbes spoke at McCain Auditorium Jan. 24 about "Where We're At and Where We're Headed".

In terms of where America is at, college students are in a very advantageous position, he said.

"At this point in your careers, you probably know a lot and suspect even more. I want to suggest 'enjoy it', because you'll never be so sure of what you think you know in the days ahead," Forbes said.

According to Forbes, the economy has never been so good. The basic standard of living for everyone in the country and the numbers of people going to college is greater than it has ever been.

"It doesn't mean the end product is any more improved than it ever was, but you will be just as disappointed or cause as many problems as your predecessors have," he said.

The economy's existing problems are exciting, Forbes said. He claims the main ingredient in inflation problems is energy.

"It's created a dependence we've never had before. We are responding by importing more oil than we ever did."

Forbe's solution to energy problems is utilization or the laws of supply and demand: remove all price restrictions to slow down consumption.

"The government doesn't make money. It prints money. When you print more than you take directly out of your pocket, you have inflation.

"And as for our problem, Mr. Carter has probably been no bigger problem than most we've had in the job," he said.

The President has promise of coming to grips with his job, he said.

"I hope it's not soon because imagine the problems we'd all have if all the things he'd asked for had been passed. . . . The fact people accuse him of being ineffective because he doesn't get things passed — they're hitting him where his assets are, I think."

Malcolm Forbes

On its third U.S. tour, internationaly-renowned Philharmonia Hungarica orchestra captivated a moderate-sized audience in McCain Auditorium Oct. 28.

Richard Kapp's Philharmonia Hungarica demonstrated why the orchestra has been awarded seven international prizes.

The orchestra's first number was Bela Bartok's "Two Portraits, Opus 5." Taken from the folk music of Hungary, Bartok wrote the piece about Stefi Geyer, a well-known violinist. The first musical portrait of Geyer depicts his warm, private side, the face shown to intimate friends. The second portrait is wild and quick, the cool, aloof Geyer.

The second piece performed was Beethoven's "Concerto for Piano and Orchestra No. 4 in G Major, Opus 58." One of the most difficult compositions ever written for the piano was mastered beautifully by Balint Vazsonyi.

Vazsonyi and the orchestra carried on a conversation. The audience rewarded the musical dialogue with a standing ovation for Vazsonyi's solo performance.

The last song on the program was one most Americans could identify elements of. Dvorak's "Symphony No. 9 in E minor, Opus 95" (from the New World Symphony) possessed a hint of the Black Spiritual, and Czech folk music influence. The opening movement sounded something like "Swing Low Sweet Chariot."

A mournful melody dominates the first movement and becomes more pronounced as the song continues. Finally, as if all bonds of slavery were broken, the music becomes lively and vivacious, culminating in a vigorous finale for the performance of the Philharmonia Hungarica.

Philharmonia Hungarica

The Royal Winnipeg Ballet graced McCain Auditorium January 29. The Canadian troupe's five dances included contrasts as sharp as the avant garde "Women" to Aaron Copeland's lighthearted "Rodeo".

The first dance was a "Festival". Costumes were simple, brightly colored tunics and pajama pants, contributing to the dance's party atmosphere. An import from Brazil, the dance used a large stage troupe to form a rainbow of light performed in a modern ballet style.

The company next presented "Adagietto", an abstract dance about sexual ecstasy.

The duet began with a male and female dressed in turquoise leotards. The costumes' simplicity complimented the dance's complete perfection. "Adagietto" was a beautiful example of living sculpture — the dancers were silhouetted against the lights. The dance was a rejoicing of physical love while being a celebration of the beauty of the human body.

The presentation changed beat to a classical dance. The "Glinka Pas De Trois", music by Mikhail Glinka, was a trio in the classical style: toeshoes, tulle, and traditional en point.

The mood of the program again changed abruptly into "Women".

Five female performers in slips and chemises let down their hair and performed symbolic confessions for each other. The piece celebrated the strength of womanhood while railing against its frustrations.

"Rodeo" followed, a whimsical rendition of the American Old West, complete with square dances and an independent-minded cowgirl.

The "Rodeo" warmed the audience with humor as it cheered the curtain down.

Royal Winnipeg Ballet

Stars of the American Ballet

It is rare when the average Kansan has opportunity to witness ballet performed by a professional company.

K-State's opportunity was Oct. 9 when the McCain Auditorium Series presented "Stars of the American Ballet."

For 45 minutes, the performers danced their way to the high point of the show, Tchaikovsky's "Pas De Deux", performed by Suzanne Farrell and Peter Martins.

International favorites Farrell and Martins have had extensive careers in professional ballet.

Suzanne Farrell auditioned for the George Balachine School of American Ballet on her fifteenth birthday in 1959. After her training, she became a featured dancer with the New York City Ballet and with companies in Europe.

Peter Martins entered the Royal Ballet School in his native Denmark when he was eight years old. He danced with the Canadian National Ballet and the Royal Danish Ballet before joining the New York City Ballet in 1970.

Although Farrell and Martins highlighted the evening, the other "stars" also shone bright, particulary in the first selection of the program.

George Gershwin's "Fascinatin' Rhythm," a world premiere choreographed by Stephen Simmons, exhibited each couples individuality at various parts of the composition.

Unlike traditional companies choreographing with emphasis on unity, the American Ballet dancers are not molded into a certain dance style. They are encouraged to develop individual modes of expression and interpretation.

Although traditional companies have no appearance requirements, physical beauty of American Ballet dancers is stressed, according to program notes.

Costumes were designed to enhance this physical beauty; black leotards and silver helmets were used to create a silhouette effect in the classical dance "The Combat."

The final number, "Solstice", danced to Michael Oldfield's theme from "The Exorcist", also incorporated special effects, but emphasis was placed on dancers' movements to modern contra-rythms.

The program chronology, from premiere to classical to contemporary, left the audience with a collage of modern ballet.

"The Hostage", performed by the Missouri Repertory Theatre, was set in an Irish brothel built in McCain Auditorium for the Oct. 14 "musical play."

The impressionistic setting was an apartment house lobby with boarded windows, a few shabby chairs and a rinky-tink piano.

The production was laced with bawdy, Irish-jig tunes.

> "Never throw stones at your mother,
> You'll be sorry when she's dead . . .
> Throw bricks at the old man instead!"

After one musical number, Pat, owner of the brothel, turned to the audience saying, "Well, that brought the show to a standstill."

Later, he sat down and held his head in his hands, grumbling, "The first act is only half over and I'm already exhausted."

In between song, dance and drink, the audience is introduced to Leslie, a young British soldier captured by the IRA and jailed in the brothel in retribution for the jailing of a young Irishman.

Near the end of the play, it becomes clear that the Britith hostage will die in exchange for the Irish hostage. The Irish brothel becomes a grand central station as the tenants attempt to comfort Leslie, and as Theresa, the lovelorn chambermaid, runs to the police to warn them of the upcoming execution.

The police stage a rescue raid: Leslie is accidentally shot in the confusion. As Leslie lies crumpled on the brothel floor, the cast sings, "Isn't it grand, boys, to be bloody well dead."

The Hostage

Jerry Apodaca

Education, economy and politics are the three essentials society must provide for personal success or failure, New Mexico Governor Jerry Apodaca said at an All-University convocation April 26 in McCain Auditorium.

Apodaca, the first Mexican-American governor in the United States since 1914, believes opportunity exists for all persons regardless of ethnic or social stereotypes.

"Education is the great social equalizer, the balance wheel of the social machinery," Apodaca said, subscribing to Horace Mann's theory.

"History confirms that for us. Just as no nation can be great without education, the same is true for an individual," he added.

Education and economic opportunity allow for the development of political power. Once political power is obtained, even greater strides can be made in all aspects of society, Apodaca continued.

"The educated person is much more optimistic, seeking new ways to become successful," he said. "The uneducated person is marked by indecision, confusion and pessimism."

Our young people, numbering 43 million, are the best prepared generation of Americans ever, yet they grow restless every day as they enter the job market without substantial success. At least they have the tools to compete with, he said.

"Yet, you have been given false expectations throughout life. We always told you that the world was just waiting for your youth, vigor and education, the advantages we never had," Apodaca said.

Apodaca also discussed depletion of energy resources.

"The United States of America has entered an era of limited resources," Apodaca said. "We have left the era of abundance, where energy was abundant and cheap, and technology promised us all we could ever use and misuse."

"We have grown accustomed to electric shavers, air conditioners and gas-guzzling cars," Apodaca said. "They have even become the symbols of the American dream."

"Well, they're not the essence of American life and we were foolish to let them become so," he said. "Hopefully, your generation, as well as the energy crisis, will force us to recognize that."

Clive Barnes

Although Clive Barne's All-University Convocation was entitled "The Plight of the Theater Today," Barnes doubts the "plight's" existence.

"It's not the plight of the theater, it's the plight of the New York theater. Then, it's not the plight of the New York theater, but of Broadway; and then, there's not really a plight," Barnes, New York Time's dance and art critic, said.

American theater is in a healthier state artistically today than it possibly ever has been, Barnes said. The "awful" writers have moved to television and films, leaving the "elites" on Broadway, he added.

Yet, the theater does face difficulties — primarily economic, Barnes said. The cost of producing a Broadway play has skyrocketed. One rea-

son is real estate; Barnes labeled Broadway real estate values "ridiculous."

Theatrical unions also add to the cost of production.

"A great deal of featherbedding (hiring unneeded artists) goes on in the theater," he explained.

The expenses are passed on to consumers and attending the theater has become a "cultural investment." Barnes estimated that attending a Broadway show costs between $100 and $200.

"The whole package begins to add up: dinner, tickets, transportation from the suburbs. 'Shall we go see a Broadway show Thursday night or shall we go to the Bahamas for the weekend?'" he asked.

Because of the cost, people have become particular about the quality of shows they are willing to pay for, Barnes explained. As a result, producers are wary of experimentation, choosing instead the "tried and true" productions.

Broadway has become the shop window for the theater. Successful shows from off-Broadway and London are imported for Broadway productions, he said. The lack of new shows and experimentation on Broadway has taken away the artist's right to fail, he added.

Government subsidization of the arts is needed to assure artists the right to experiment. In turn, this will result in lower costs for theatergoers.

"We need to think of the arts the way we think of education. Those who want the arts can no longer afford them."

Alex Haley

The University Convocations Committee was "purely playing a hunch" when it invited Alex Haley to speak at K-State, according to John Lilley, chairman of the committee.

When the invitation was extended, Lilley said the committee knew there would be a television series based on Haley's book, *Roots,* but had no idea of the impact the series would have on the nation.

"People were moved by the 'Roots' series," Lilley said. "No one ever offered a slave perspective before."

Haley spoke in Ahearn Fieldhouse before a record convocation crowd of more than 4,000. He told of his search for his ancestry, which he traced to the Gambia River in Africa. The nine-year search began in the census records in the National Archives where Haley found records of his great-grandfather.

"I kept thinking I had heard all this before," Haley said of his search through the records. His family history had been passed down by word-of- mouth through seven generations since the slave "Kinte" was brought from Africa by slave traders.

Though Haley's book is the story of his family, "it is no less the saga of a whole people," he said.

"I thought that if one really knew the story of how black people had been brought here, one ought to weep that the thing called slavery had ever happened in the annals of human beings," Haley explained.

Haley stressed the importance of family life.

Families who preserve their histories and hold reunions "speak loudly to their young people," Haley said. "No society is any more than the collective strength of the individual families that make it up," he said.

Lost: tons of sound, Ahearn vicinity

by Ronn Smith

Amidst a host of percussion instruments, a floating piano and organ, synthesizers and a maze of other electronic wizardry, Emerson, Lake and Palmer delivered an electrifying concert to a disappointingly small homecoming crowd of 7,300 Nov. 12 in Ahearn Field House.

Despite a late start and a lackluster beginning, Greg Lake's mastery of the guitar was evident with excellent solos in "C'est La Vie," and "Watching Over You." His voice and guitarwork, perhaps the emotional link between ELP and the audience, remained nearly flawless throughout the concert.

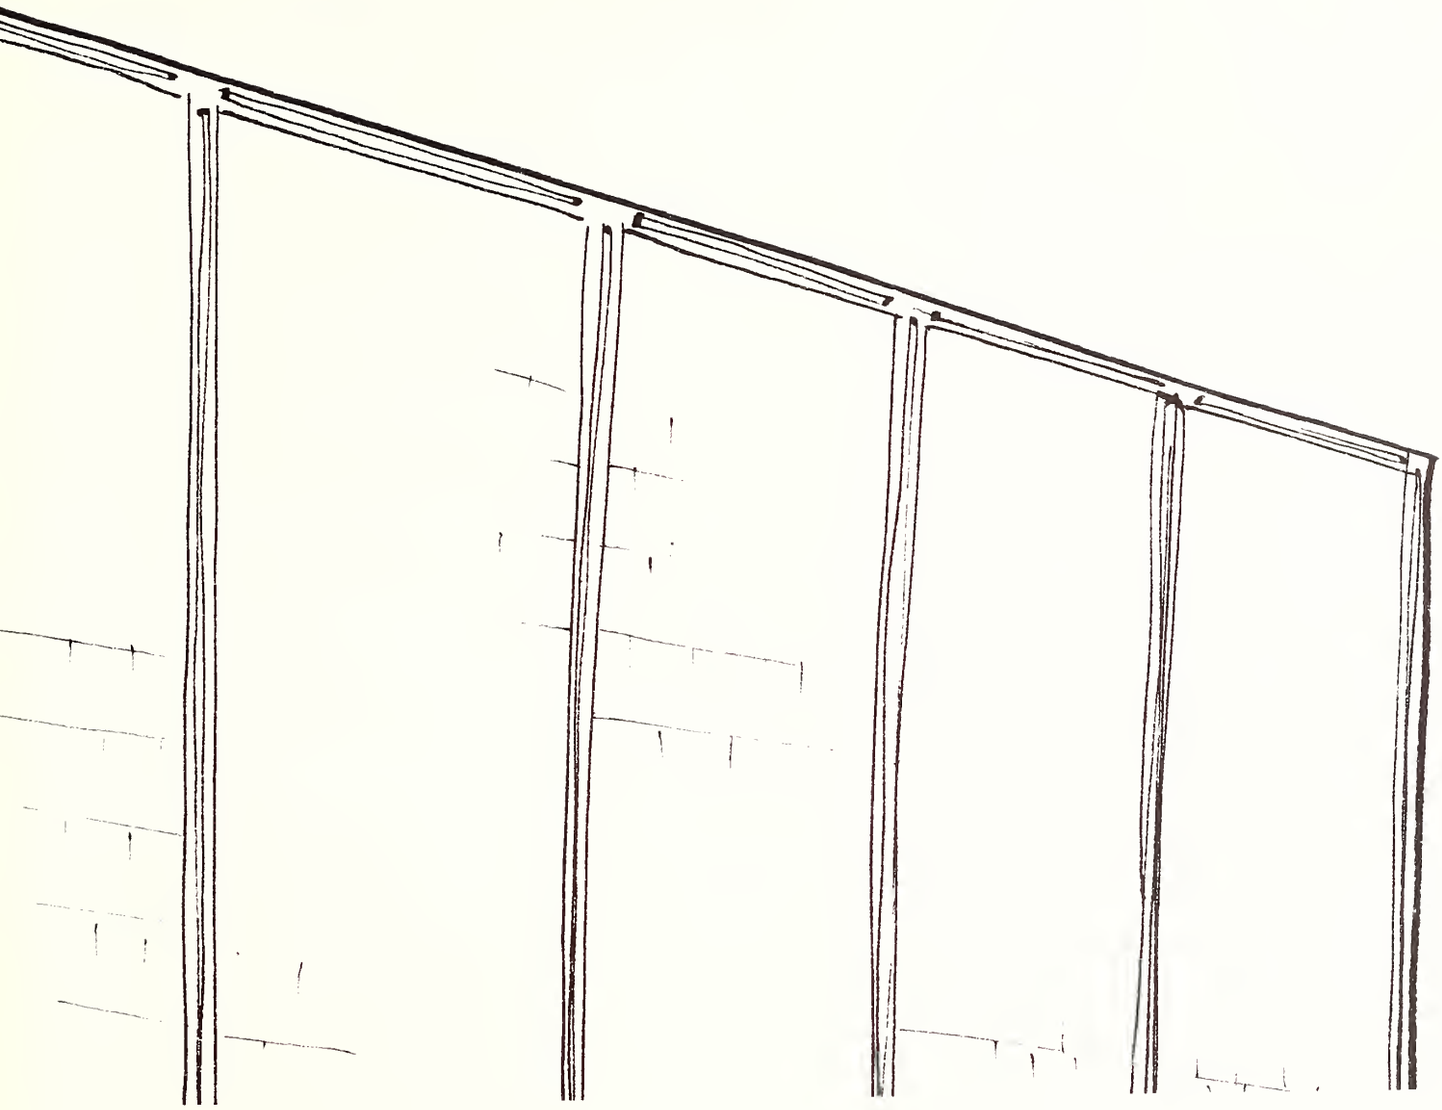
An innovator in the area of percussion, Carl Palmer gave the audience an energetic and commanding performance. His percussive talents were especially evident in ELP's performance of their album cut, "Tank."

Recognized as a technical genius at the keyboard, Keith Emerson soon became the center of onstage activity. ELP's "progressive rock with a lot of regard for the past," Emerson's description, was enhanced by his animation at the keyboard.

The concert was less than entertaining for some, however, despite nearly six tons of sound equipment, Ahearn's inherently bad acoustics again took its toll, providing unwanted echo throughout the performance.

OMD "raise a little hell"

by Pam Grout



The down home friendly flavor the Ozark Mountain Daredevils are famous for was present in everything they did in McCain Auditorium March 25. In two concerts, the Daredevils served their brand of entertainment by way of music and hospitality.

From the start, when the UPC concert committee became concerned about seating, the Daredevils willingly gave two concerts instead of the scheduled one.

Between concerts, they went out of their way to accomodate strangers.

"They were very friendly," Irene Parsons, UPC concert committee chairperson, said. "Other groups had tight security, but the Daredevils let anybody backstage."

Unlike many groups, Daredevil music allows no label. The variety of talents of the musicians adds to a non-stereotyped sound. Because they come from the Ozarks, many assume their Daredevil music would be primarily country. It is laced with a country sound, but the idea behind their music is to avoid any categorization — country included.

The band members live together in Springfield, MO. Their music, inspired by colorful surroundings, speaks of peaceful existence in the Ozarks.

The Daredevils formed in 1971 with several musicians who had been writing separately.

At the K-State concerts, they demonstrated a varied repertoire, introducing some new work.

But at the same time, the Daredevils pleased the crowd with old favorites like "Spaceship Orion," "Jackie Blue," "If You Want to Get to Heaven," and the song first bringing notoriety to the eight mountain men from the Ozarks, "Chicken Train."

...And they're off

by Julie Doll

On a rainy Saturday morning in April, more than 200 persons marched down the muddy banks of the Kansas River carrying 19 canoes. The canoes were placed side by side along the shoreline while teams readied themselves to battle foes and the low waters of the Kaw.

Girls shivered in their canoes, clad only in gym shorts and bikini tops, as their male teammates stroked the water with paddles, impatiently awaiting the start.

Minutes later, the K-State-KU Canoe Race started with a bang. Paddles bumped and canoes collided as teams jockeyed for a favorable position in the knee-deep water.

The rush to be first around the river's first bend often overturned canoes. Dumped into freezing water, the canoers responded with appropriate profanity, gasped and climbed back into the canoes to continue paddling . . . .

. . . . "Stroke! Stroke! Stroke!" a sternsman yelled from the rear of the canoe. The two front canoers leaned forward and then pulled back in unison, using every muscle to get the most pull.

Shortly after the race's beginning, the KU Rogues pulled ahead of the pack. Their $500, flat-water racing canoe proved advantageous as they easily glided by canoes lodged in sandbars.

The Rogues' canoe was an object of awe and contempt. The fiberglass shell weighed about half as much as any other canoe in the race, making it easier to paddle, and sat less than six inches into the water, avoiding sandbars that grounded other canoes. Rival canoers proclaimed the unfairness of the canoe, and wished for one like it in the same breath.

Sandbars plagued the entire race and caused already fatigued muscles to become entirely exhausted. Yells of "stroke!" were changed to "dig" as the canoers drifted into the sand. Large sandbars required the canoers to get out and push the canoe. Cramped muscles were suddenly exercised as the three canoe members trudged through sand and water until they could jump into the canoe and begin the tedious paddling.

Reading the river (determining its channels and where the water was deepest) proved a major factor of a team's success; this was a key talent of the K-State Kaw-Dads.

The Kaw-Dads were in second place throughout most of the morning, but they steadily gained on the Rogues and by mid-afternoon took the lead. The Rogues stayed within striking distance, and pulled into a tie within a few hundred yards of the race's mid-point. Thus ended the first day in a dead heat with the third place team about 20 minutes behind.

St. Mary's marked the mid-point of the race as well as the Saturday night campsight. The weather, however, forced many canoers to go home, and the night was quiet in comparison to the traditional all-night keg parties.

Rivalry and aching muscles were awakened early Sunday morning for the second day of the race. The Rogues and Kaw-Dads left St. Mary's at 7:30, the others following according to Saturday's time.

The Kaw-Dads took the lead at the beginning of the second day, never giving it up. The Rogues stayed close behind until they hit a log in shallow water and tore a hole in the bottom of their canoe. They attempted to patch it, fell to sixth place and stayed there to the race's end.

After 18 hours and nine minutes of paddling, the Kaw-Dads arrived in Lawrence to claim their fourth consecutive first place title. Second place went to the Mad Paddlers, also from K-State, while KU's highest placed team paddled into Lawrence in fourth place.

Winning wasn't everything. Not only was there battle between teams, but between each team and the river. The Kansas proved tricky, often providing neither a channel nor deep water.

"Before the race began, I wanted to canoe two or three times a day. But after one day of digging so much sand, I

didn't even want to see a canoe," a female canoer said.

Another important concern of the canoers was complying to the race's regulations. The rules required members of both sexes to be present in the canoe at all times.

"The organization of it (the race) takes a lot of fun out. Figuring out where the switch points will be, determining if your team has enough girls — or too many, finding out who can take cars ... it all gets pretty hectic," a team organizer said.

Finishing the grueling course was enough accomplishment for some teams.

"I just wanted to prove we could get to Lawrence," one canoer said. Her team entered the race four times before completing it.

"When you begin, you always think you have a chance. But even if you don't win, the atmosphere of the race is exciting. It's a complete change from the campus," a KU canoer said.

Many canoers said once was enough, but many veterans are addicted to the Kaw River rivalry. One newly-wed canoer brought his wife along and a Kaw-Dad member left his job in Peoria, IL, to participate in the race. Nothing justifies missing the race for these fanatics. The canoe races are so successful that two are held each year — one in the spring and another in the fall.

High waters and fair weather encouraged 40 teams to enter the September race, sponsored by the KU and K-State residence halls. (The spring race was sponsored by Miller Brewing Company, Jayhawk Cafe in Lawrence, and Dark Horse Tavern.)

Only residence hall teams were eligible for trophies, but many independent teams, including the Kaw-Dads and Rogues, entered the race.

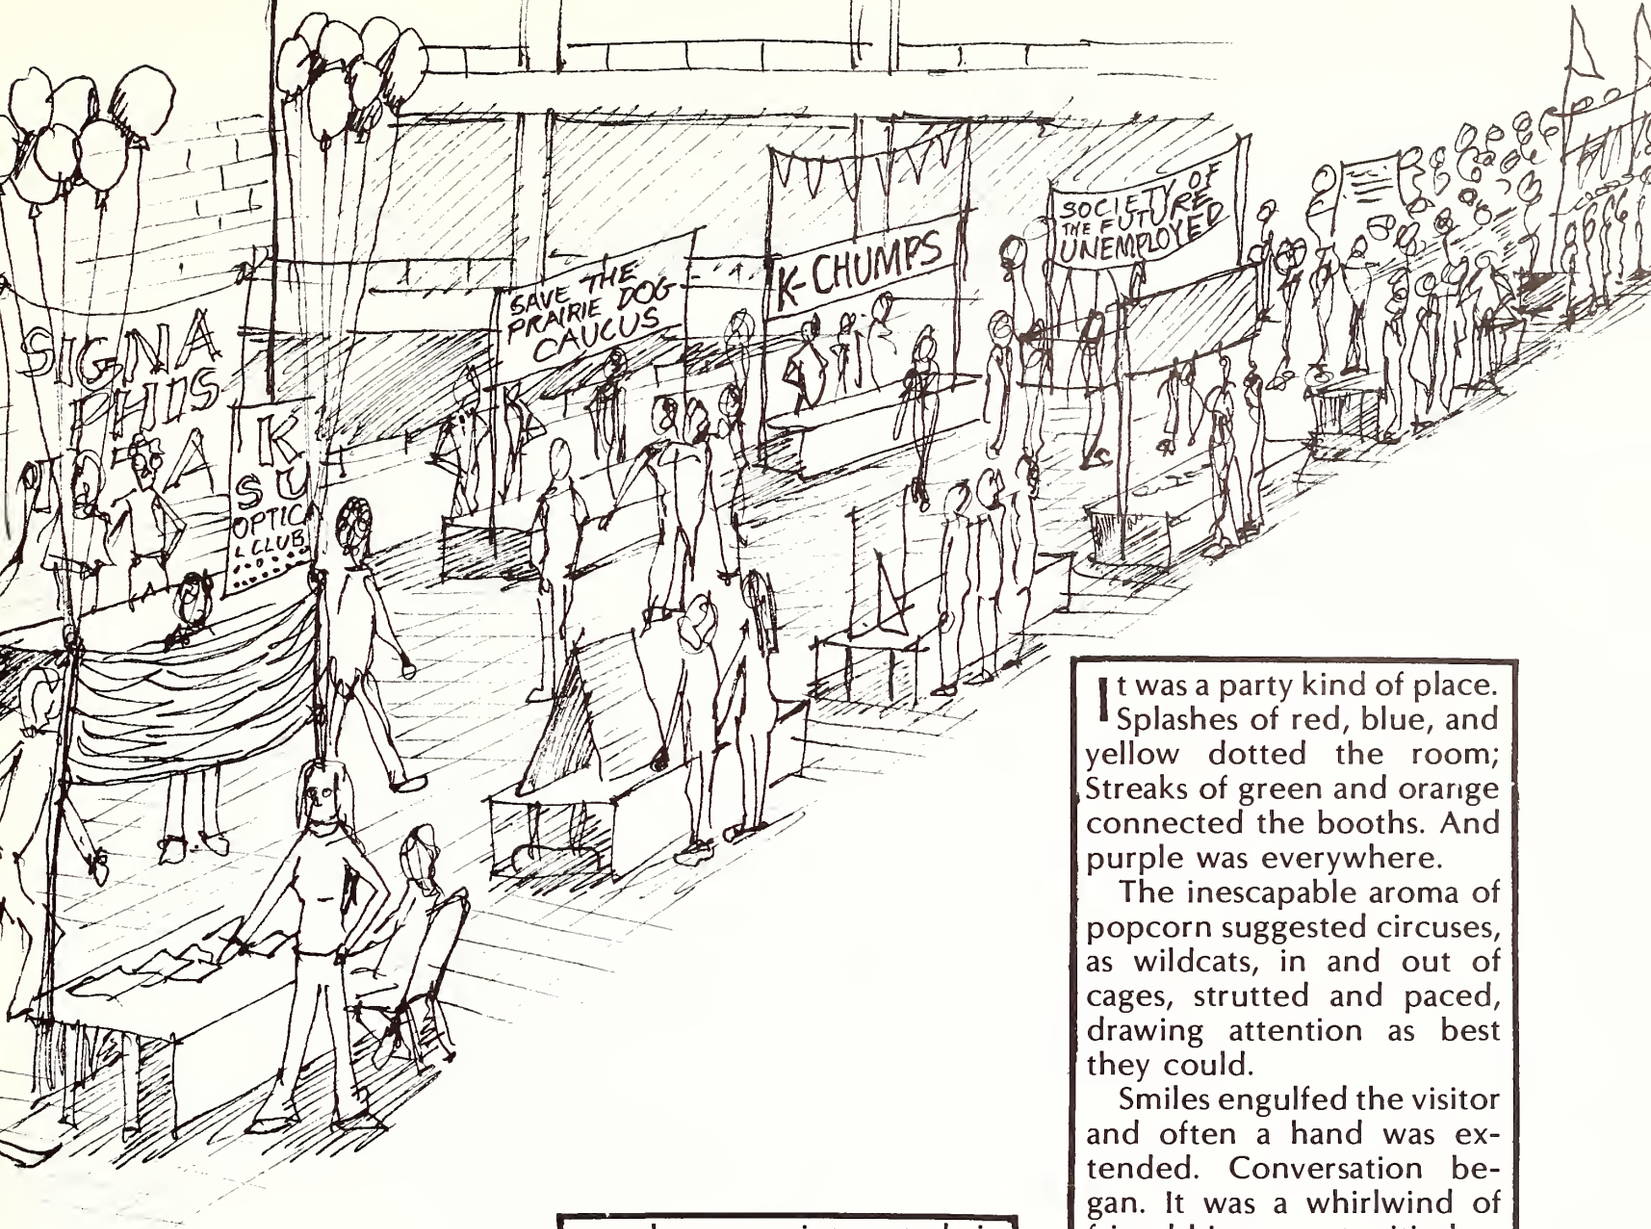
All 40 teams made it to the race's mid-point, "a little unusual," race director Sam Babb said. But only 26 teams finished the race the next day.

They completed the course in about three hours; the Kaw-Dads took 13 minutes longer. Haymaker 4 received the official first place trophy by finishing the race in 14 hours and 30 minutes.

Programming plus

Let's talk about it—a phrase encouraging an exchange of ideas. But sometimes the phrase is lost in the hustle and bustle of campus life, or changed into the "let me talk to you" reality of large lecture classes and campus convocations.

However, "Let's talk about It," a new program sponsored by the UPC Issues and Ideas committee, gave students a chance to participate in open forums. Every other week in the Catskeller, the



forums included such topics as "Let's talk about the Fate of Downtown Manhattan," "Let's talk with President Acker," and "Let's talk about the A/Credit -No Credit issue."

"We thought that K-State needed a program of this type that students could participate in," said Julie Govert, coordinator of the Union Program Council (UPC) Issues and Ideas Committee. "Everyone we talked to thought it would be a good idea, so we decided to do it."

The programs generally drew 50-150 people.

"It was obvious that a lot of people were interested in the program I was involved in," said John Exdell, secretary of the Older Manhattan Neighborhoods Association.

"Students welcomed the opportunity to hear opposing views and to participate in discussion. I hope many more programs of this type can be done," Exdell said.

And what of the future — will the "let's talk about it" concept of exchanging ideas continue?

"I'd like to see it continue," Govert said, "but it depends on future coordinators of Issues and Ideas. I think there's a need for this type of discussion on an open basis, but who knows, maybe someone will have an even better idea."

It was a party kind of place. Splashes of red, blue, and yellow dotted the room; Streaks of green and orange connected the booths. And purple was everywhere.

The inescapable aroma of popcorn suggested circuses, as wildcats, in and out of cages, strutted and paced, drawing attention as best they could.

Smiles engulfed the visitor and often a hand was extended. Conversation began. It was a whirlwind of friendship opportunities!

And so many choices. Boggling.

The medium of exchange was time, academics allotting weekly allowance. Smiles beckoned for time committments to attend movies or to parachute or to dance or to play rugby or to see a play or to cook or to create a T-shirt.

The extended hands reaching for calenders, space open for Big Brothers, Big Sisters, advertisers, scouts, honor students or crisis counselors.

And in three hours, the party broke up into individual colors floating to the floor.

It's fun. It's annual. It's K-State's Activities Carnival.

Autumn shuffle

by Susan Redding

It was the end of the week and there was a down-home hoe-down at the town meetin' place. Everyone was dressed to shuck corn, but shucks, the bluegrass band made foot-stompin' the best for miles around.

And on the high-rent side of town, the night was dark and misty. Focus was on the high-rise Derby Hotel.

In the back room, Diamond Jill clung to the man of attention. In the thick of the red and the black, he was intent on his business, craps; she was debating the big question.

The room was smoky and the lights were low. The tables were crowded and the dice were hot. Diamond Jill knew time was running out: the cards were dealt, the deck was stacked, she still didn't understand.

The chorus line was lining up — she had to ask now or the question would be forever lost.

"Excuse me, but what is this all about?"

The dealer looked up, amused.

"Fall Follies," he said. The chorus line broke into cheers and song.

Free for all

by Kathy Huffman

K-State might not be first in football but it is first in Spring Fling.

Originating at K-State, Spring Fling is known nationwide, Michelle Cochran, 1977 Spring Fling secretary said.

"It's the final fling," Maggie Vining, former committee member, said. "After that, finals set in and studying becomes a necessity," she added.

It's also to "get students together to mix and to get to know each other. It's to have fun in a non-dating situation," Mable Strong, Spring Fling advisor said.

Effort to unify the dormies was exemplified in this year's theme, "We're Hall in This Together."

The traditional Saturday afternoon activities attracted the largest number of participants.

Decorated bed frames manned with riders and pushers paraded through Aggieville and raced through campus Saturday just before noon. Opposing teams threw water balloons at the competition, often the balloons accidentally hitting spectators.

The finish line was near Danforth Chapel where dormies congregated for a picnic.

Friendly competition reigned in tug-of-war challenges and jello-snarfing contests. Silly and juvenile perhaps, but an escape from the seriousness of studying and classes.

Earlier in the week, Sweet Sassafrass catered to ice cream lovers. For a mere 30 cents, one could garnish ice cream with red hots, nuts, whipped cream, and chocolate.

Other evenings were filled with dances, free movies, and an all-nighter at the Rec Complex.

A rendition of a popular television series, "The Gong Show," featured the talented and the absurd Thursday night. An estimated 400 residents helped judges dole out a loving cup to the most talented, and a mounted donkey's ass to the most entertainingly untalented.

Freddie Fraternity? . . . Or is it Suzie Sorority?

"It's all Greek to me!!," was the theme for Greek Week, March 26-April 1. An annual event, Greek Week offers fraternities and sororities time to become better acquainted, have fun and raise money.

Greeks are traditionally known for entertaining fund-raising projects. Greek Week '77 was no exception. One such activity was the Suzie Sorority-Freddy Fraternity Contest, with proceeds donated to the Children's Zoo in Manhattan.

"We thought that since there is no Homecoming King and Queen contest anymore, it might be fun to get representatives from the houses for a Suzie Sorority-Freddy Fraternity contest," Donna Towers, contest chairperson, said. "Contestants were told that they could dress as far away or as close to their idea of the typical

by Ronn Smith

Suzie Sorority-Freddy Fraternity as they wanted.

"Some couples wore formals and suits, and some wore the typical painter pants and rugby shirt," Towers said. "One couple even dressed the guy like Suzie Sorority and the girl like Freddy Fraternity."

Pictures of the couples were taped on mason jars and displayed in the Union. Ballots determined winners, one penny equaled one vote. Ironically, the winners did not have their picture on the jar.

"They won the contest, so maybe that means that no one really knows what the typical Suzie Sorority and Freddy Fraternity look like," Towers said.

An exchange dinner was planned to better acquaint Greeks. Representatives from each house visited other houses for the dinner.

Chapter presidents and alumni representatives participated in a leadership banquet. Glee Smith, Chairman of the Board of Regents, was the featured speaker. Entertainment was provided by the K-State Jazz Ensemble.

The Thirteenth annual Derby Day, sponsored by Sigma Chi, contributed $700 to Sigma Chi's national philanthropy, the Denver, CO, Wallace Village for Children with Minimal Brain Damage.

"The objective of Derby Day is to have fun and earn money for the Wallace Village," said Mike McCoy, Sigma Chi president. "Sororities raised money with projects such as a T-shirt sale and proceeds from a Mother's Worry function."

The highlight of Greek Week came with the Greek Follies. A large audience gathered in McCain Auditorium to watch five groups of houses present nearly two hours of entertainment.

"The theme of the Follies was 'Media, it affects the mind,'" said Brian Rassette, co-producer of the Follies. "The groups began practicing February 1 and practiced two or three times a week until April 1."

All acts were take-offs of the Mass Media, with titles such as "Welcome Back Potter," "Newsroom Blues," and "TV Can Drive You Mad."

"The Follies are definitely good for relations with other Greeks," said Jane Schultz, participant. "It takes a lot of work — probably too much, sometimes — but it's a lot of fun. I'd like to see it get even bigger and better."

Summerstock playground by moonlight

by Pam Grout

It's the mingling of the cricket's chirp, the Big Dipper, a light breeze and bug spray that makes Arts in the Park special.

In the average week, Manhattanites could grab their lawnchairs and head to the city park for an enjoyable open air show on six out of seven nights.

In most cities the only free summer concerts are what the insects provide but in Manhattan, there is something for everyone.

Fireworks, puppets and magic delighted children; dance troupes, movies and jazz bands completed the spectrum of summer programming.

This summer's extravaganza, in its fourth season, evolved from a summer of one concert a week. Sponsored by the Manhattan Recreation Commission, Arts in the Park has grown every year since that first seven-week concert stretch. New technical equipment was added this year, and a better location was chartered.

"There was too much traffic where the stage used to be," Melinda Melhus, media coordinator for the recreation commission said. "I think it's a lot prettier — more trees — in the new location."

Along with improvements on the technical end came improvements in the show bill. Bigger and better groups came to Manhattan this year.

The Free Street Theater of Chicago, Tommy Dorsey and his orchestra, the Summer Jazz Festival and the National Fiddling Champions were just some of the highlights of the 1977 summer season.

"We're getting a name. Acts who came here will tell other acts about our big summer programs. They'll write and offer to perform," Melhus said.

Since the acts are improving and an average of 400 people a night attend without admission charge, the recreation commission is resorting to financial assistance from grants and the K-State music department to help supplement their allocated budget.

Momentum is growing. The founders of Arts in the Park have asked to help kick off similar programs in other communities.

"Ours is one of the first in the Midwest," Melhus said. "We're the only open air theater in the Midwest that operates full-time."

Full-time operations began June 1 and ran throughout July. This summer, Monday night Walt Disney movies were continued through August.

"The concept of Arts in the Park is free family entertainment," Melhus said. "We don't guarantee that everybody will like everything. But our hope is that everyone will find a few things."

Doobies dazzle campers

"Instant Town-Founding Formula"

1) an area of land, preferably near the K-State Union
2) Ticket sale to the Doobie Brothers concert
3) Doobie Brothers concert
4) Doobie Brothers

This formula has been tested at the prescribed site and proven effective. Doobie fans pitched as many as 37 tents and waited for the ticket booth to open.

Ticket sales were overwhelming with about half the available tickets sold by closing time. Clearly the April 30 concert would be well received by the K-State audience.

As the Doobie side-kick, Foreigner presented English-style hard rock. Their clear, crisp sound entertained a Doobie-anxious crowd.

The group justified the anticipation. Known as master showmen for technical effects as well as their music, the Doobies left the crowd roaring and stomping for more.

"We try to make a concert like a symphony. We try to think of the entire concert as one complete statement," Pat Simmons, lead guitarist, said.

"We don't like to just blow people away," he continued. "You try to bring the crowd to a peak, then slowly bring them down, then back up."

One flaw in the "Formula" is lack of appropriate facilities for such groups. Performing in Ahearn Field House restricted the Doobies and imposed vibrations that all but destroyed their style.

Excepting Ahearn, the first-class concert rated high on the charts at K-State.

Sports

Fans remain thick

K-State football fans — those crazy, outrageous, loud-mouthed, purple-clad people — refuse to quit.

"Bring Back the Purple," was the theme in 1977, and most K-Staters obeyed. KSU stadium wasn't the sea of color you'll find at Nebraska or Oklahoma, but Wildcat fans showed pride by wearing purple. Despite the fact K-State didn't exactly turn their football program around, fans displayed color and pride in a manner reminiscent of the early '70s when the 'Cats won more than they lost and were never embarrassed by any team.

The 1977 team played well, but not well enough to make an impact in the Big 8, regarded by many as the toughest football conference in the country.

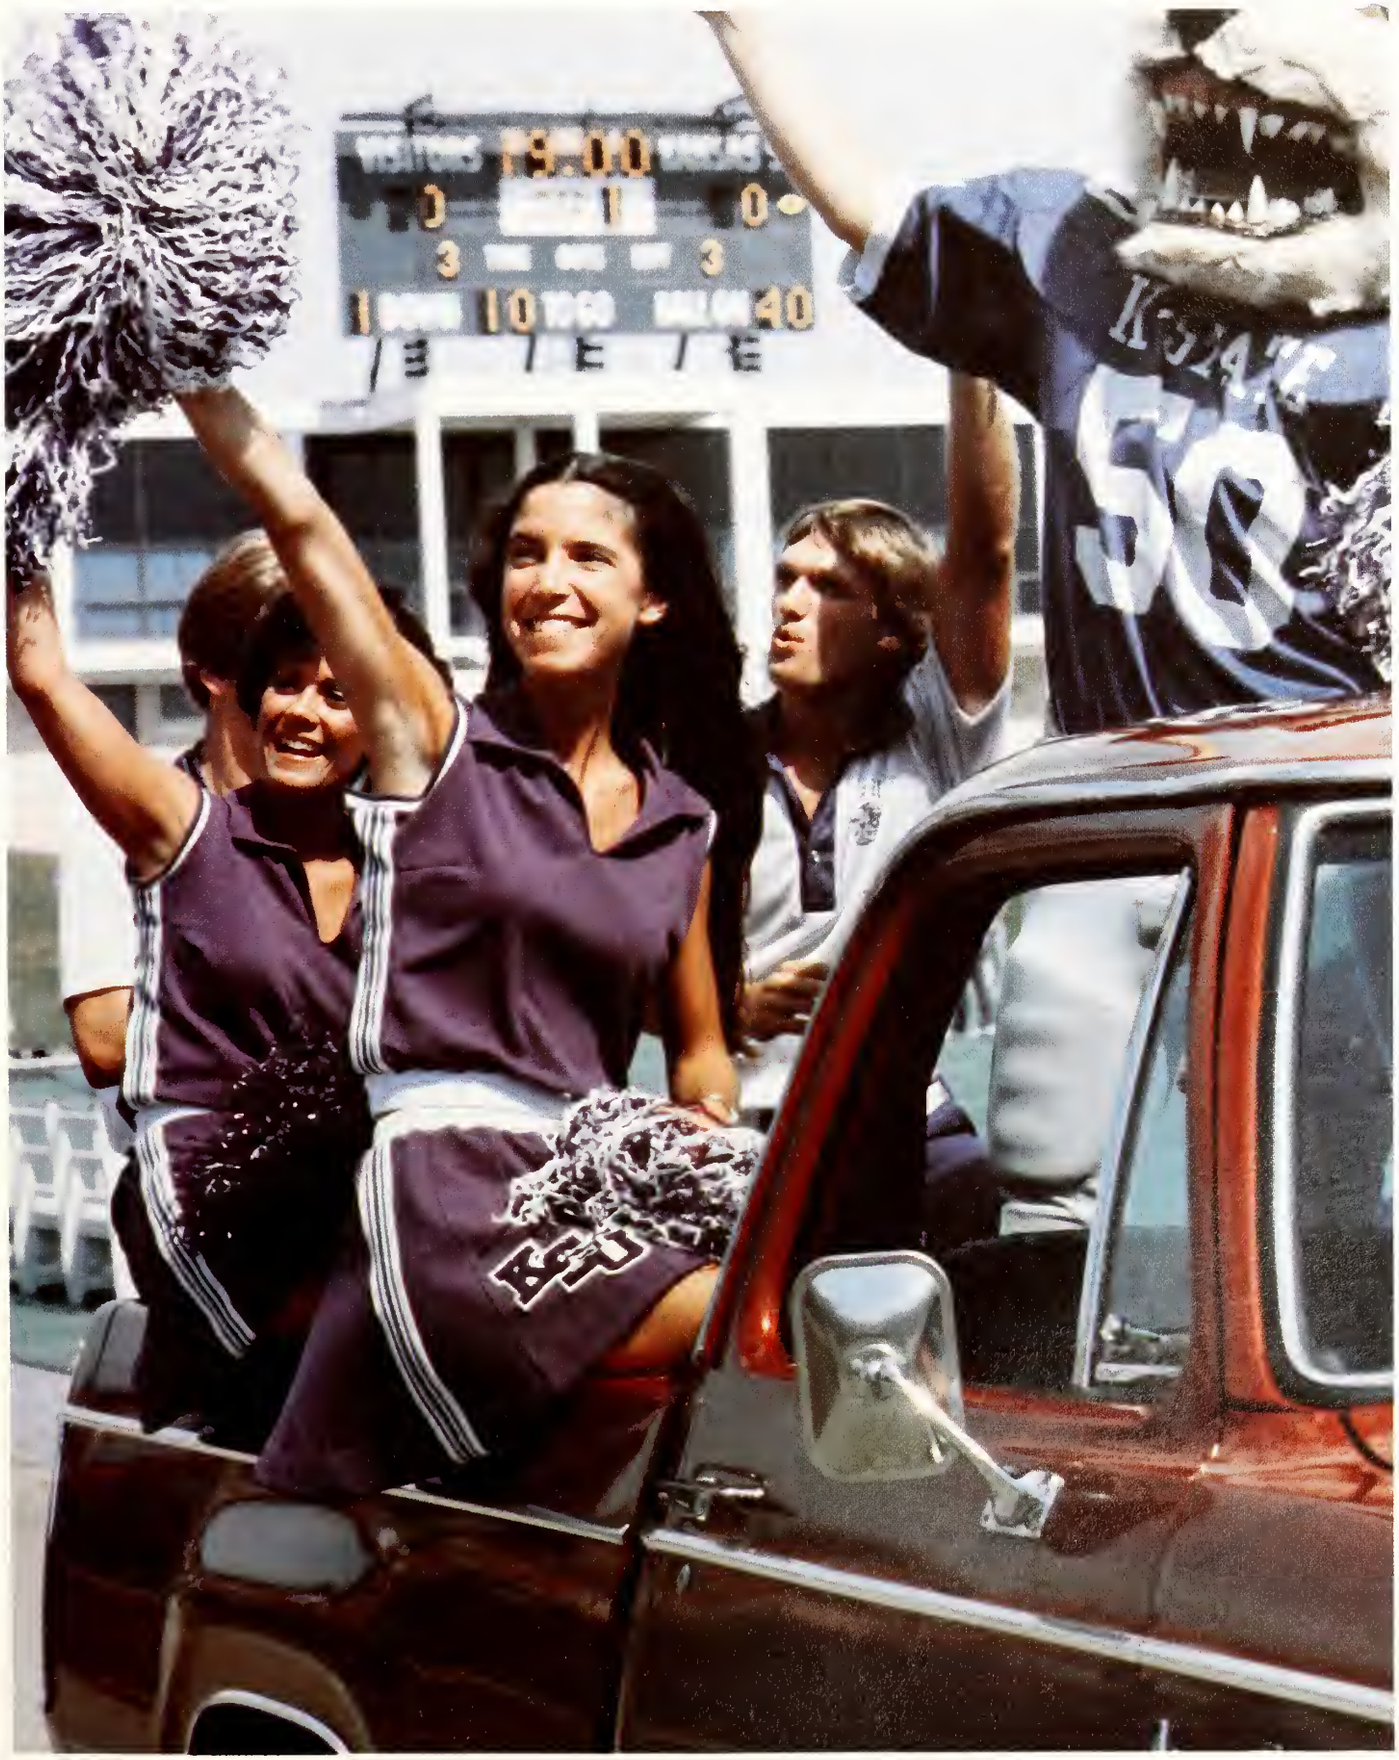
It was another year of near wins and "moral victories." The frustration of 1976 returned several times when the 'Cats played well, but lost. Moments of brilliance, on both offense and defense, entertained avid fans.

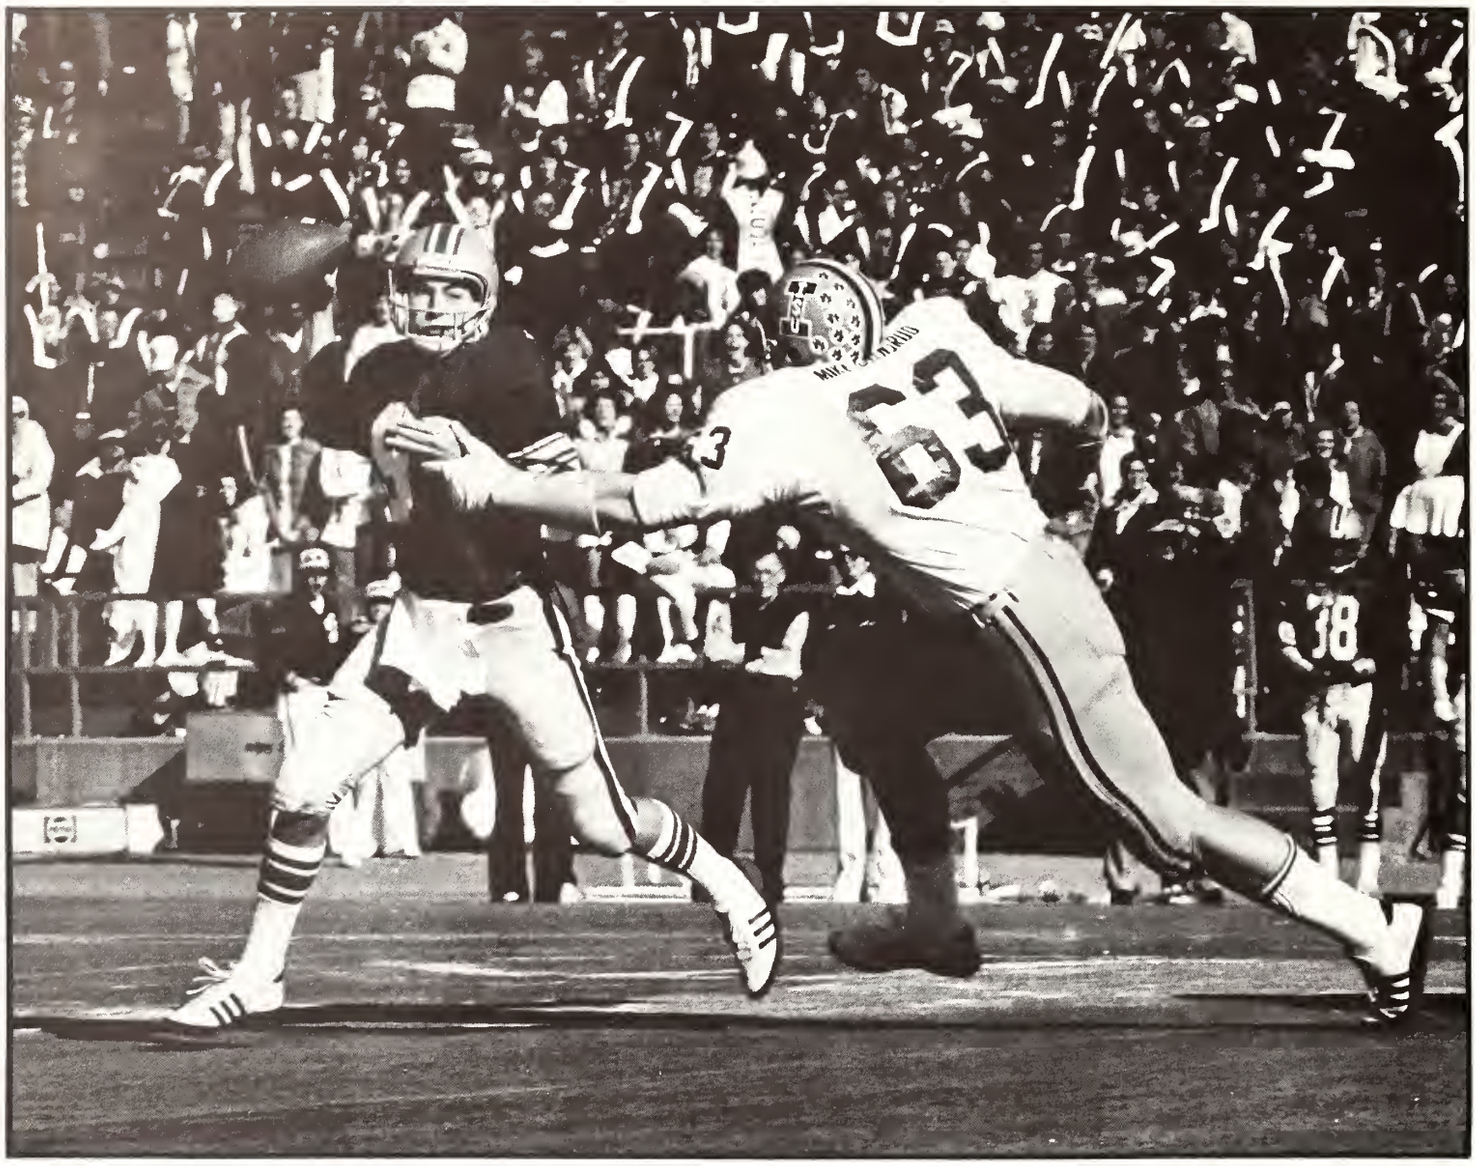
These moments served to make K-State look respectable against perennial conference powers.

"You have to get close before getting over the top," Coach Ellis Rainsberg said. K-State football in 1977 was close, as the 'Cats gave a scare to many teams.

And, the never-say-die fans were there to help out. When K-State football finally goes "over the top," the fans will be there to "Bring Back the Purple."

through thin





Football

"Surprise" and "disappointment" were words head coach Ellis Rainsberger used to describe K-State's first football game of the 1977 season against Brigham Young. Disappointment was a common feeling around Manhattan, as the Wildcats stumbled through a 1-10 record, a virtual repeat of the '76 season.

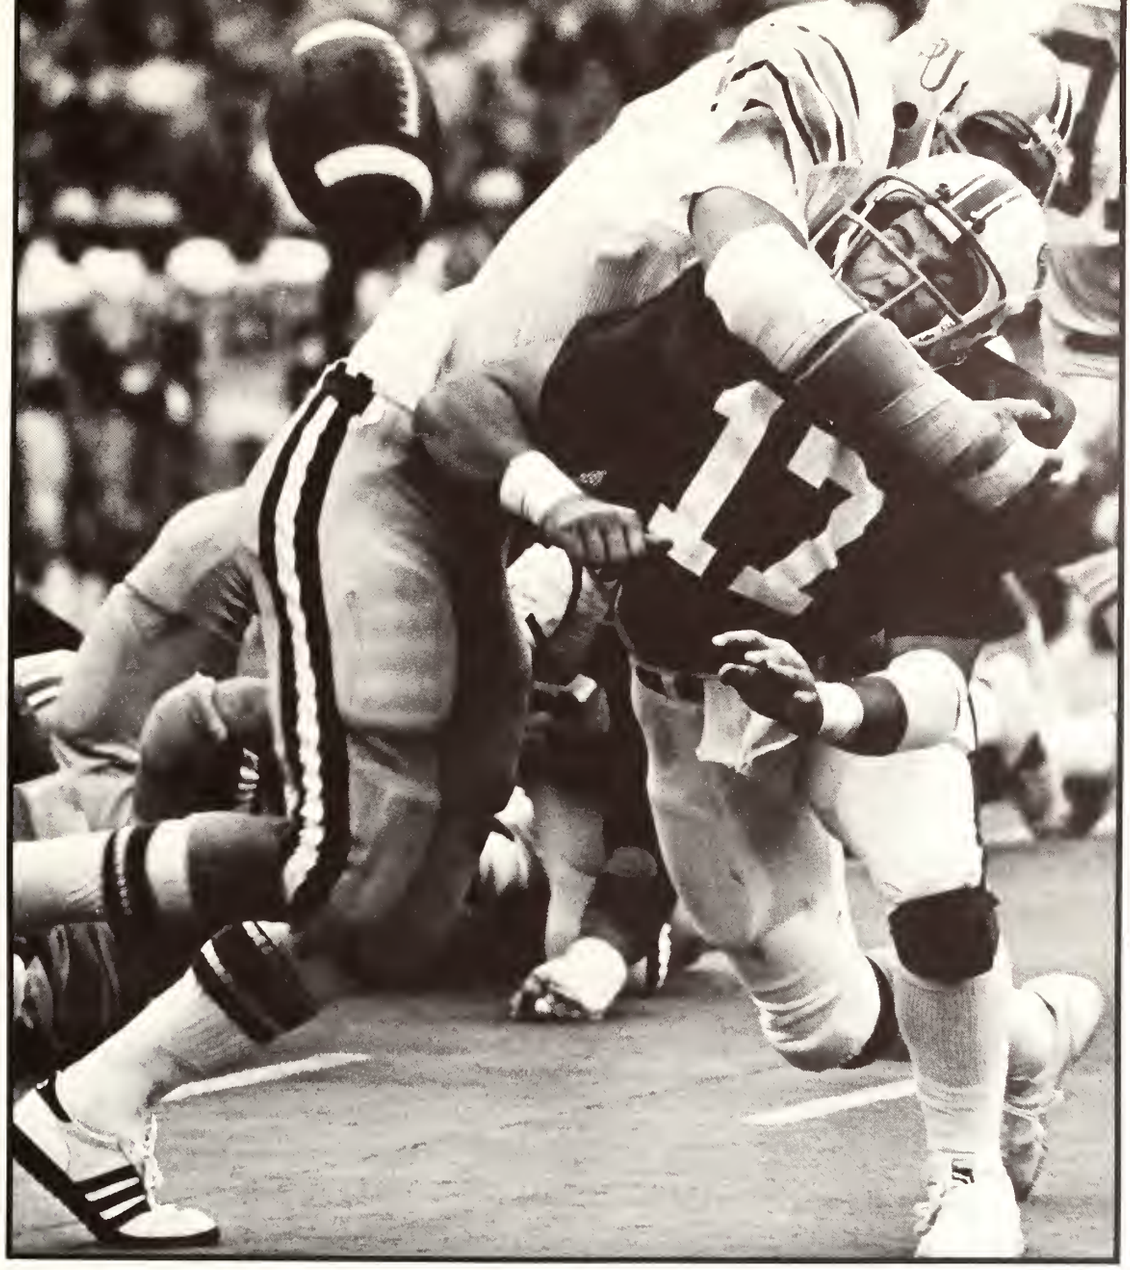
Brigham Young, led by quarterbacks Gifford Neilson and Marc Wilson unleased a powerful passing attack and completed 37 of 55 passes for 144 yards, crushing K-State 39-0. The tone was set for the entire game when Ken Lovely fumbled on the first play and BYU scored a field goal two minutes into the game.

The only bright spot for the 'Cats was the passing of Dan Manucci, who threw for 182 yards. The ground game never got in gear, as Mack Green led all K-State rushers with 21 yards.

"We just got whipped," Rainsberger said.

K- State's offense, which returned several starters, including quarterback Wendell Henrikson, from the '76 squad was still unable to move well in its second game, Sept. 17 against Florida State.

The 'Cats were first on the scoreboard when Greg Brown blocked a Seminole punt and ran it 50 yards for a touchdown. In the third quarter, the Seminoles gained an 8-7 lead when quarterback Jimmy Jordan hit wide receiver Mike Shumann with a nine-yard touchdown pass. Shumann was also the target in Florida State's successful two-



Far Left- Quarterback Wendell Henirkson. Left- Linebacker Gary Spani.

point conversion pass.

The Wildcat offense sputtered after Brad Horchem intercepted a Jordan pass and returned it to the Florida State 48. The 'Cats were able to drive the ball to the two-yard line, but had to settle for a Kris Thompson field goal when Florida State's defense held.

Later in the fourth quarter, the Seminoles scored on a David Cappelen 17-yard field goal that made the score 11-10.

Florida State made the final score 18-10 on a 37-yard pass from Jordan to Shumann.

Rainsberger said he was proud of the defense, especially Brown and linebacker Gary Spani. Spani intercepted a pass, recovered two fumbles and had nine unassisted tackles.

The Wildcat offense surged in the second half against Wichita State, Sept 24. K-State's 21-14 victory was the first win since the second game of the '76 season.

After trailing the Shockers 14-0 at halftime, the K-State offense scored on a 7-yard run by Ken Lovely in the third quarter. Two series later K-State took over on the Wichita 16. A 44-yard pass from Henrikson to Charlie Green put the ball on the two, and on third down, Henrikson threw to tight end Paul Coffman for the score. Thompson added the extra points on both touchdowns.

The Wildcats made the score 21-14 when a Wichita snap went over the punter's head and Mike Osborn recovered the ball in the end zone.

"I'm extremely happy and proud not only of the win, but the way it came about," Rainsberger said. "They stayed together and played together.

The K-State offense picked up where it left off with eighteenth ranked Mississippi and accumulated 481 yards, yet lost 24-21.

"Our offense was good enough to win the game," Rainsberger said. Mack Green rushed for 181 yards on 37 carries and Henrikson passed for 131 yards, completing nine of 18 passes.

K-State fell behind when a Henrikson pass was intercepted and Mississippi State's Dave Marler kicked a 41 yard field goal three plays later.

The 'Cats took the lead with 53 seconds remaining in the first half on a 7-yard run by Green. Thompson's kick made the score 7-3.

Mississippi State took the lead at halftime as James Doss took the kickoff following Green's score and returned it to the Wildcat 10-yard line. Five plays later, Len Copeland scored on a 2-yard run.

The second half was a see-saw battle, with K-State retaking the lead after a 91-yard drive with eight minutes left in the game. MSU had kicked a field goal in the third quarter so the score was 14-13, with the 'Cats leading.

Football

Another MSU field goal made the score 16-14, but the 'Cats weren't through yet. With 3:19 left in the game, Tony Brown scored on a 20-yard run that put the 'Cats ahead 21-16.

However, the Wildcats' hopes were crushed when Mississippi took the ball on their own 25 and marched 75 yards for a touchdown, capped by a 24-yard pass to fullback Dennis Johnson.

The Big 8 schedule began for K-State with a home game against Nebraska. For the third straight year, the Wildcats were unable to come up with a single Big 8 win.

The Cornhuskers' I.M. Hipp destroyed the 'Cats with touchdown runs of 66 and 82 yards, accumulating 217 yards for the day and leading his team to a 26-9 win.

K-State scored first on a 51-yard field goal by Thompson, but things went downhill from there. Hipp's 66 yard run and a Billy Todd field goal made the score 10-3 at halftime. Then, on the first series of the second half, Hipp took off on an almost identical play and ran 82 yards foı the score.

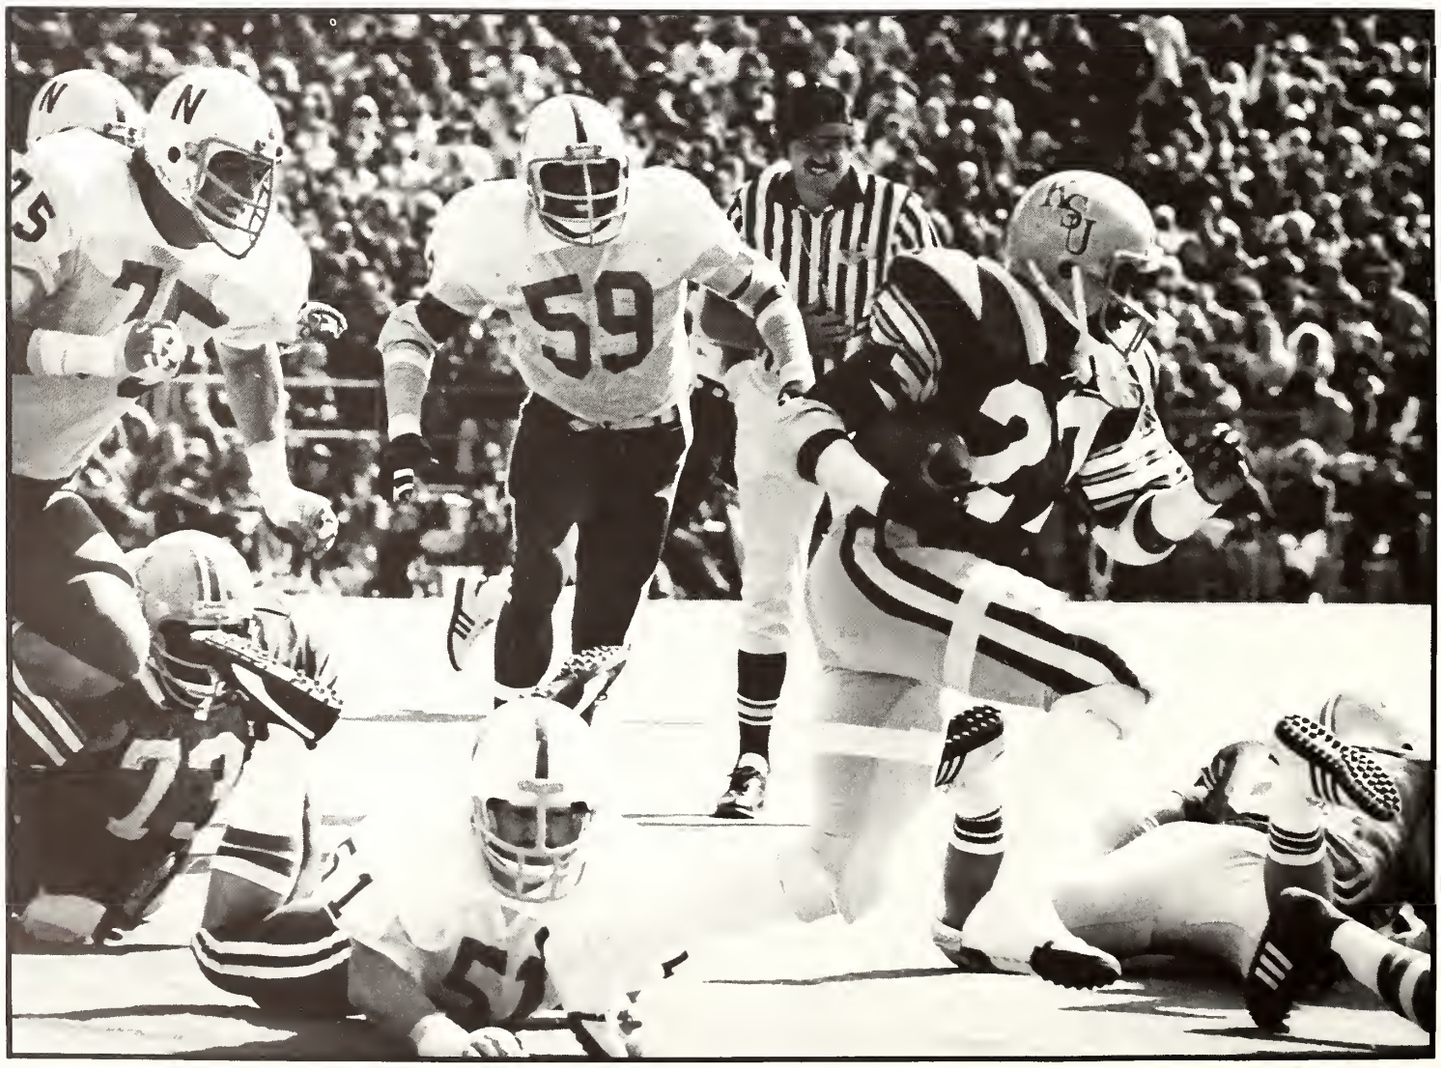
The Wildcats scored in the early minutes of the fourth quarter on a pass to Coffman, but were unable to score again. Another Todd field goal with four minutes left in the game and a 27-yard run with 21 seconds remaining completed Nebraska's scoring. The powerful Nebraska defense held Green to 52 yards rushing and held Henrikson and Manucci to 96 yards passing.

K-State held Oklahoma State's All-American tailback Terry Miller to 118 yards, but were unable to capitalize on their scoring opportunities and lost 21-14.

Three times the 'Cats were inside the Cowboy 15-yard line and were unable to score. Mack Green scored both K-State touchdowns, on runs of 2 yards and 85 yards.

"We played for the win," Rainsberger said. He referred to his decision to try for a first down on a fourth and 10 at the cowboy 40-yard line.

"We could have punted on fourth down and put them in a hole instead of giving them the ball on the 40, but we came down here with a commitment to ourselves to win this football game," Rainsberger said. "We gambled and lost."



The Missouri Tigers led 21-0 at halftime and coasted to a 28-13 victory over K-State Oct. 22.

Missouri quarterback Pete Woods passed for 205 yards and one touchdown. Wildcat scoring came on an 89-yard touchdown pass from Manucci to Coffman, and a 7-yard run by Lovely. Manucci passed for 166 yards, but the 'Cat ground game was almost non-existent with Green leading with only 19 yards.

Oklahoma's Thomas Lott scored three times to rout the 'Cats 12-7.

"It was totally embarrassing not to be able to do anything," Rainsberger said. The only bright spot for K-State was a 47-yard touchdown by Homer Thomas after intercepting a Dean Blevins pass. Thompson added the extra point to complete K-State's scoring.

The Wildcat offense piled up 422 yards, the most ever against the Kansas Jayhawks, but were again unable to get the job done, losing 29-21 in Lawrence Nov. 5.

Kansas led 21-0 in the third quarter scoring on a 13-yard run by Billy Campfield and a 6-yard run by Brian Bethke in the first half and a 71-yard run by Max Ediger on the second play of the third quarter.

Mistakes again killed K-State as Mack Green fumbled on the Jayhawk 6-yard line on the first Wildcat possession of the second half. However, the 'Cats didn't give up, as they quickly scored on a 51-yard plunge by Lovely at the end of a 59-yard drive.

After recovering a KU fumble, the 'Cats drove 72 yards and scored on a two-yard run by Ray Butler to make the score 21-15. The two-point conversion was complete to Manzy King.

When K-State appeared to be mounting another drive, Green fumbled again, recovering the ball but coming up short of the first down on the fourth down play. Henrikson threw an interception on the next series and KU quickly took the ball eight yards for the score. The two point conversion made the lead 29-15 and the 'Cats were unable to catch up.

K-State came close but lost again in their tenth game, as Iowa State scored on their first possession in the fourth quarter, when Jeff Curry ran 29 yards for a touchdown. The scoring ended when K-State's Ray Butler scored from the one to cap an 80-yard drive. Gary Spani again played brilliantly, making 25 tackles and recovering one fumble. But the 'Cats played emotionally "down" following Rainsberger's resignation the Thursday before the game.

Rainsberger's final game at K-State was another dismal Big 8 loss, this time to Colorado, 23-0.

The Buffalos scored on the field goal by Pete Dadiotis, two touchdown runs by James Mayberry, and a 72-yard run by Gary Washington.

The game was the last for several K-State seniors. Charlie Green made eight receptions and ended the season as the conference's leading receiver. Spani made 16 tackles to finish the season with 169. Spani was named Kodak All-American and All-Big 8 in both UPI and AP polls.

Rainsberger resigns

by Chris Williams

In the wake of Vince Gibson's resignation after the 1974 football season, the search began for his replacement.

Countless people were interviewed, scrutinized, examined and tested. The search committee was careful about what it was in a coach they were looking for, and after an exhaustive search, the committee said they had found the man who would bring K-State up from the depths of oblivion.

The new head coach was a red-haired young man, with a set of piercing blue eyes that made him look paradoxically gentle in a violent man's world.

His square jaw would seem to grow larger whenever he smiled and his laugh was boisterous and free, one that even a sad man would have to laugh along with.

The man was Ellis Rainsberger, by no means a stranger to K-State athletics.

Rainsberger had been a standout at K-State from 1956-57 as he made the All-Big 7 team both years. He was also only the third K-Stater in the school's history to be named to the academic All-American team.

After stints as a coach at Washburn and at the University of Wisconsin, Rainsberger decided that he would like to return to his alma mater.

When Gibson resigned following a 4-7 record, Rainsberger was hired and immediately the dreams began to flow.

Rainsberger dreamed of a contender, a team that would challenge the likes of Oklahoma and Nebraska, a team that K-State fans would be proud to say they cheered for.

And Rainsberger began to make that dream materialize.

He had his staff hit the recruiting road to convince young players that K-State was the place to play football. The players that K-State could offer an outstanding curriculum along with the reputation of playing in the Big 8.

And slowly, Rainsberger began to build. He recruited running backs with blazing speed, quarterbacks with strong, long-range arms, and linemen that were fast enough to chase speedy running backs.

The first year was fair for Rainsberger, by K-State standards. His team won three games and lost eight, a mark that showed promise of becoming better the next year.

But the second year of Rainsberger's tenure proved to be both a major disappointment and setback. His team complied a 1-10 record and still had not yet won a Big 8 conference game.

But Rainsberger and his staff refused to say die as they hit the recruiting trail harder than ever, capturing a flock of young running backs and lineman from both high schools and junior colleges.

The year started on a disastrous note. Brigham Young completely demolished the Wildcats in Provo. The 'Cats returned home to give Florida State a scare but came up on the short end once again.

After winning their first game in Wichita, the team appeared to brim with confidence and enthusiasm as they faced Mississippi State. The game seasawed until the final two minutes when Mississippi State scored to put an end to the Wildcat's upset hopes.

The game seemed to be a turning point because the

Wildcats played well in all except two games, Oklahoma and Colorado.

Behind it all, Rainsberger continued to instill the confidence and determination needed by any team to become a winner, and often K-State looked like a top-class football club.

But the combination of little money and the lack of a winning tradition served as major detriments and the team was unable to win another game and finished the season with another 1-10 record.

But during the dismal season, Rainsberger and his staff knew that patience would be the key to the K-State football program. They knew they had potential to be a contender with any team and that Rainsberger's dream of being a top team could be realized as early as next season.

But the pleasant dream turned into a nightmare for Ellis Rainsberger.

A walkout on October 30 by 21 freshman football players served to fan the flame of controversy for Rainsberger. They cited dissatisfaction with the coaches and the program.

In a junior varsity game against Kansas, it was incorrectly reported that two players who had scored touchdowns were in fact other players.

A "cover-up" was expected and Rainsberger was the accused. But he denied trying to cover-up anything and he apologized to the media for the mixup.

On November tenth, Ellis Rainsberger was told to resign immediately and finish the season as head coach, or be fired and not finish the season.

Jersey Jermier said he did not give the head coach an ultimatum but said Rainsberger thought it would be in the best interest of K-State that he resign.

But those who knew Ellis Rainsberger knew he was not a quitter and they could not imagine him quitting when he had accomplished enough to possibly make K-State a contender next season.

His dream had vanished. He finished the season with his usual class. He concentrated on upcoming opponents, guided his players and acted as if there was nothing wrong.

But beneath the facade, there lived a man who was heartbroken that he would not be able to finish what he had started. He was saddened that he could not help the young players finish their careers and upset that the work he had started and put sweat and tears into had been in vain.

But he was too classy to let anyone know it bothered him. Even in the face of public embarassment, he still said he had utmost respect for K-State and he wished them the best of luck in the future.

But no one seemed to care about Ellis Rainsberger. He had become a forgotten man and fans eagerly awaited the announcement of the next K-State coach.

. . . Dickey Takes Over

"I'm totally and completely confident without reservations that we can do an outstanding job at Kansas State University," K-State's new head football coach, Jim Dickey said. "I'm the luckiest guy in coaching."

With this confidence and enthusiasm Dickey came from the defensive coordinator position at North Carolina to try and resurrect a K-State football program that hadn't won a conference game in three years.

Dickey took over the job from Ellis Rainsberger, who was only able to win five games in his three-year stint as the Wildcat head coach.

Dickey brought with him an impressive list of credentials. He coached four years at Oklahoma State University and his defensive secondary was ranked fourth in the country in 1967. In his three years at OSU, the Sooners went to bowl games every year, and lost only six games. He also spent two years at Kansas University, where he helped guide the Jayhawks to a 1973 Liberty Bowl berth. His defensive team led the nation in interceptions that year, with 25. And, in 1977, his third year at North Carolina, his defense led the nation, allowing only 7.4 points per game.

"Team morale and making everyone on the team feel they are part of the team are vitally important," Dickey said. "Every effort will be made to make everyone feel wanted and part of the team." Morale and optimism have been missing lately in Wildcat football as evidenced by the late-season walkout by more than 20 freshman players.

He also realizes that it won't be an easy job to get K-State football going strong, but said he's ready to start winning.

"It's going to take hard work, but with the right guidance and promotion, in the right direction we can make you proud of Kansas State football," he said. "I'm not a guy trying to live forever. I don't want to waste five years to have a good football team."

Dickey will also try to put the fun back in K-State football.

"I think the kind of job you want to do is make them understand what you want to do and make it fun to play," he said. "When a player dreads coming to practice then something is wrong with that program."

No football program can operate without money, especially in the Big 8, where the Wildcats must compete with big-money programs at Colorado, Nebraska, and Oklahoma.

"Any time you try to build a program, it's most important to have finances to recruit and I believe those sources will be available," Dickey said.

Dickey signed a four-year pact which includes a salary of $39,420 his first year, a sum that competes with other Big 8 salaries.

K-State Athletic Director Jersey Jermier was also confident about the Wildcats' future and happy with the selection of Dickey.

"Jim has thoroughly prepared himself to be head coach and put Kansas State in the winning category," Jermier said.

And, K-State President Duane Acker added, "We're happy, we're delighted. We've talked to coaches, to former players, we even talked to his banker and he looks like the man who will move KSU forward."

Crew

"The desire of the individuals to win", according to coach Cliff Elliott, is the most important factor for the members of the K-State crew.

They practice every time they can, rowing up to 10 to 12 miles a day, five days a week, for a total of 1,000 miles every year. Their fall weekends are filled by travelling to regattas throughout the country and rowing in 2,000 meter races. Their winters are not much easier, as they continue to do off-water work when the weather doesn't permit them to practice at Tuttle Creek. The University is unable to fund them, so they also have to pay dues in order to compete.

"We had a pretty good season," Elliott said. "Our level of competition was up." The season started off on the right foot, as the 'Cats travelled to Lincoln, NB, and won all four races of the day; the novice men's eight, lightweight women's eight, varsity women's eight, and varsity men's eight races, against the University of Nebraska. The varsity men's eight set a course record of 6:11.4.

The next two regattas were not as successful, as Purdue took four out of five races against the 'Cats, and Wichita State won all six races in the State Championships, April 16.

K-State hosted the Big 8 Conference Championships on April 23 at Tuttle Creek, winning the novice men's four, varsity men's four, men's open single, and varsity men's eight and women's open single races. The varsity men's eight won the Ben Stott Challenge Cup for being best in the conference.

At the Midwestern Regional Sprints in Madison, WI, every K-State crew except the varsity men's eight made the finals, and the varsity men easily won the consolation race.

The novice men's four won its race to become Midwest Regional Champions, and the varsity men's four finished second to Minnesota.

The women's crews finished third in overall points in the Midwest Regional Regatta May 29 at Minneapolis, MN. K-State's novice four was the only Wildcat crew to win first place.

In the National Intercollegiate Rowing Championships June 2-4, K-State was represented by the men's varsity eight and and the varsity pair with coxswain. The varsity eight had their troubles, finishing last in their first and second day races. They managed to finish third in the third level finals.

The varsity pair of Gary Dyke and Robert Bird was more successful, finishing third in the Championship Finals to become the first K-State medalists in the Nationals since 1971.

In the longer, three-mile races, the Head of the Charles at Boston, and the Head of the Tennessee at Knoxville, the teams performed well. At the Head of the Charles, the varsity four with coxswain finished fourteenth out of 40 entries, and at the Head of the Tennessee, the varsity lightweight four finished first out of seven entires.

Rugby: rough, fast, crazy . . .

Rugby is played somewhat like football. The ball is shaped the same, players run with it, throw and kick it. The defense tries to tackle the man with the ball.

However, at K-State, there are two important differences. A small football crowd is 20,000 people, while a large rugby crowd is 200 people.

And, the rugby team wins its games.

"The basketball team and us are the only consistent winners," Ed Bischoff, president of the K-State Fort Riley Rugby Club said.

KSUFR started off powerfully in its spring season, beating Pittsburg and Jefferson City, MO, without being scored upon.

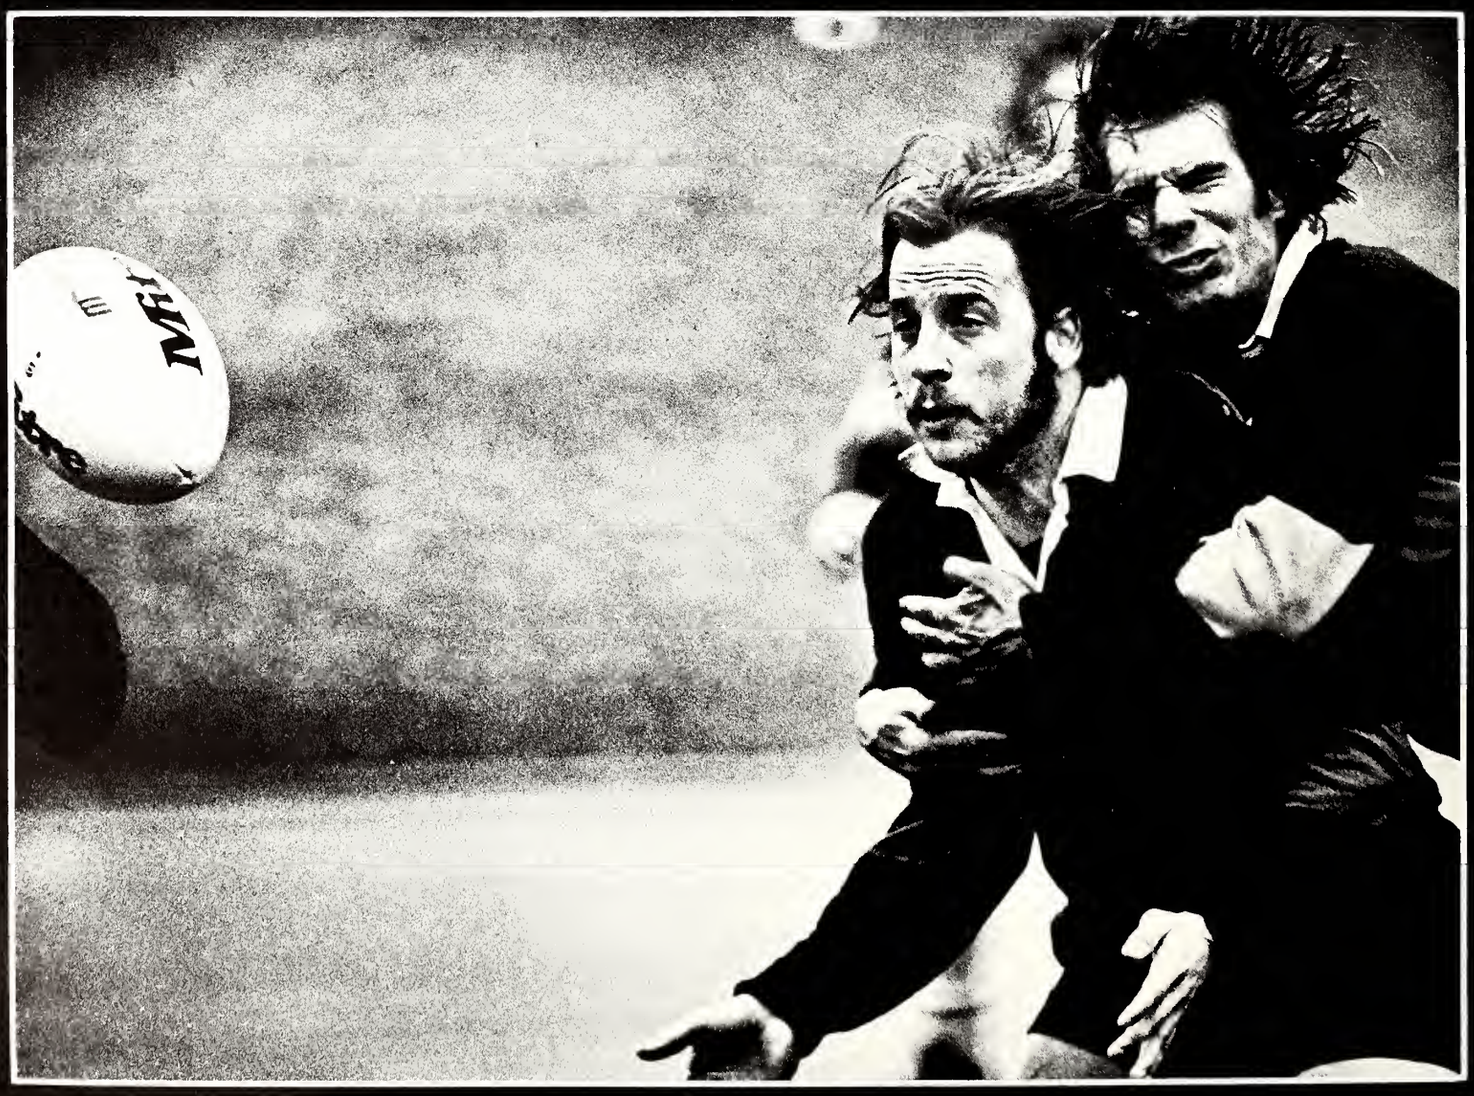
In the Big 8 tournament, which K-State hosted in April, KSUFR was unable to defend its conference championship and finished third.

In the first game, K-State beat Nebraska, 8-0. Against Oklahoma in the second game, KSUFR lost, but couldn't have come any closer to winning. The teams played to a tie at the end of both 40-minute halves, and were unable to score in the five-minute overtime. So, they held a drop kick-off, in which each of the 15 members of both teams drop-kicked field goals from the 25-yard line. Oklahoma had more successful kicks than K-State and went on to win the tournaments.

K-State finished third by beating Missouri in their last game of the tournament, 15-3.

After whipping Johnson County, 8-0, K-State won the Emporia All-Kansas tournament by beating KU, Johnson County again, and Emporia twice. The first time they played Emporia, the game was tied 6-6, and K-State won the drop kick-off. After Emporia worked themselves through the loser's bracket, KSUFR beat them 8-0 in the finals.

In their next game, K-State beat KU 4-0, led by Rocky Osborn, who scored the "try", rugby's equivalent of a touchdown. KSUFR ended its spring season by hosting the annual Sunflower Invitational, and for the fourth



straight year, was unable to win its own tournament. K-State got past Tulsa in their opener, but lost to Topeka in the second game and failed to place in the 16-team tourney.

Bill Sinovic, who kicked for the K-State football team last year, was a key player for the rugby team, Bischoff said. Former footballer Osborn was also one of the club's best players.

"Most of our guys were football players at one time or another," Bischoff said. Football players are adapted to rugby, because the game is so physical, he said. (There are no time-outs in rugby, so the game continues even if someone is injured. An injured player cannot be replaced by a substitute.)

In its fall season, K-State lost five games, even though Bischoff described the team as "really better than in the spring."

They started off strong again, winning the KAW Valley Cup in Topeka by beating teams from Kansas City and Topeka.

The next two weekends, Oct. 2 and 10, were also successful, as K-State whipped Johnson County and Nebraska.

After a loss at Emporia, KSUFR won the white division at the Heart of America tournament in Kansas City.

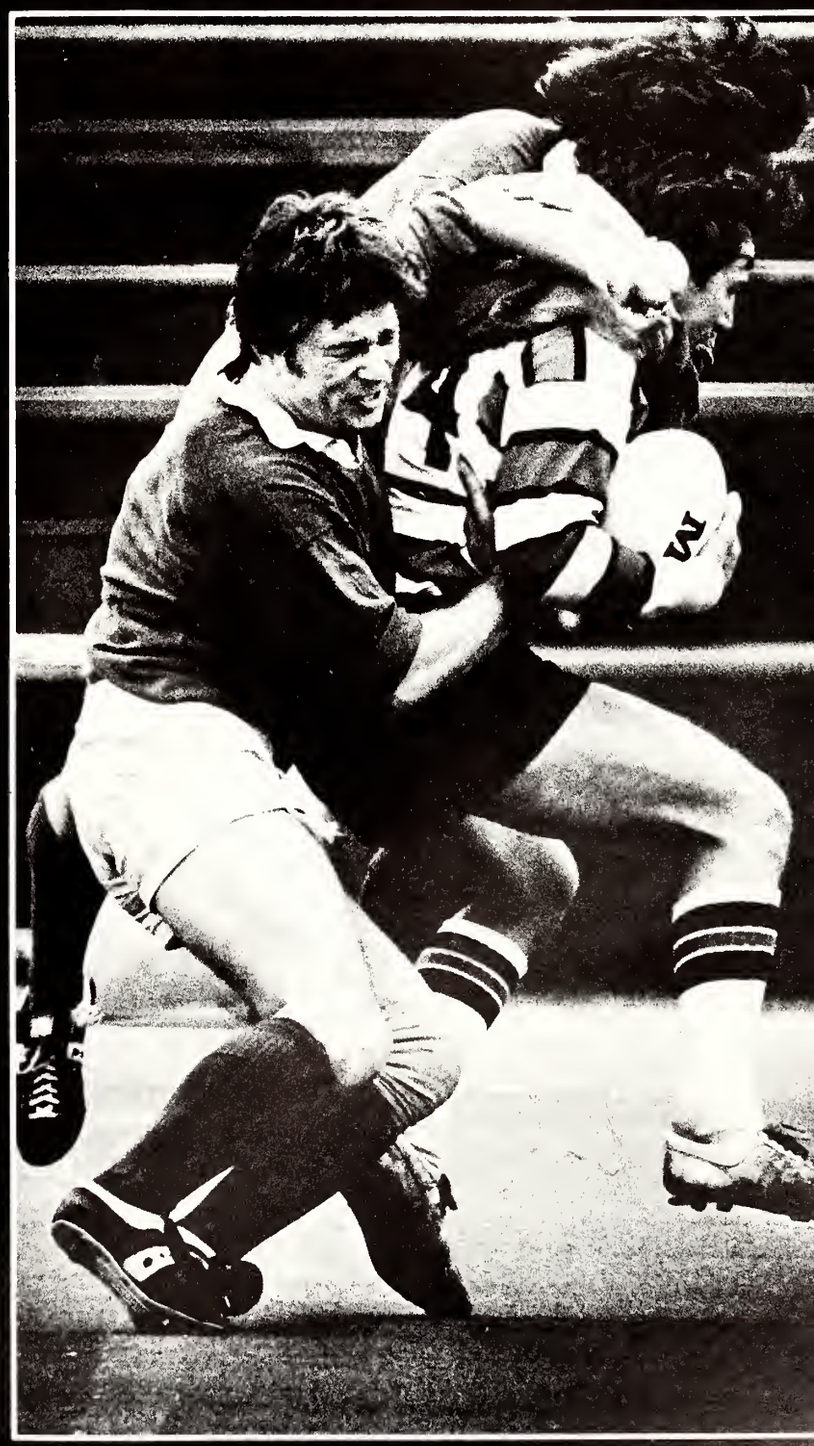
In one of their "big disappointments," according to Bischoff, K-State lost the Governor's Cup to KU on Nov. 6. The next weekend, K-State lost to Wichita.

In a November national invitational tournament in Houston, K-State closed out the season by winning three games and losing two. Thirty-two teams entered the tourney.

"It's really tough for colleges to put together good teams year after year, because of the student turnover," Bischoff said. "But, we've really had a lot of talent here in the last few years."

Not many people are cut out for playing a sport as rough as rugby, wearing only a striped shirt and "cute little shorts," as the beer commercial says, but the few who do have great rewards.

"It's a really good team sport," Bischoff said. The camaraderie between players is really great."



Volleyball: teamwork K-State's best in history

In a season described by coach Mary Phyl Dwight as "the best in the history of K-State volleyball," the Wildcats posted a 40-17 record and made their first appearance in the national tournament.

"We accomplished a lot of things," Dwight said. "I'm very pleased."

K-State entered the Association of Intercollegiate Athletics for Women National Volleyball Championships with an attitude that it would be a valuable experience. They finished 1-4 in the tournament, losing to Illinois State, Arizona, Houston, Southern California, and defeating Mississippi.

The national experience was especially rewarding for the women because they were such a young team. They were understandably "overwhelmed," according to Dwight.

The Wildcats began their trek to the nationals on Sept. 17 with a win over Wichita State. Four days later, in its first conference match, K-State defeated Kansas 15-7,7-15, 15-12, 1-15, 15-4.

In their first tournament of the Fall 1977 season, the 'Cats took first place in the eight-team K-State Invitational. They won all of their matches and lost only one game in the tournament.

The women extended their winning streak in match play to 14 games, suffering their first loss Oct. 8 in the St. Louis Invitational. K-State finished second in the tournament after losing to Florissant Valley and Nebraska.

K-State continued its excellent tournament play in the Graceland (Iowa) Invitational. The 'Cats defeated North Dakota, Simpson College, Graceland College and Augsburg College, but lost to Missouri-Kansas City in their last match.

Nagging injuries caused a mid-season slump for the Wildcats. In match play following the Graceland tourney, K-State beat Central Missouri and Nebraska-Omaha, but lost to Wichita State in a conference game and then lost to Nebraska, 0-15, 15-1, 3-15.

This set the stage for the Big 8 tournament, which was "one of our most dissappointing tournaments," Dwight said.

"One of our goals for the season was to finish first or second in the Big 8," Dwight said. However, injuries and a heavy schedule prior to the tourney combined to hamper the 'Cats. They lost their first four matches to Nebraska, Missouri, Iowa State and Kansas, but bounced back to beat Oklahoma State and Oklahoma. They still only finished fourth in the tournament.

Toward the end of the season, the Wildcats began to regain early season form, winning the Kansas Invitational. They beat Missouri, Wichita State and Kansas at Lawrence.

Following the Oral Roberts Invitational, winning 4-1, the 'Cats travelled to the AIAW Region VI tournament at the University of North Dakota in Grand Forks. The 'Cats played well and finished second to Dwights' alma mater, Southwest Missouri State. The second-place finish was good enough to advance them to the national tournament.

In regional and national play, the entries are split into six-team pools, operating as mini-tournaments, and a team must finish first or second to advance to the finals. K-State lost its opener to Missouri-St. Louis, but bounced back to beat Minnesota, Nebraska-Omaha, Drake, St. Cloud State and eventual tourney winner Southwest Missouri.

In the finals, the 'Cats beat Missouri-St. Louis again, but lost to Southwest Missouri, finishing second.

"We're encouraged by our high finish and by our beating Southwest Missouri, because they finished in the top eight at nationals," Dwight said.

K-State's strong region finish and national appearance was accomplished by a squad without a senior on the team.

Dwight mentioned two categories of individuals who helped the team compile such a good record.

Kathy Teahan was the key returning player, whom Dwight described as "an outstanding player who was a big factor in our success." Despite a mid-season ankle injury Teahan played well enough to become K-State's first all Big 8 selection.

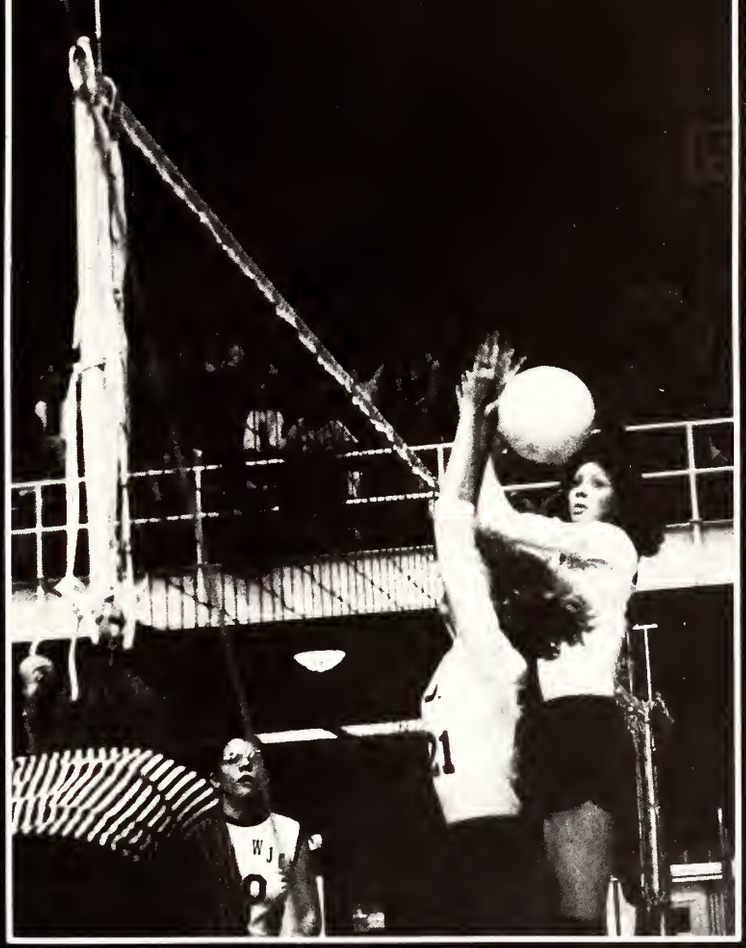
Linda Long was another veteran player who Dwight said made an important contribution on defense, one of K-State's weak areas at the beginning of the season.

As for newcomers, freshman Debbie Chuk was a "big difference" in the lineup for the Wildcats.

Although some veterans and some newcomers were obviously important to the team, Dwight stressed it was hard to name individuals because of the teamwork the 'Cats possessed.

"One of the biggest factors was that we played eight players," Dwight said. The six women on the court at one time were replaced by substitutes, and this rotation made the team play together well, Dwight said.

"Everyone made a contribution. We didn't have to rely on one person, but everyone knew they had to contribute in some way," Dwight said.



20

Cross Country:
Women ninth in nation

Led by a strong nucleus of returning runners and talented newcomers, K-State women's cross country was one of the most successful Wildcat sports in 1977.

The team finished ninth in the nation and boasted an All-American in Cindy Worcester.

"I think we accomplished everything we could with the people we had," coach Barry Anderson said.

The women kicked off their season September 16 at the Gold Classic at Wichita State University. Cindy Worcester, Renee Urish, Rochelle Rand and Alice Wheat swept up the first four places to help the Wildcats whip second place Wichita, 16-43.

Roselyn Fry took sixth at the windy meet to keep the score low. (The object in cross country is to score as few points as possible. The team standings are computed by adding the teams' top five finishes together.)

K-State continued its domination the following weekend at the Missouri Invitational.

Worcesters' 17:39 time took first place, and Urish and Rand again took second and third to pace the 'Cats.

Wheat took seventh and Fry took tenth to round out K-State's 23 point performance. Missouri finished second with 47 points and KU was third with 50 points.

Worcester strained a leg muscle and was unable to compete in the Oklahoma State Jamboree, but the team still had little trouble winning.

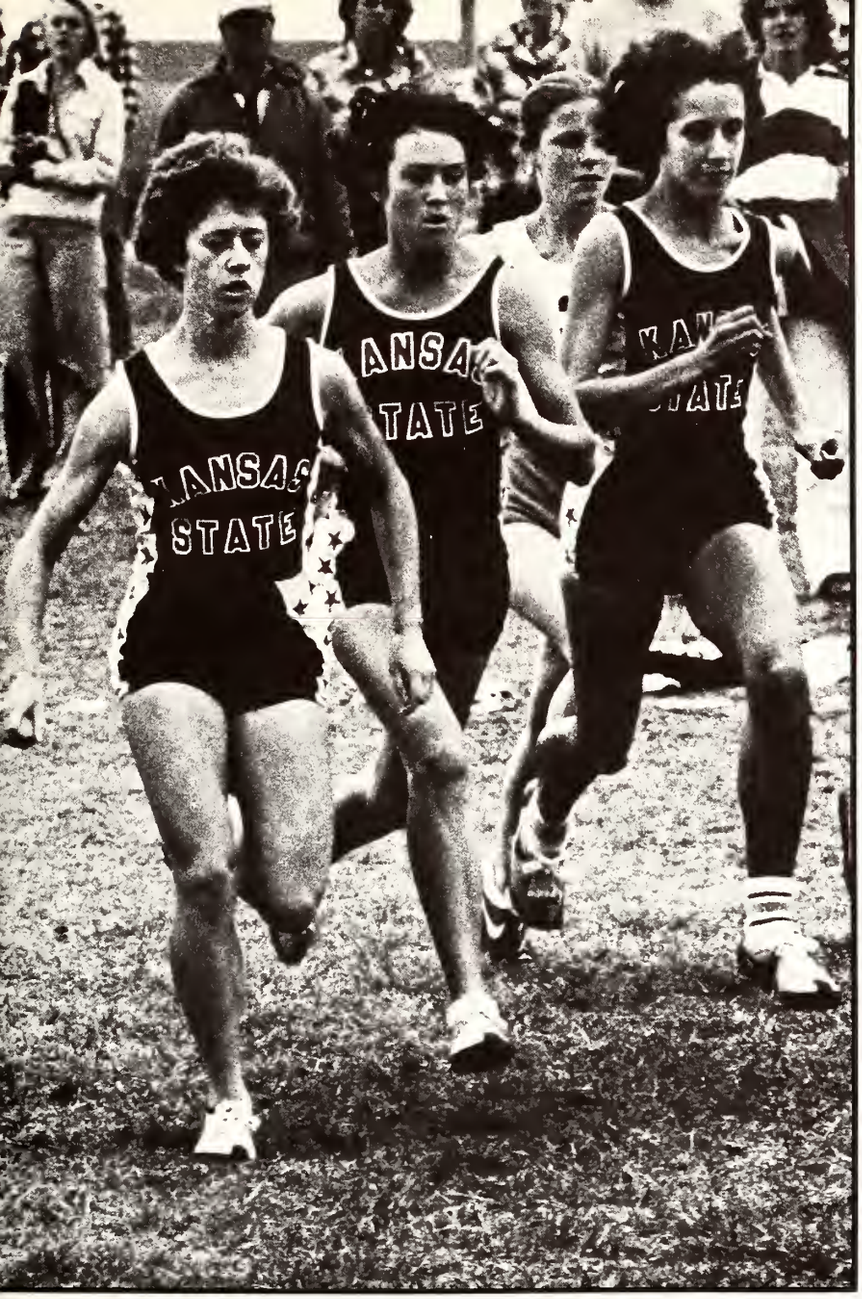
Urish won the meet with a time of 18:12 to lead K-State to a 33 point first place finish. KU was second with 44 points, and Wichita State finished a distant third with 72 points.

Rand took third behind KU's Michelle Brown, Wheat took fourth, Marlys Schoneweis was tenth and Fry was fifteenth for the 'Cats.

On the familiar home course October 8, K-State was led by Worcester, Rand and Urish as the 'Cats dominated the KSU Invitational.

Worcester was first with a time of 18:55 to lead the 'Cats to a 20-42 victory over second place KU. Wichita State posted third with 77 points.

Worcester cut her time to 18:05 and Urish ran a close



second with a time of 18:06 as the pair finished 1-2 in the Oklahoma Invitational October 15.

K-State won the 12-team meet with 48 points, finishing ahead of Missouri's 64 points and Texas' 77.

Rand took ninth, Wheat eleventh and Schoneweis twenty-fifth to complete K-State's top five finishers.

The next weekend brought the first disappointment of the season for the K-State team.

The Big 8 Championships in Manhattan brought together three powerful teams in Iowa State, Colorado and K-State.

Iowa State's Debbie and Diane Vetter took first and second with times of 17:21 and 17:39 to hold the Cyclones to 27 points and first place.

Colorado posted third, seventh, thirteenth; and Wheat finished fourteenth for the 'Cats.

At the National Championships in Austin, Texas, the Wildcats "bested a lot of teams that had more talent." according to Anderson. The women took ninth in the nation, scoring 239 points.

"Ninth place in the nation is quite a tremendous thing," Anderson said. "It showed we were dedicated to what we were doing."

The national competition showed big strength, as Iowa State finished first with 92 points; and Colorado took third with 164 points.

Worcester won All-American honors by finishing one of the top 15 runners. She was thirteenth, (ninth among team-affiliated runners), posting an 18:06 time.

Urish was twelfth among team runners and eighteenth counting independent contestants. Wheat was fifty-third, Rand took sixtieth; and Cindy Anderson finished one-hundred-fifth for K-State.

The future looks very good for K-State women's cross country, according to Anderson. Roselyn Fry is the only runner that was lost to graduation.

Several team members have another year of eligibility, including Wheat, Anderson and Urish. Some of the outstanding performers are even younger. Rand is a freshman and Schoneweis and Worcester are sophomores.

Cross country:

Injuries hurt super reputation

"K-State has a very good tradition and a super reputation in the Big 8 and in the country," cross country coach Jerome Howe said. "Any notoriety we have in track is in the middle-distance and distance races."

The fall cross country season didn't quite live up to that reputation, as the Wildcats finished fifth in the Big 8.

"We had a disappointing season from the team aspect; we had a lot of injuries to key runners," Howe said. The younger runners that had to step up and fill in for injured runners did well, he added.

The first meet of the season was Sept. 16, the annual Wichita State Gold Classic. K-State finished sixth behind KU, Missouri, Oklahoma State, Pittsburg State and Southwest Missouri State. The Wildcats had 151 points, far behind KU's winning 42-point total. The 'Cats Ed Delashmutt was the only K-Stater in the individual top 10. He finished fifth with a time of 20:35 over the five-mile course.

"The KSU Invitational was our best meet," Howe said. In that meet, the 'Cats finished second behind Colorado, the eventual Big 8 champions. K-State had 65 points, beating KU by three but losing by 15 to the Buffalos.

Delashmutt finished third with a time of 24:53, Jeff Rosenow was eighth and Doug Weber was fifteenth to lead K-State.

The Wildcats won their dual meet with Nebraska Oct. 1 at Lincoln. The point totals were 23 for K-State and 33 for Nebraska. Delahsmutt, Rosenow and Weber went 1,2 and 3 against Nebraska.

In the KU Invitational, the Wildcats finished third out of four teams, beating Southern Illinois but losing to Iowa State and Kansas.

Rosenow was second with a time of 24:06 and Weber and Delashmutt finished fifteenth and sixteenth.

Missouri was next on the schedule, and the Tigers swept the first four places to defeat K-State 10-45.

Delashmutt finished fifth and Rosenow finished seventh at Columbia.

The Big 8 Championships, Nov. 5 in Manhattan, were disappointing for the 'Cats as they finished fifth. Howe had expected his team to finish second and possibly make a run at Colorado for the title. However, Colorado turned in an almost perfect score of 21 while the Wildcats had 147 points, finishing behind the Buffalos, Iowa State, Missouri, Nebraska and KU.

Delashmutt was eighth in the conference and Rosenow was twelfth. The Wildcats had five runners finish in the bottom 10 and still took fifth place.

In the District 5 Cross Country Championship, Delashmutt finished twelfth over the 10,000 meter course with a time of 31:45. Rosenow finished thirtieth. None of the K-State runners qualified for the NCAA National Championships.

Although the season as a whole was disappointing, Howe pointed out some consolations.

"Those two, (Delashmutt and Rosenow) were the highlights of the season," Howe said. Weber, the distance captain, had a good year, despite a poor showing in the Big 8, he said.

"Colorado scored 21 points in the Big 8 Meet, which is considered awesome in a dual, even more so in a big meet," Howe said. The conference has probably never had three teams in one year as good as Colorado, Missouri and Iowa State, he added.

'Cats glide through early season games

Although the opener against Northern Illinois gave the 'Cats more trouble than they bargained for, a great performance by Mike Evans and freshman Rolando Blackman secured a two-point win.

The 'Cats then breezed through their next five non-conference opponents and found themselves ranked nineteenth in the nation by Associated Press.

The highlight of the early season was a 101-74 win over Arizona State at Tempe. The 'Cats trailed by 10 at halftime, but scored 63 points in the second half. Redding scored a career-high 37-points and Evans had 32 points.

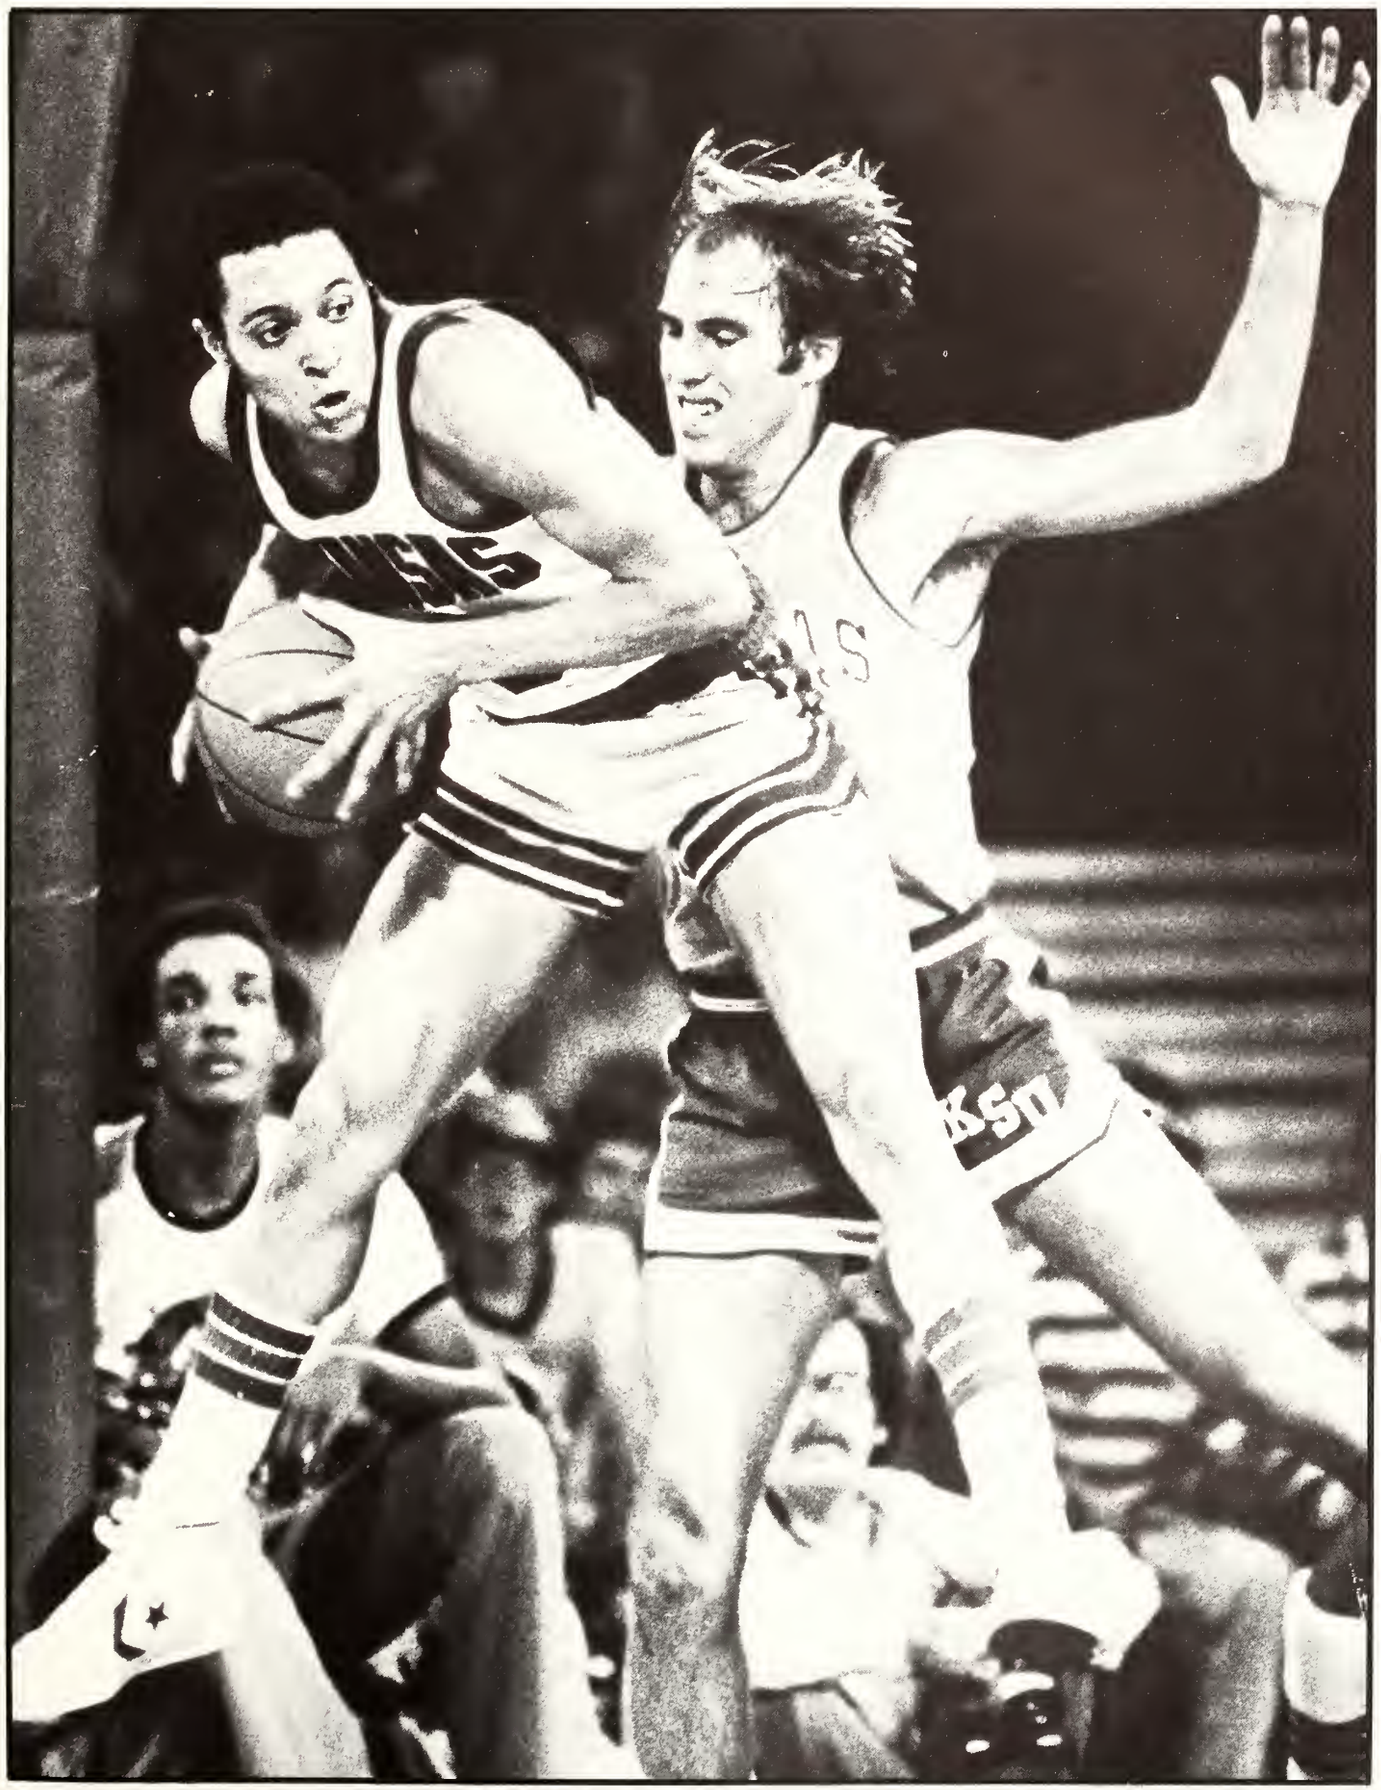
A hint of the kind of play that would come back to haunt the Wildcats in some conference games surfaced in the Sun Bowl Classic in El Paso. Army and Texas-El Paso defeated K-State and K-State basketball in 1977-78 started off with a bang, but finished in a disappointing fashion as the 'Cats went 18-11.

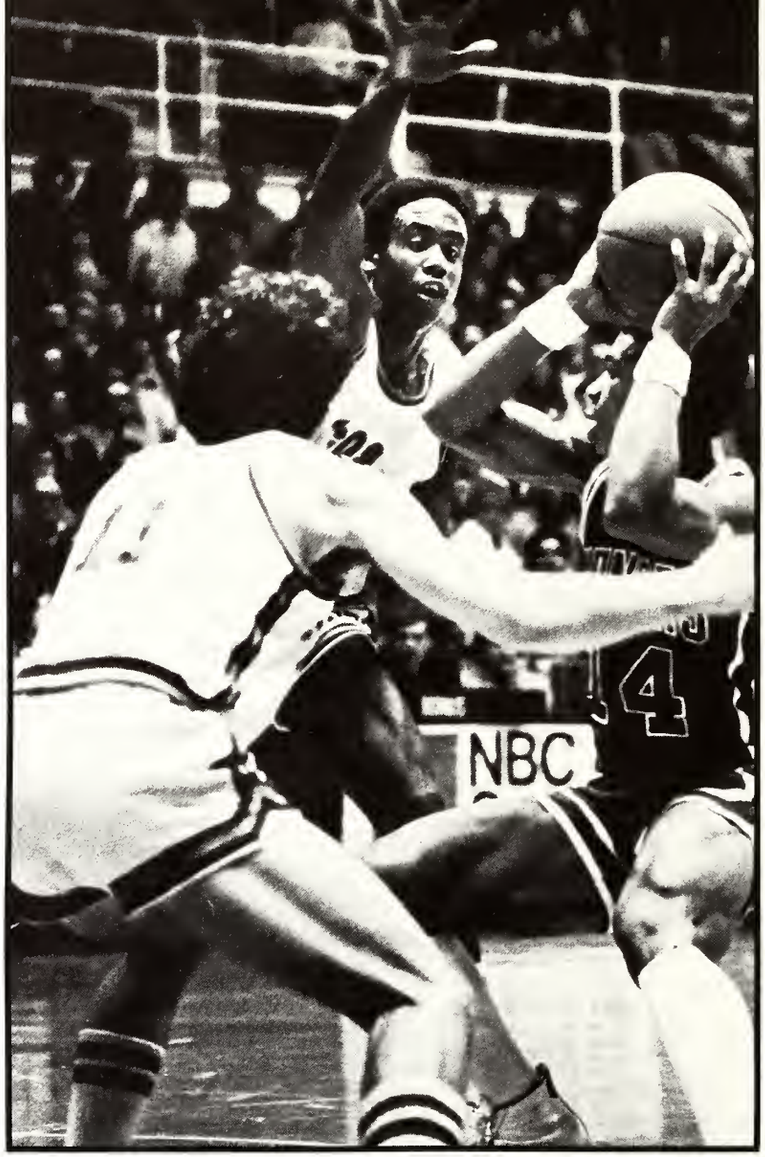
Several pre-season polls ranked the Wildcats in the top 20, due to the return of last year's top scorers, Mike Evans and Curtis Redding.

The team was an opposite of last year's 'Cats, who came within a point of beating eventual champion Marquette in the NCAA regionals. That team was thought to be in trouble because of losses to graduation, but ended up Big 8 champions. The '77-'78 team was picked by most to repeat as champions and were even ranked in the nation's top ten teams by one poll, but failed to live up to expectations.

The last game before the Big 8 pre-season tournament was a good tune up as the 'Cats destroyed North Texas State.

Coach Jack Hartman's team showed all of the qualities of a championship team during the early non-conference games, but seldom was able to put them all together.





Redding was in top form, usually scoring in the 25-point range, and exploding at times, like in the Arizona State contest. Evans showed his consistency and earned his pre-season All-American honors by scoring approximately 20 points in most games and providing leadership for the team.

Blackman, who was the latest player to come from the Brooklyn connection that brought Redding and coach Mark Reiner to K-State, proved to be a great asset to the team.

"I thought he did a heck of a job," Hartman said about Blackman's first game. "He's a good ballplayer. I have a great deal of confidence in him."

Blackman's lightning quickness on defense and smooth play on offense developed throughout the season, and he scored his high, 23, in the 'Cats defeat of Kansas in the post-season tournament.

K-State second in pre-season Big 8 Tourney

The Big 8 pre-season tournament helped increase fans' and students' optimism as the Wildcats finished second, losing to KU in the finals. However, Hartman elected not to reveal K-State's zone in that game and the 'Cats still lost, by only five.

Redding pumped in 30 points in the tournament opener with Colorado, which K-State won 82-72. The 'Cats defeated unbeaten Nebraska in the semifinals.

"Last year (in the pre-season tourney) and I was determined to play better in the tournament," Redding said. He did it all against Colorado, scoring 30 points, grabbing 10 rebounds and holding highly touted Buffalo forward Brian Johnson to no points and one rebound.

"Curtis had a very busy night," Hartman said. "He did a lot of things, he had a good defensive game and obviously had a good offensive night."

The disappointment began for K-Staters when the regular Big 8 season began.

Wildcats
12

Nebraska came to Ahearn Field House and avenged their tournament loss by crushing the 'Cats, 77-63.

"I can't remember a team of nine playing quite like that," Hartman said. "We've had some games where we didn't play very well but nothing like this. We obviously forgot this is a team sport."

K-State led 53-42 with 13:34 left to play in the game and suffered a total collapse from that point on.

January 11 at Iowa State, the same problems continued, as the Cyclones, who had a surprisingly good season, defeated the 'Cats.

After another win over Colorado, K-State played Oklahoma State in Ahearn and was very glad to have the services of superstar senior guard Mike Evans.

Evans was the game's leading scorer with 27 points. He shot seven for nine from the field and three for six from the free-throw line while pouring in 17 first-half points. After his mediocre free-throw percentage in

Mike Evans Big 8 Player of the year

the first half, however, Evans' chances didn't look too good as he stepped to the line with three seconds left in the game. He calmly hit both of them, however, and iced a 62-59 win.

"I just stepped up to the line and relaxed and concentrated," Evans said. "I knew they were in."

Against Kansas, K-State had one of its terrible shooting nights Jan. 21 that plagued them several times during the season. Blackman was the only 'Cat with a good shooting night, going seven for ten. Evans and Redding were five for 14 and five for 20 respectively, and KU won the game in Lawrence, 56-52.

"The shots just didn't go down," Redding said. "It wasn't the defense."

The chances of a repeat Big 8 championship for K-State all but disappeared in the Wildcats' next game, which it lost to Missouri, 65-60.

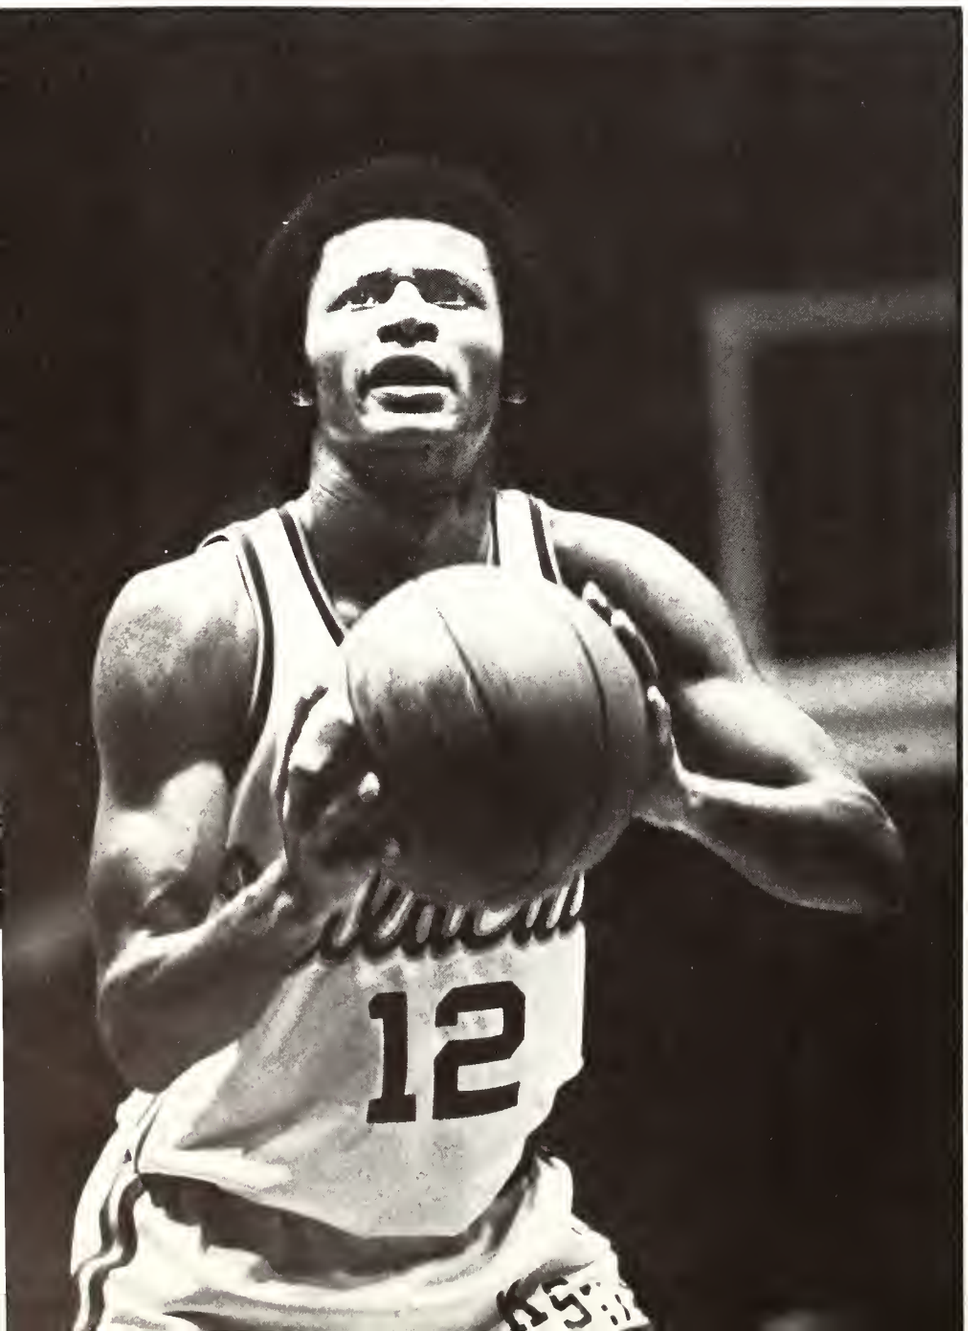
Evans didn't hit his first basket until there were only 16 seconds left in the first half, and poor shooting (29 percent) plagued the whole team.

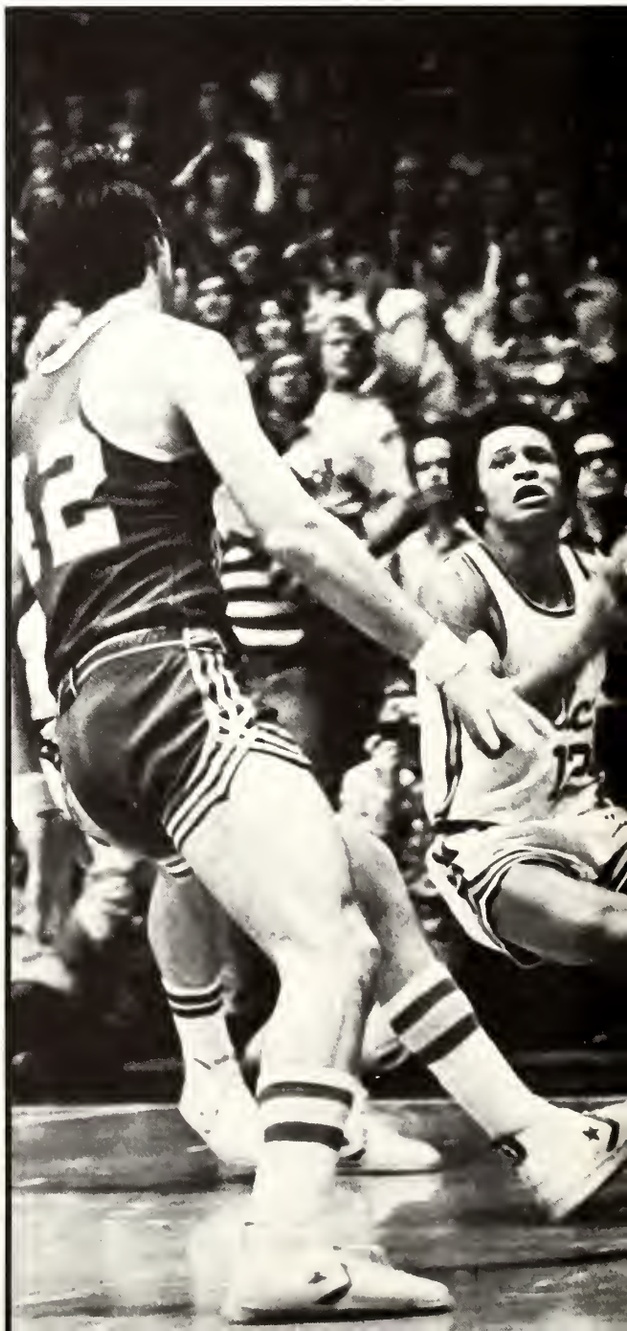
Oklahoma's troubles with Ahearn Field House continued to haunt them as the Wildcats defeated the Sooners in overtime, 73-64. It was the twenty-eighth straight loss for Oklahoma in Ahearn.

Redding, after playing a mediocre game most of the way, played the hero's role and canned two 20-footers which started K-State on its way to the win. He also stole an inbounds pass and dribbled for the K-State goal, where his stuff-shot sent the game into overtime.

Evans played a superb game, scoring 28 points and hitting key free throws in overtime.

Against Iowa State, Feb. 1, Evans needed only six points to become the Big 8 all-time scoring leader, surpassing the mark made by Colorado's Cliff Meely. He hit a driving





Averaged 19 career points per game

bank shot that put him over the mark with about six minutes left in the half. K-State went on to win, 74-63.

After a win at Colorado and another loss to Nebraska, K-State hosted KU in a regionally-televised game in which the 'Cats hoped to avenge two earlier losses.

However, nine-for-12 shooting out of Wilmore Fowler and John Douglas of KU destroyed the 'Cats hopes, 75-63. K-State's chances were all but gone when Evans injured his back and had to miss almost the entire second half.

The game was also an embarrassment for the K-State fans, as the now-infamous banana-throwing incident occured during the introductions and near the end of the game.

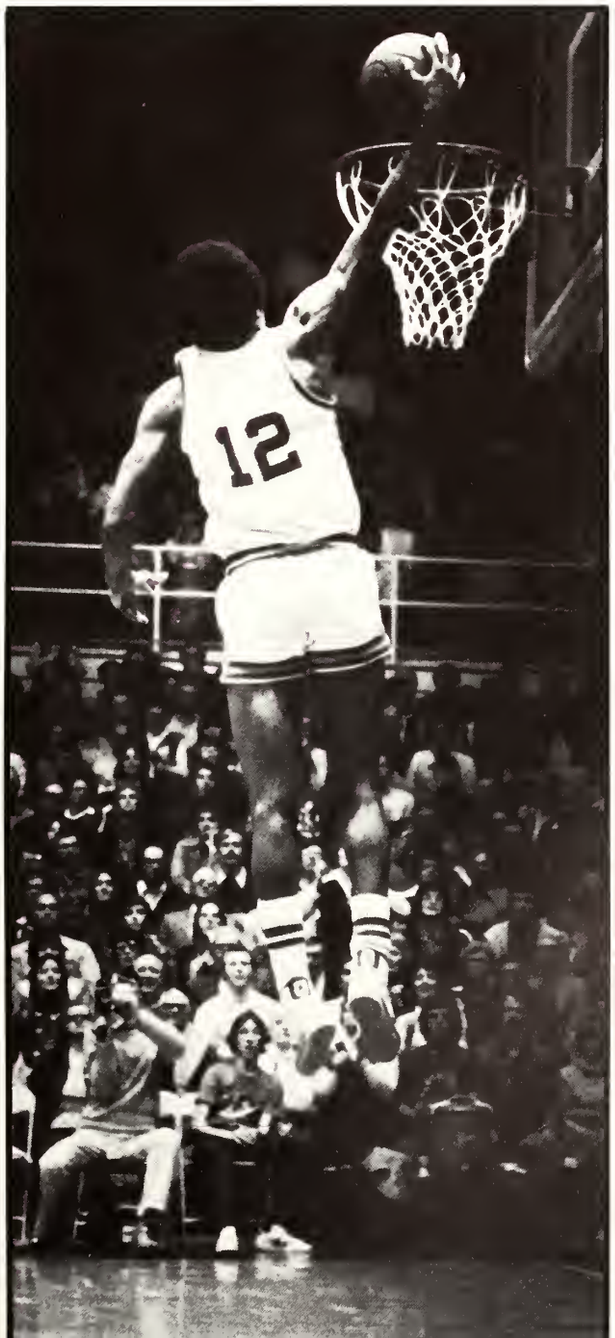
K-State finished the season in good form, winning its last two conference games over Missouri and Oklahoma to finish fourth in the conference.

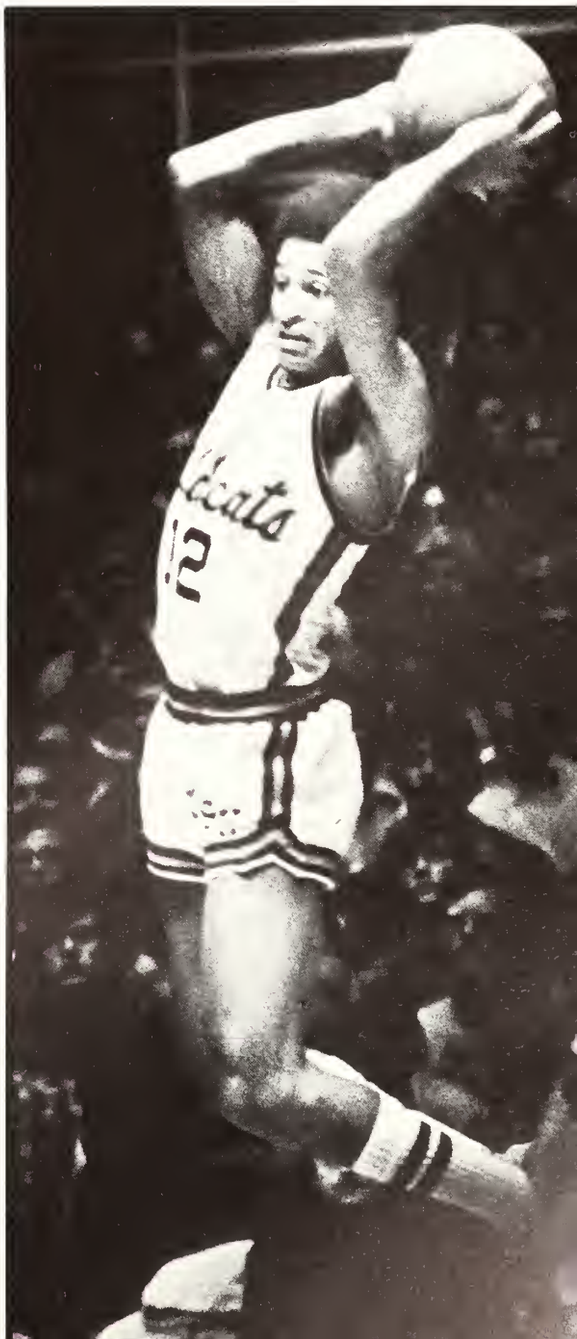
The Big 8 post-season tournament began with the 'Cats playing Oklahoma at Ahearn for the right to advance to the semifinals in Kansas City.

The Wildcats apparently had come to life in the Oklahoma game, which K-State won, 52-44. Sixty-two percent shooting in the second half, plus tough defense outside by senior guard Scott Langton and inside by junior center Steve Soldner, keyed the win.

"In the second half we played with strong determination," Hartman said. "We were more aggressive on offense."

Then, for the fourth time, the 'Cats met KU. This time, however, the outcome was different as K-State whipped the Jayhawks, 78-66, in the post-season tournament.



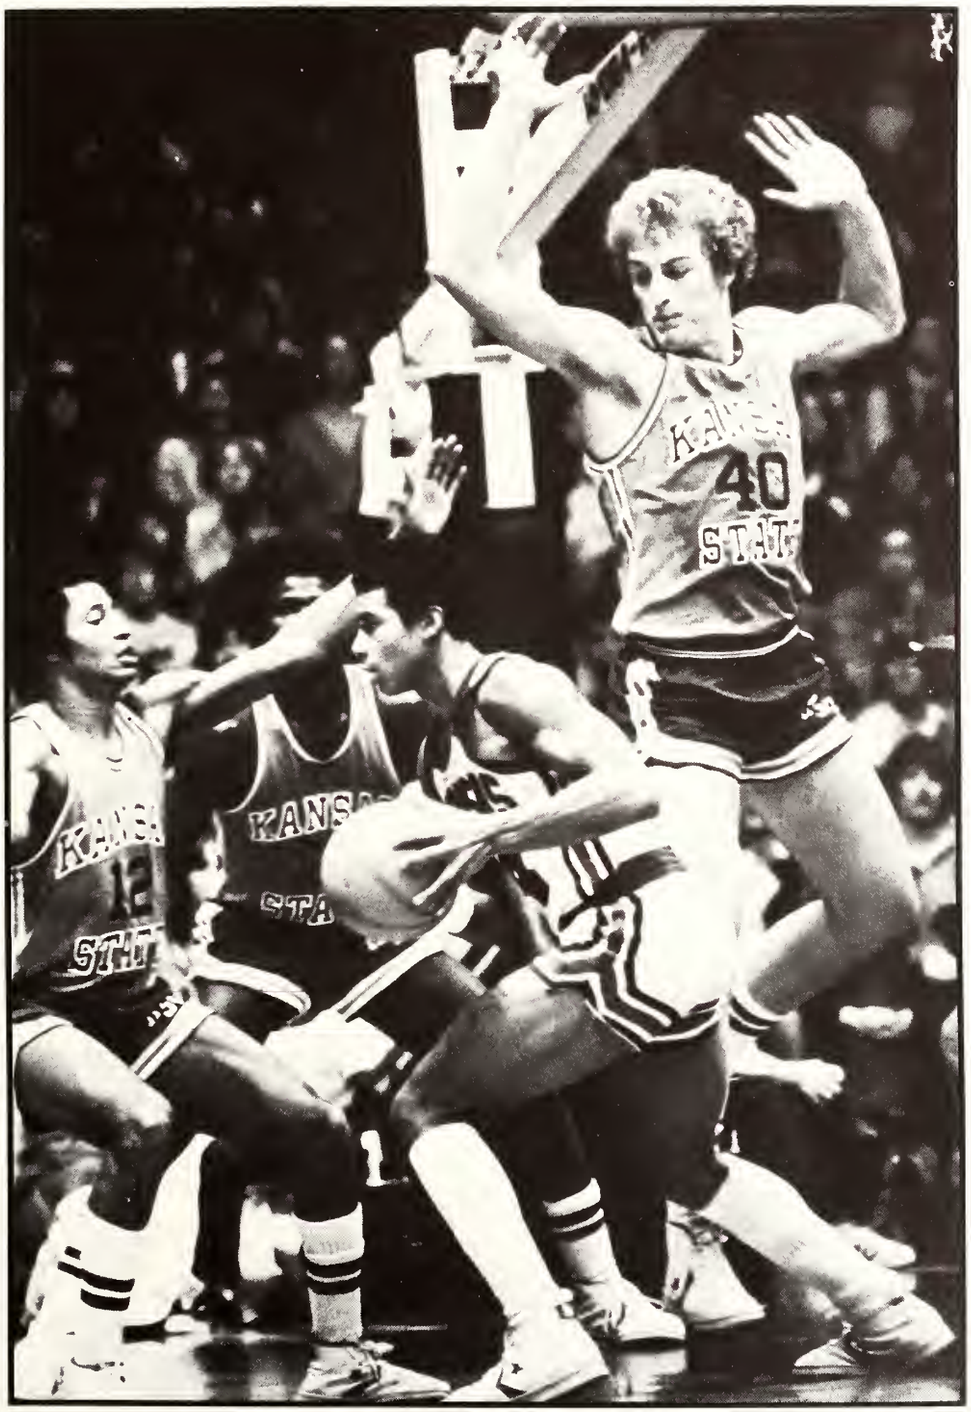


Blackman had 23 points, Soldner had 22, and Redding had 19. The story didn't have the anticipated happy ending, however. Missouri, who finished sixth in the regular conference season, played the Cinderella role by beating the 'Cats and winning the right to represent the Big 8 in the NCAA tournament.

The Tigers led most of the second half, but K-State staged a furious comeback attempt that fell three points short, 71-68. Redding started the comeback by hitting three of his patented long-range bombs. With 1:03 to play, Evans was fouled and hit one of the free throws, tying the game and sending it into overtime. K-State was unable to maintain its momentum, however, and Missouri made 10 out of 12 free throws to clinch the win.

A game which didn't count for much other than pride and diplomacy was the K-State Russian National Team, which the 'Cats won 57-54. The week before, the Russian team had beaten UCLA, ranked second in the nation. With 1:18 remaining the game, Redding stole the ball and dribbled down the floor for a

Soldner blooms as season fades



slam dunk, which put the 'Cats ahead 55-54. Evans then stole the ball and made a breakaway layup with only 10 seconds remaining to secure the win. In spite of the team's failure to meet some people's expectations, the Wildcats had some outstanding individual players.

Redding and Blackman will both return next year at forwards, and should provide the nucleus for the team. Redding lacked consistency in the '77-'78 season, but will certainly carry much of the scoring load next year. Blackman is developing quickly and showed improvement with every game. His scoring and defense will be much-needed assets.

One of the surprises of the season was Steve Soldner. Hartman was again faced with the same problem as last year — no one who was tall and experienced to play center. The 6-7 Soldner, although giving up several inches to most opponents, held his own and occasionally scored well, as in the Oral Roberts and KU games, in which he scored 26 and 22 points, respectively.

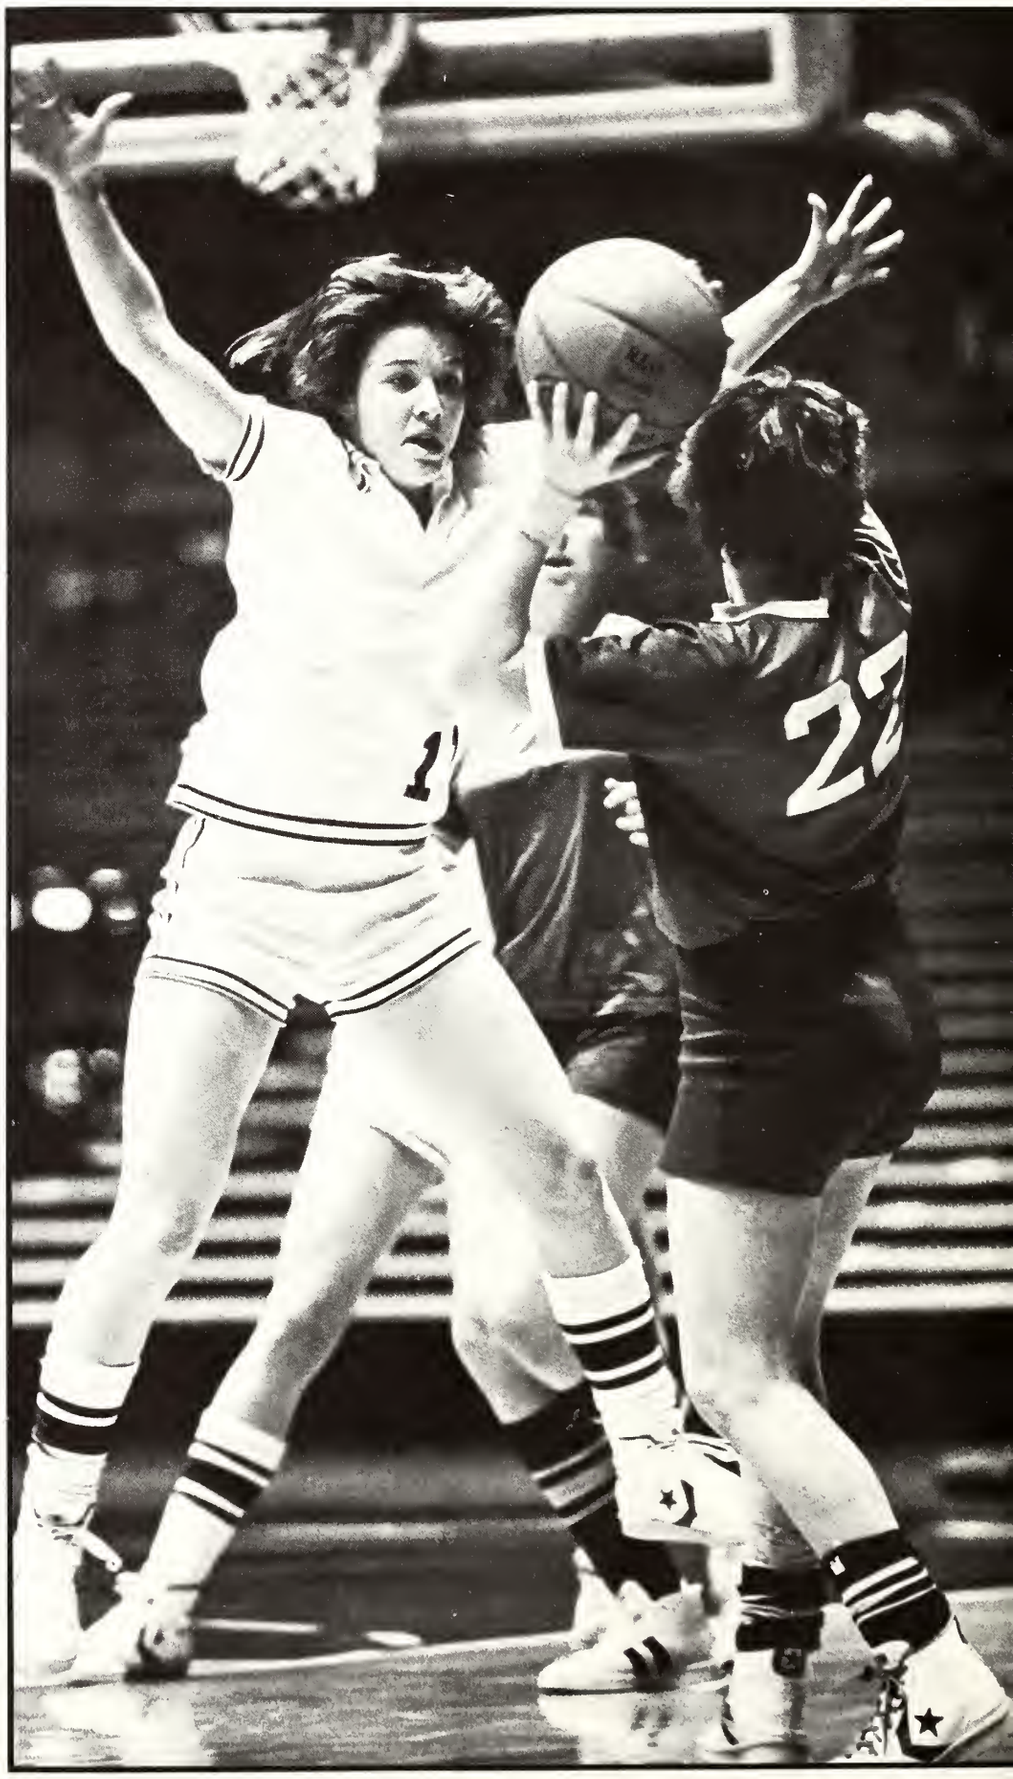
K-State will be hurt by the graduation of several players.

Langton didn't score much, but his lightning-quick hands made many steals and frustrated many opponents. Jerry Black and Dan Hickert, who were both injured much of the season, will also be missed. Hickert earned a starting role early in the season, and Black came on late to play well in a substitute role.

No one in recent K-State basketball will be missed more than Mike Evans.

The 6-2 guard started off at K-State four years ago by becoming the Big 8 Newcomer of the Year. He then went on to make all-big 8 teams the next three years. He was the conference player of the year his junior and senior season, averaging more than 19 points a game for his career.

Women's Basketball



K-State's women again dominated state basketball, winning their seventh consecutive trip to the AIAW Regional tournament, but fell one game short of adding a Regional championship to their conference title.

The University of Missouri defeated K-State 70-68, March 11, to end the 'Cats tournament play, which coach Judy Akers called "a different season in itself."

"Naturally, we're all disappointed in the final game in the Regional," Akers said. "We could have and should have won the game, but we were fortunate to be there at all."

The Wildcats had beaten Minnesota and Drake in their first two tournament games, despite the fact several players were just returning from long absences because of injuries.

Only one of the team's original five starters, Eileen Feeney, was able to play the entire season without injury. The Wildcats' Dec. 2 game against Wayland Baptist, third-ranked in the country, was disastrous. Although K-State only lost by four, both starting guards, LeAnn Wilcox and Tami Johnson, suffered knee injuries. Wilcox missed the season and Johnson didn't return until late in the season.

Second-leading scorer Laurie Miller was also injured and missed 12 games. Margo Jones missed 13 games, top substitute Michelle Campbell was out for nine games and blue-chip freshman prospect Tammy Romstad was injured two days before school started and missed the season.

Miller, Jones and Campbell were healthy by the time the regional started, but had little chance to get back into the swing of playing.

"It possibly could have been a different story if they had a few weeks instead of a few days to practice," Akers said. She did acknowledge they performed better than could be expected under pressure.

On their way to the regional and a 20-14 record, the 'Cats had a very difficult schedule, playing eight teams that were ranked in the top 10 at one time or another.

K-State hung around the .500 mark most of the season. On only one occasion did they lose three in a row. During the early part of the season, Jones, Feeney and Miller usually led the scoring. Jones scored her career high of 22 points in the 'Cats first game, a 73-69 win over Houston. Miller scored 24 points as the Wildcats smashed Oklahoma State in their fourteenth game, 95-69.Feeney's high for the year was also 24, in K-State's 71-69 win over Northwest Missouri State.

The team showed its character by coming back from its lowest point just before beginning conference play.

Akers depends on freshmen and reserves

"The losses to Las Vegas and UCLA in Long Beach were the biggest jolt," Akers said. The 'Cats lost to Nevada-Las Vegas 113-84 and UCLA 123-62 in tournament games in Long Beach.

All four of the injured starters were out of action at the same time during the tournament. As a result, the 'Cats "got smashed," according to Akers.

"I thought that those losses would either make us or break us," she said.

K-State refused to break, however, and came back to crush Nevada-Las Vegas by 27 points a few days later in tournament play at Lawrence behind Gayla Williams' 28 points.

"It (the win over UNLV) turned the season around for the kids who were left," Akers said. "The players that remained (mostly freshmen and reserves) came through and performed well. They showed a great deal of dedication to come out with a record above .500."

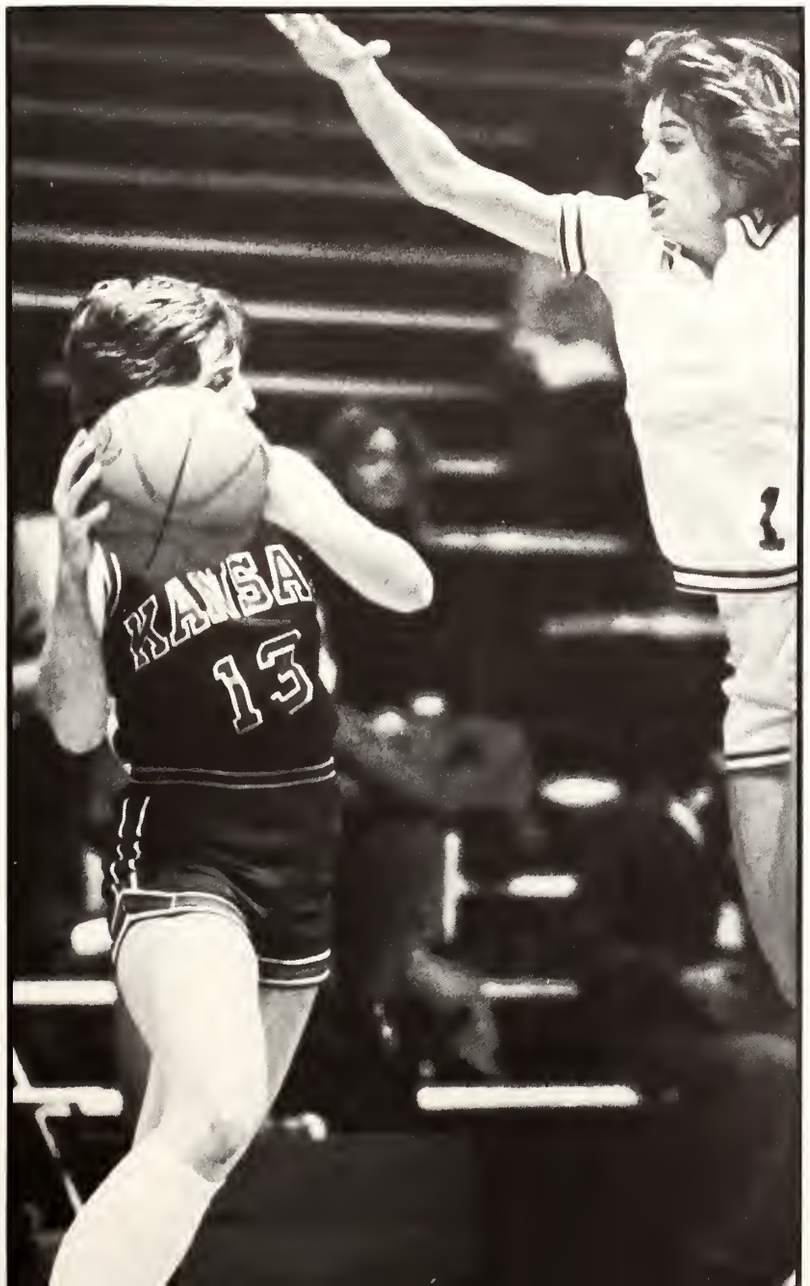
Akers said the team's goal was to get the top spot in the regional tournament, which they were able to do by winning the state conference over Kansas and Wichita State.

She explained that the team had to beat KU and Wichita State both home and away to capture first place. The 'Cats beat KU at Lawrence, 66-65, with Miller getting 19 points and 10 rebounds, and then beat the Lady Jayhawks in Manhattan, 74-68. The Wildcats beat Wichita State 84-63 and 78-33.

The high points of the season were the two conference wins over KU, according to Akers, and managing to win 20 games with personnel that she hadn't counted on playing very much.

"I was pleased with our ability not to give up." Akers said.

"The younger players learned a great deal and picked up a lot of experience, but I'm disappointed that the injuries had to occur."



KANSA
13

Baseball:

Earns reputable season record

K-State's 1977 baseball team, although unable to match the previous season's record-breaking performance, played respectable and posted a 28-23 record.

Coach Phil Wilson's pre-season prediction "as goes Scott Mach, so goes K-State," was correct — Mach also had a mediocre season. He had been tabbed key pitcher in the 'Cats four-man rotation and ended the season with two wins and three losses and a 6.5 earned run average.

"When you start matching talent overall, it wasn't a bad season," Wilson said. His team earned a spot in the Big 8 playoffs with a 7-5 conference record.

This record, compared to the year before, when the 'Cats set a K-State record of 35 wins, was disappointing. The 1976 season had been the best at K-State since 1947.

"We weren't as consistent as we could have been, we had our ups and downs," Wilson said. But the 'Cats only dropped below the .500 mark once, when they were 2-3. Early in the season the Wildcats defeated Wayne State four times, Baker twice and New Mexico once for an eight game winning streak. Late in the season, Oklahoma State, Emporia State and Oklahoma handed K-State five straight losses.

The 'Cats placed second in the Big 8 Western Division and finished third in the Big 8 tournament, losing to Missouri 10-2, 13-5 and beating Kansas 10-6.

Greg Korbe led the team in batting average (.406) and runs batted in (.36). He had nine of the team's total of 22 home runs and led the big 8 in

hitting.

Other leaders at the plate for the 'Cats were Bob Hoenig, center fielder, who batted 3.60; Billy Preston, third baseman, .333 with 18 RBI's; Craig Cooper, first baseman, .320 and 26 RBI's and Tim Pepper, first baseman .295 and 28 RBI's.

The 'Cats scored 250 runs to their opponents' 275 and had only one more hit than their opponents' 406-405. K-State totaled 222 RBI's to their opponents' 220 and as a team, the Wildcats batted .287 compared to their opponents' average of .282.

Neal Hudson, a 6'8" freshman, was the leading pitcher for the team based on his earned-run average, 3.57. Hudson had a 6-3 record. Other leading pitchers were Lon Ostrom, with a 3.76 ERA; Dave Tuttle, with a 4.23 ERA and Frank Seitz, with a 5.29 ERA.

The 'Cats, best fielders included Craig Cooper, first baseman, who had 334 put-outs and 19 assists with only two errors while playing right field.

K-State's fielding average of .944 fell short of their opponents' .961 on the season.

The future looks bright for the Wildcats, as they lost few key players to graduation in 1977.

Wilson, the coach who led the 'Cats to their best season ever, left K-State to become athletic director at Fort Hays State University. Dave Baker, former Creighton University coach, took over the K-State position.

Wildcat softball:

First winning season

Mary Phil Dwight's second year as women's softball coach was the most successful in the history of the game at K-State.

The Wildcats' 16-12 record was the first winning record for women's softball at K-State. Contributing to this success were Susie Norton, Patti Wendte and Betsy Locke, according to Dwight.

"Susie was our leading long-ball hitter and she led the team in RBI's," Dwight said.

Patti Wendte hit .337, the highest average on the team.

"They (Norton and Wendte) were our two biggest influences," Dwight said.

Betsy Locke, the Wildcats' first baseman, batted .272 and committed only 4 errors with 149 put-outs. Her performance during the season was good enough to earn a spot on the All-Big 8 team.

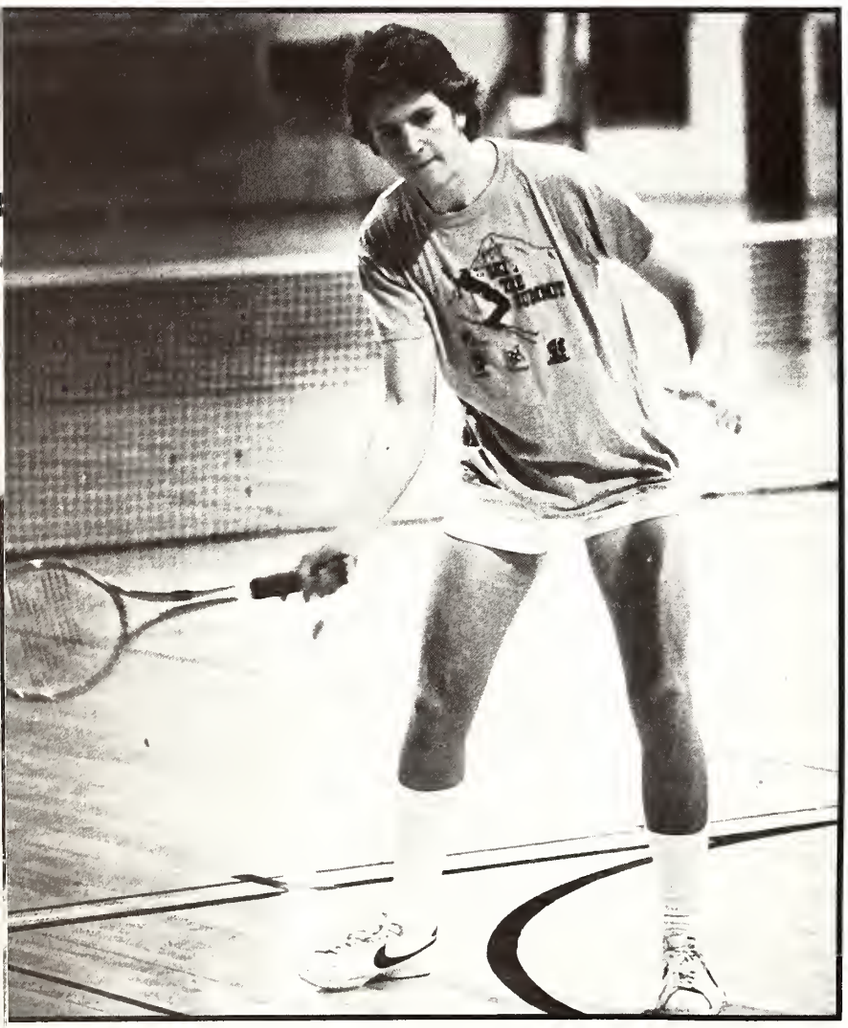
K-State finished fourth in the Big 8 by defeating Nebraska and losing to Oklahoma State and Missouri in the conference tournament April 15 and 16.

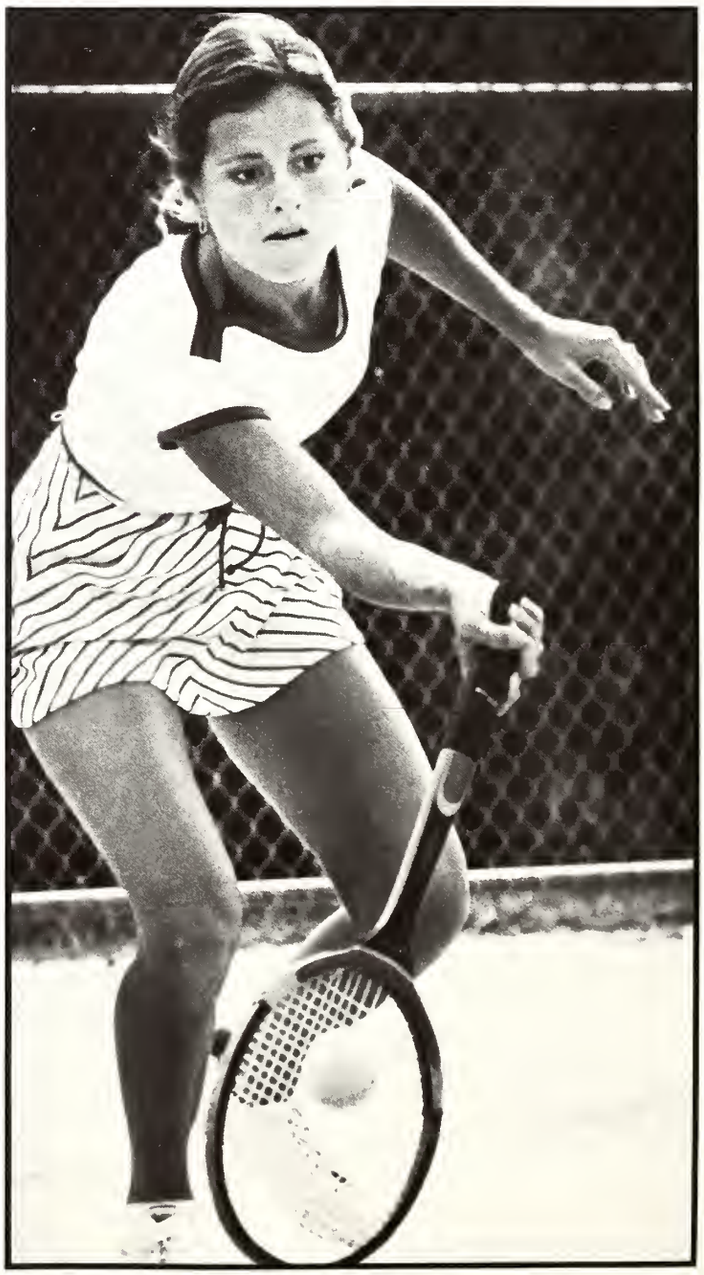
In April 23 and 24 state competition, the Wildcats beat Wichita State, Benedictine and Pittsburg State University on the first day of competition. Kansas defeated the 'Cats and Benedictine got revenge by winning 7-1 over K-State on the second day. K-State's 3-2 tournament record earned the 'Cats third place.

Men's and Women's Tennis:

K-State's return to intercollegiate tennis appeared unsuccessful in 1977. After a two-year layoff because of a lack of funds, both the men's and women's programs were faced with rebuilding. All of the players were walk-ons for coach Steve Snodgrass, because of the layoff.

The men had the most trouble building a respectable program as they only managed a 5-20 record. They beat Benedictine, Doane College, Fort Hays State, McPherson College and Washburn University. Their best individual record was 10-15, by Jeff Hall, playing at no. 1 singles.





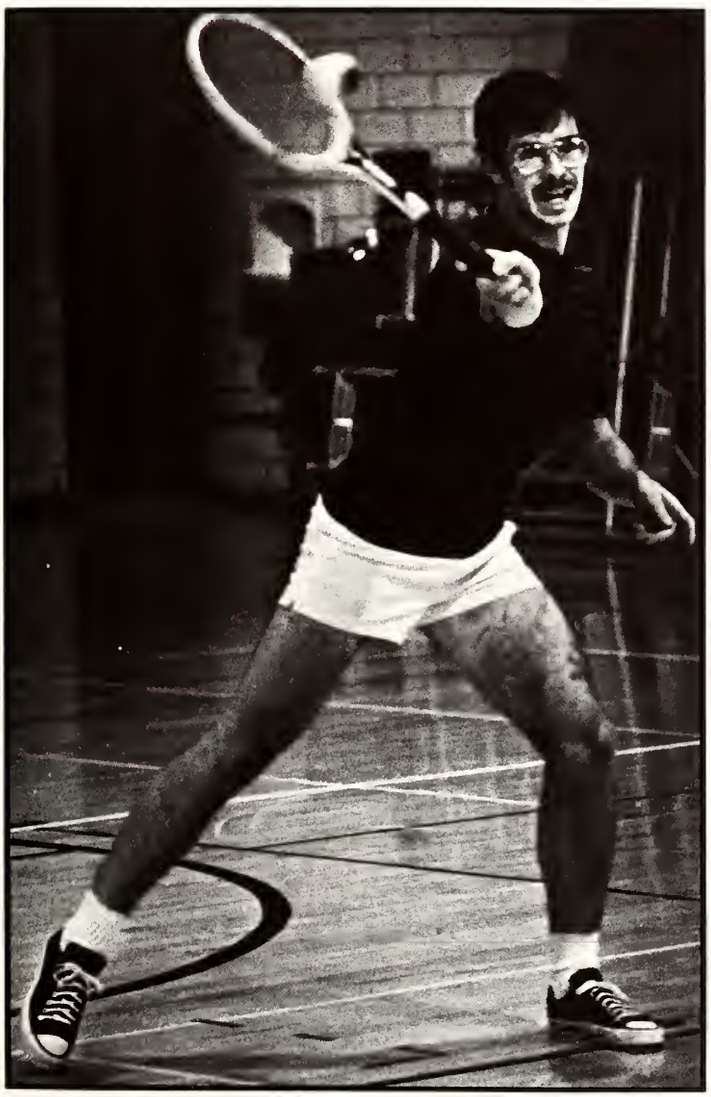
No Money No Advantage

"I thought we played reasonably well," Snodgrass said. The men narrowly lost seven or eight matches, 6-3 or 5-4, he said.

"Jeff had quite a few good wins, and we're expecting a lot of good things out of him in the future," Snodgrass said. Hall had a string of seven wins between March 22 and April 5. Last had an 8-16 record during the season.

In doubles competition, the best Wildcat teams were number one team Hall-Last, who compiled a 5-11 record and Doug Reinhardt-Marc Felts, who went 5-4 at number three doubles.

"We're still weak, but we're rebuilding," he said. The men finished last in the Big 8 tournament, and the best score they could show against any Big 8 team was 1-8 against Iowa State.



The season started off dismally, as they lost to Nebraska in their first meet, 1-8. The only win of the day was by number four singles player, Pam Boggs.

Things picked up for the women as they whipped the University of Nebraska April 7. The Cats won every match, winning the meet 9-0.

Big 8 competition proved tougher for K-State as they were beaten by Missouri and Kansas in an April 8-9 tournament, and then finished seventh at the Big 8 tournament April 14-16 at Lincoln.

The team played better in the last meets of the season, beating Kearney 9-0, and then losing only 6-3 to Nebraska in its second meeting.

Snodgrass was very pleased with his team's performance in the Missouri Valley tournament, April 28-30. K-State played some of its best tennis, as it finished ninth out of 22 schools from four states, he said.

"Mary Lou Kultgen and Pam Boggs played some excellent tennis for us," Snodgrass said. Kultgen had a 4-1 season, suffering her only singles loss at No. two, and winning four while playing at No. three. Boggs had a 3-2 record at singles, losing only to Missouri and Kansas.

In doubles competition, the women didn't do as well, as the best doubles record was 3-2 by Kultgen-Boggs.

The biggest problem in rebuilding the K-State tennis program is money. The players have their travel expenses and strings paid for, but rackets, shoes, and scholarships aren't part of the budget. To get players to come to K-State they are sold on education and told that some money may come later, Snodgrass said.

The K-State situation is different than other Big 8 and Kansas schools, Snodgrass said. Wichita State University, for example, will have one of the top 15 teams in the nation; they spend enough money to get excellent players, he said.

Things are looking better for K-State tennis, but until the team receives funding equal to that of other conference and state schools, the program will probably lag behind.

Cat tracks behind expectations

Mike Ross's first year as head track coach at K-State was disappointing, as injuries and few experienced athletes held the Wildcats from repeating their 1976 performance as Big 8 indoor champions.

The 1977 squad improved throughout the year, however, and finished fourth in the Big 8 outdoor after struggling through the indoor circuit. They relied heavily on points from Bob Prince, who was the NCAA indoor champion in the half-mile.

The Cats started off the indoor season at the Sooner Invitational at Norman, OK. Scoring 29 points they finished third. Ed DeLashmutt won the mile in that meet.

The Cats had their only win of the season in a triangular meet with Oklahoma State and Wichita State. Louie Combs took first in the 60-yard high hurdles, Chris Muehlbach won the 300-yard dash, and Bob Prince took first in the 1000-yard run and the mile to lead the Wildcats to 79 points.

Good individual performances by Prince, Muelhbach and Knauss were turned in at the U.S. Track and Field Federation Indoor at Manhattan. Prince won the mile, Muehlbach took second in the 440, and Knauss took second in the pole vault.

Fifth place was the best K-State could do at the Big 8 Indoor Championships. However, Prince successfully defended his title as 880-yard dash champion, setting a Big 8 record of 1:52.54. Other winners were Muehlbach in the 440 and Vince Parette in the triple jump.

The outdoor season kicked off with a quadrangular meet at Austin, TX, March 19. The Wildcats finished second, led by the victories of Parette in the triple jump, Knauss in the pole vault and Prince in the 880. The Cats took second in the mile relay, Bennett took second in the triple jump and long jump, and Frank Perbeck took second in the javelin.

At the Texas Relays, April 4, K-State's four-mile relay

team of Greg Glass, Doug Weber, Tim Davis and Jeff Rosenow finished third. The two-mile relay team took sixth place, and Parette took fifth place in the triple jump (50'9"), a new school record.

In "the most disappointing meet of the season," according to Ross, the Wildcats lost a dual meet to Missouri on April 9. It came down to the mile relay before the winner could be decided, and K-State's Prince was "nipped at the tape," Ross said. Missouri won with 80 points, while K-State had 74.

The tough Kansas Relays and Drake Relays where the nation's finest teams compete were coming up next and all the wildcats could hope for was some good individual performances.

At Kansas, Larry Beesley set a school record in the 10,000-meter run, taking third at 29:55.5. Parette and Bennett finished fourth and fifth in the triple jump, and Perbeck took fourth in the javelin. The sprint medley relay team of Washington, Parette, Muehlbach and Prince finished fourth at KU.

At the Drake Relays, Prince ran the third fastest 800-meter run in Big 8 history, finishing fifth behind four non-conference runners. Perbeck took fourth in the javelin, and the four-mile relay and sprint medley relay teams took sixth place.

With one more chance to smooth rough edges before the Big 8 outdoor championships, the Cats were soundly defeated by Kansas in a dual at Lawrence.

By this time, K-State was missing some key personnel due to injuries and illness. Out for the year were DeLashmutt, pole vaulter Dana Morris, and Kevin Sloan, who holds the long jump record for K-State and who held the triple jump record until Parette broke it. Also gone for the year was Rhent Noel, an excellent freshman high jumper. Parette was injured in a fire over the Christmas break and was never able to compete at full speed.

Despite injuries, the Cats did surprisingly well in the Big 8 outdoor. Big 8 champions for K-State were Parette in the triple jump and the mile relay team of Combs, Washington, Muehlbach and Prince. Other high finishers were; Perbeck, who took third in the javelin; Knauss, who pole-vaulted to second place; Bennett, who finished third in both the long jump and triple jump; and the 440 relay team of Washington, Muehlbach, Parette and J.D. Hill, who finished third.

"We look better for the 1978 season," Ross said, even though Prince, Muehlbach, Combs and Bennett graduated.

Women's track:
Overcomes hurdles

With a promising indoor season and excellent performances at several outdoor meets behind them, the K-State women's track team had every reason to be optimistic. Coach Barry Anderson said he thought that his Wildcats had a good chance to repeat as one of the nation's top 10 teams in 1977.

Adding to the early season optimism was the return of a strong nucleus of young performers from last year. Three of four runners on two national championship relay teams returned. Teri Anderson was lost from the two-mile relay team, but Renee Urish, Joyce Urish and Jane Wittmeyer were joined by high school standout Cindy Worcester to form another competitive team.

Joyce and Renee Urish and Leesa Wallace returned from the distance medley relay team clocked at 11:41.31 last year at Wichita, the third fastest time in the world.

The Wildcats got off to a fast start, winning their first three indoor meets. The Big 8 indoor was next at Columbia, Missouri, and K-State finished second behind Iowa State. First place finishers were Renee Urish in the mile and 1000-meter run, Worcester in the 600 and 880-yard run and Linda Long in the shot put. Urish set Big 8 records in both events and Worcester set a Big 8 record in the 800.

After losing to Kearney State in a dual at Kearney, NB, K-State began their outdoor season at the Memphis State University Invitational, March 25-26. The Memphis meet was "probably our best performance of the year," Anderson said. K-State's women scored 108 points, enough for first place. Tennessee, which was to finish in the top 10 in the AIAW Nationals, came in second with 94 points.

Meet records were set by Worcester in the 880, Renee Urish in the mile, and Urish, Urish, Wittmeyer and Worcester in the two-mile relay. "We competed very well, after beating Tennessee, I thought we were on our way to doing very well," Anderson said.

Individually, the 'Cats did well at the prestigious April 2 Texas Relays. Renee and Joyce Urish finished first and second in the 1500-meter run, and the two-mile relay team also took first.

K-State handily won the Wichita State Invitational April 8-9, scoring 59 points more than second place Texas Women's University. Roselyn Fry finished first in the 5000-meter run; Wallace, Jan Smith, Pat Osborne and Sharon McKee were first in the 440-yard relay; Smith won the 100-meter dash; Wittmeyer, Worcester, Cathy Nealy and Toni Mills won the mile relay in record time; and Joyce Urish set a record of 4:41.6 in the 1500-meter crushing the old meet record of 4:45.5.

In a rematch with Kearney State, the Wildcats lost by an inch and a half, the distance between two javelin throws. Suellhold of Kearney tossed 177'7" to finish fourth, giving K-State 63 points to Kearney's 64.

A 1-2 finish in the mile by the Urish sisters and victories by Worcester in the 880 and Moeller in the high jump led the 'Cats to 136 points and another victory at the April 15-16 Oklahoma State Women's Invitational.

The tough Kansas relays were disappointing for K-State. The highest finish was second place in the 1500-meter run, by Renee Urish.

Good individual performances marked the Wildcats efforts at the Drake relays. The 880-yard medley relay team of Osborne, Mckee, Smith and Worcester and took first place.

In the Big 8 meet K-State scored 151 points to Iowa State's 218. The high point performance was the Big 8 record breaking shot put by Christy Tumberger. She threw 45'8.4" to break the old record of 43'11.5". Other Big 8 champs for the 'Cats were Renee Urish in the 1500-meter run, and the sprint medley relay team.

Second place finishers in the Big 8 meet were Smith in the 100 and 200-meter dashes and the two-mile relay team, and Worcester in the 800-meter run.

Late season injuries to Renee Urish and Jan Smith hurt the Wildcats' hopes of finishing high in the AIAW Nationals. K-State was unable to follow up their sixth place finish in the nation, and in fact failed to score points in the national meet at Los Angeles.

"The outlook for 1978 is very good," Anderson said. Although Joyce Urish and Jane Wittmeyer were lost to graduation, and Christy Tumberger decided not to come back to school, the 'Cats are returning a "key group plus five tremendous freshman," Anderson said.

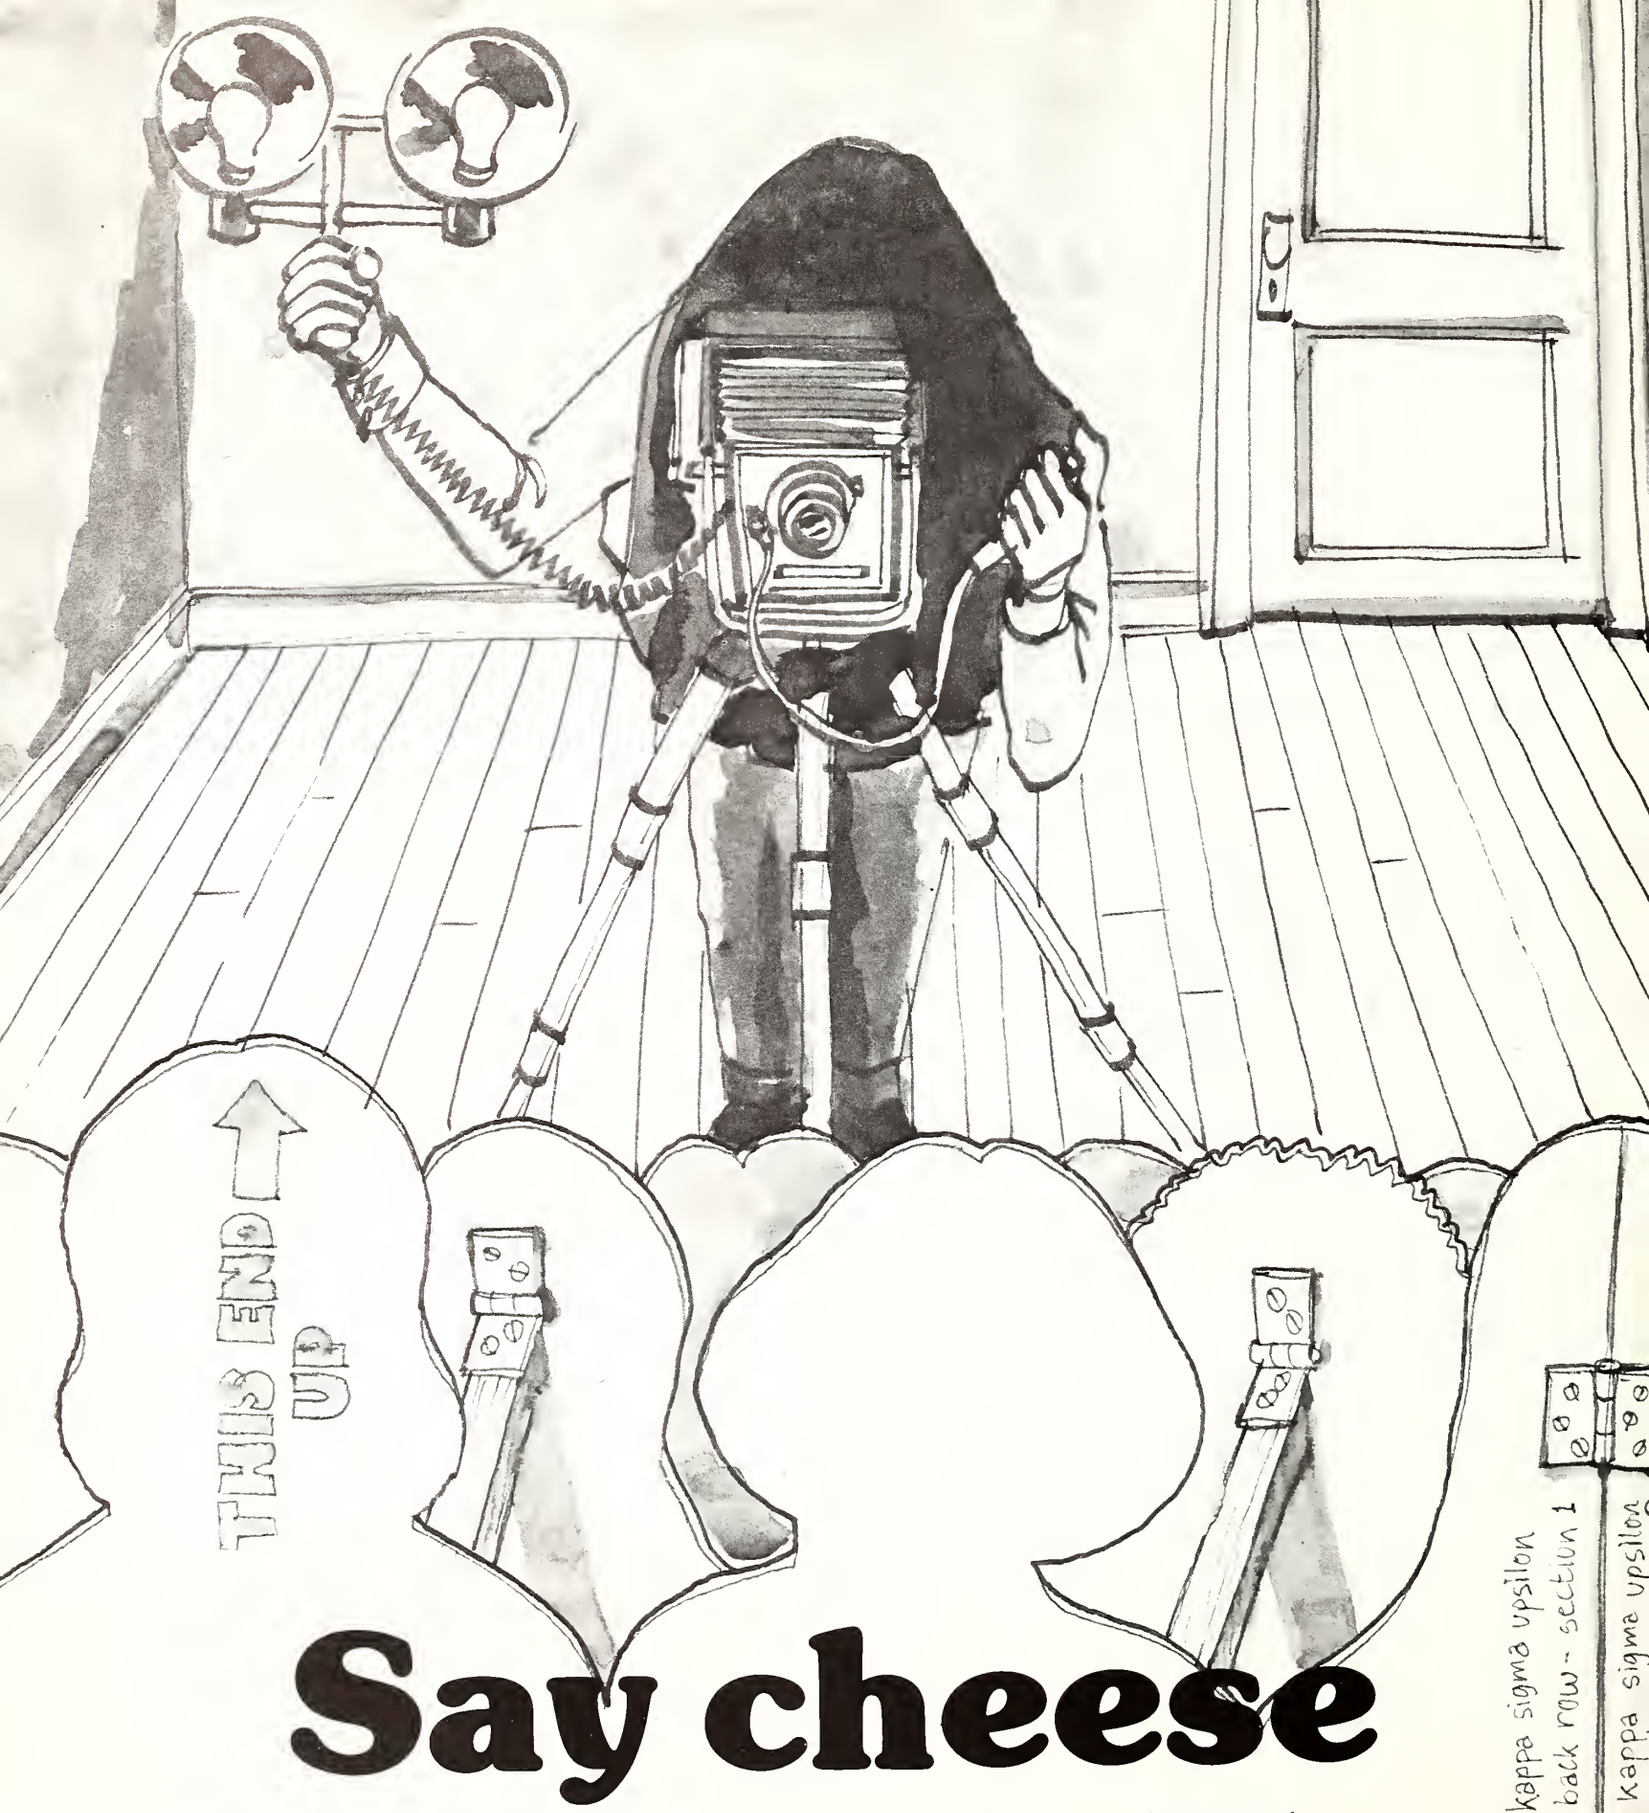
Organizations



Say cheese

Pay dues and step right up, resume-fillers' satisfaction guaranteed, offer good through Nov. 4, cancel your membership at any time.

Decked out in photo-finery, once again K-State honoraries, interest groups, service groups and social clubs marched onto bleachers for mug shots with frozen grins, arms to sides.

Group shots are chronicles of collegiate success, the life certificate: yes-I-went-to-college-and-yes-I-was-involved.

A 3 x 5 graven image in the yearbook is a feeble attempt to give credit where credit is due, $18.00 worth.

For others, group shot appointments in Calvin Hall are excuses to hold the annual meeting, collect dues and hand out membership cards.

On with the show.

Were your eyes open?

agricultural ambassadors

Pre-Design Professions	*Sophomore*
WILEY, BECKY L	Bartlett
Business Education	Junior
WILEY, STEVEN N	*Oswego*
Mechanical Engineering	*Senior*
WILLETT, CINDY S	*Superior, NB*
Special Education	*Junior*
WILLHITE, CURTIS R	*Leon*
Agricultural Mechanization	*Senior*
WILLHITE, LISA K	Elmdale
Music Education	Junior
WILLIAMS, CORY L	*Overland Park*
Physical Education	*Senior*
WILLIAMS, DEVIN E	Spring Hill
Interior Design	Sophomore
WILLIAMS, JAMES R	Moline
Animal Science and Industry	Sophomore
WILLIAMS, JERRILEE	*Abilene*
Horticulture	*Senior*
WILLIAMS, JULIANNE	Moline
Fashion Marketing	Freshman
WILLIAMS, REVA J	Manhattan
General	Sophomore
WILLIAMS, SANDRA A	Lake Providence, LA
Curriculum and Instruction	Graduate Student
WILLIAMS, TRENTON L	*Greensburg*
Mechanical Engineering	*Senior*
WILLIS, GREGORY O	Overland Park
Milling Science and Management	Junior
WILLIS, LINDEN G	*Manhattan*
Mathematics	*Senior*
WILLIS, THOMAS J	Chapman
General Engineering	Freshman
WILSON, AMY C	Plevna
Elementary Education	Junior
WILSON, CAROLYN A	*Asherville*
Business Management	*Senior*
WILSON, DIANE J	Wichita
Physical Therapy	Junior
WILSON, MARK C	Wamego
Physical Education	Sophomore
WILSON, PAUL R	*Burr Oak*
Accounting	*Senior*
WIMER, JOEL W	*Manhattan*
Animal Science and Industry	*Senior*
WINGER, JOHN R	*Wellington*
Marketing	*Senior*
WINKLER, LARRY A	Manhattan
Accounting	Junior
WINKLER, MARY ELLEN	Manhattan
Accounting	Junior
WINTERSTEEN, WENDY K	*Hutchinson*
Crop Protection	*Senior*
WIRTH, CATHERINE L	Lincoln
Early Childhood Education	Junior
WIRTZ, PATRICIA	Manhattan
Theater	Freshman
WISEMAN, CHRIS E	Hiawatha
Business Education	Junior
WITHERS, RAY L	*Coffeyville*
Dairy Production	*Senior*
WITT, DEBORAH A	Manhattan
Retail Floriculture	Sophomore
WITT, STEVE D	*Oberlin*
Education	*Senior*
WITTSTOCK, JANE	*Wichita*
Veterinary Medicine	*Senior*
WIXSON, MICHAEL G	*Overland Park*
Marketing	*Senior*
WOLE, CAROL J	*Kensington*
Family and Child Development	*Senior*
WOLE, DAVID A	Junction City
Engineering	Freshman
WOLEE, SALLY M	*La Cygne*
Fashion Marketing	*Senior*
WOMOCHIL, MICHAEL R	*Abilene*
Agricultural Education	*Senior*
WOOD, ELIZABETH A	Liberal
Special Education	Sophomore
WOODS, KELVIN L	*Hutchinson*
Milling Science and Management	*Senior*
WOODY, PATRICIA L	*Junction City*
Elementary Education	*Senior*

WORCESTER, RHONDA L — Hill City
Pre-Nursing — Sophomore
WORELL, DAVID L — Leon
Animal Science and Industry — Special Student
WRIGHT, BRENDA K — Junction City
Accounting — Freshman
WULLSCHLEGER, RICHARD D — Wichita
Milling Science and Management — Junior
WYER, DAVID L — *Wolfeboro, NH*
Architectural Engineering — *Senior*

WYMER, JOYCE Y — Protection
Medical Technology — Sophomore
WYSS, JILL L — *Overland Park*
Horticulture Therapy — *Senior*
YARNELL, R. KAY — *Wichita*
Recreation — *Senior*
YATES, KATHLEEN A — Prairie Village
Nutrition Science — Junior
YOUNG, DAVID A — *Oxford*
Feed Science — *Senior*

YOUNG, GREGORY B — Salina
Civil Engineering — Junior
YOUNG, LESLEE L — Rose Hill
Elementary Education — Junior
ZEINER, SHARON I — Manhattan
Gifted Education — Graduate Student
ZEMAN, GEORGE — *Ellsworth*
Engineering Technology — *Senior*
ZILLINGER, PATSY L — Phillipsburg
Retail Floriculture — Junior

ZIMMERMAN, DEBORA A — *Wellington*
Nuclear Engineering — *Senior*
ZIMMERMAN, JACK B — *Kansas City*
Construction Science — *Senior*
ZINK, NANCY A — *Logan*
Dietetics and Institutional Management — *Senior*
ZUK, ERIC A — *Hutchinson*
Veterinary Medicine — *Senior*

Education is that which remains when one has forgotten everything he learned in school.

Albert Einstein

by Rita Shelley

College is confusing. The words "educational" and "institution" don't really go together, when you think about it.

And among the confusion, we panic in a death grip on the few truths which we hold to be, we hope, self-evident.

One maxim, of which I have become most tired in my 17 years of school is that teachers must make the same demands on students as employers do on employees in the "Real World."

This usually amounts to a regimen of saving experimentation for outside the classroom: "yes, I know you would rather learn *that,* but *this* is what I want you to know."

My question is this: where can we experiment if not in a university setting? When a professor demands anything else, he or she misses the point of what learning is about. A student can only learn what he or she wants to know. What is tossed into the mind's circular file seconds after the computer card is blackened doesn't count as knowledge.

My thanks goes to those professors whose focus was not that I conform to a preconceived notion of what they thought I should know. They, by their acceptance of my individuality, expressed a faith which sent me on journeys of my own. The knowledge gained I embraced; I didn't gingerly touch it with gloved fingers and retreat from it after the test.

And at some point I'll get back to what the "real world" dictates I should know. Maybe the hard way when I can't perform on a job, but then necessity will be there; I will have learned to think by following pathways that fit my needs in earlier stages.

Which was the whole idea of going to school, I thought.

DON'T BOGART YOUR EDUCATION: "IF YOU'RE NOT ON THAT PLANE, YOU'RE GOING TO REGRET IT— MAYBE NOT TODAY, MAYBE NOT TOMORROW, BUT SOON — HERE'S LOOKIN' AT YA', SWEETHEART!"
H Miller — 78

Only one all-nighter. What a record!

I'm not going to be modest and say I had nothing to do with it. After all, I AM the editor. And, to quote John McCormally, editor of the Burlington, (Iowa) Hawk Eye, a journalist knows she's not doing her job if everyone likes the work she does.

But my thanks for the "organized" influence goes to Judy "Wart Foot" Weltsch, who whipped the ever-faithful Mary Woo, Tex and Debbie R. into line. Thanks to: Pamela A. for reminding us "the Royal Purple doesn't cure cancer," but working many hours as though it did; Kathy for putting up with the photogs; the photogs for putting to rest their "f.a." image once in a while; pub practitioners for taking it all so seriously (I'm not sure I would have).

Inga, I hope you quit talking to yourself. Kent, just keep your subjects and verbs in agreement and you'll be fine. Jett and Dennis, thanks for the extra help on the last deadline. And Dave, thanks for being a "bright boy," always coming through on short notice.

Mary and Mr. Brown, thanks fo being there when we needed you and not when we didn't.

Thanks to the administrators wh saw their way to having separat graduation ceremonies for differen colleges. That's what we like to see even if it does put us out of date.

And thanks to all of our friend who made us who we are so w could make this what it is. Don't for get, as Holly says, "it's all true."
